🔍 **BIOLOGY AND BIOTECHNOLOGY OF THE PLANT HORMONE ETHYLENE II** A.K. KANELIS,C. CHANG,H. KLEE,A.B. BLEECKER,J.C. PECH,DONALD GRIERSON,2012-12-06 The inflorescence of the monoecious maize plant is unique among the Gramineae in the sharp separation of the male and female structures. The male tassel at the terminus of the plant most often sheds pollen before the visual appearance of the receptive silks of th the female ear at a lateral bud, normally at the 10 leaf [1]. Earlier studies examined the ontogeny of the growing tissues beginning with the embryo in the kernel through to the obvious protuberances of the growing point as the kernel germinates. The differentiated developing soon-to-become tassel and the lateral bulges that develop into the ears on the lateral buds become apparent very early in the germinating kernel [2, 3, 46]. A certain number of cells are destined for tassel and ear development [8]. As the plant develops, there is a phase transition [13, 16] from the vegetative lateral buds to the reproductive lateral buds. This change in phase has been ascribed to genotypic control as evidenced in the differences among different genotypes in the initiation of the reproductive [1]. The genetic control of tassel and ear initiation has been gleaned from anatomical observations. Lejeune and Bernier [12] found that maize plants terminate the initiation of additional axillary meristems at the time of tassel initiation. This would indicate that the top-most ear shoot is initiated on the same day as the initiation of tassel development and this event signals the end of the undifferentiated growing point.

🔍 **COMPUTER SCIENCE HANDBOOK** ALLEN B. TUCKER,2004-06-28 When you think about how far and fast computer science has progressed in recent years, it's not hard to conclude that a seven-year old handbook may fall a little short of the kind of reference today's computer scientists, software engineers, and IT professionals need. With a broadened scope, more emphasis on applied computing, and more than 70 chap

🔍 **PUTINISM** WALTER LAQUEUR,2015-06-30 There is no question that tensions between Russia and American are on the rise. The forced annexation of Crimea, the downing of Malaysia Airlines flight 17, and the Russian government's treatment of homosexuals have created diplomatic standoffs and led to a volley of economic sanctions. Much of the blame for Russia's recent hostility towards the West has fallen on steely-eyed President Vladimir Putin and Americans have begun to wonder if they are witnessing the rebirth of Cold War-style dictatorship. Not so fast, argues veteran historian Walter Laqueur. For two decades, Laqueur has been ahead of the curve, predicting events in post-Soviet Russia with uncanny accuracy. In Putinism, he deftly demonstrates how three long-standing pillars of Russian ideology: a strong belief in the Orthodox Church, a sense of Eurasian manifest destiny and a fear of foreign enemies, continue to exert a powerful influence on the Russian populous. In fact, today's Russians have more in common with their counterparts from 1904 than 1954 and Putin is much more a servant of his people than we might think. Topical and provocative, Putinism contains much more than historical analysis. Looking to the future, Laqueur explains how America's tendency to see Russia as a Cold War relic is dangerous and premature. As the situation in Ukraine has already demonstrated, Russia can and will challenge the West and it is in our best interest to figure out exactly who it is we are facing—and what they want—before it is too late.

🔍 **NETWORK AESTHETICS** PATRICK JAGODA,2016-03-22 The term “network” is now applied to everything from the Internet to terrorist-cell systems. But the word's ubiquity has also made it a cliché🔍 , a concept at once recognizable yet hard to explain. Network Aesthetics, in exploring how popular culture mediates our experience with interconnected life, reveals the network's role as a way for people to construct and manage their world—and their view of themselves. Each chapter considers how popular media and artistic forms make sense of decentralized network metaphors and infrastructures. Patrick Jagoda first examines narratives from the 1990s and 2000s, including the novel Underworld, the film Syriana, and the television series The Wire, all of which play with network forms to promote reflection on domestic crisis and imperial decline in contemporary America. Jagoda then looks at digital media that are interactive, nonlinear, and dependent on connected audiences to show how recent approaches, such as those in the videogame Journey, open up space for participatory and improvisational thought. Contributing to fields as diverse as literary criticism, digital studies, media theory, and American studies, Network Aesthetics brilliantly demonstrates that, in today's world, networks are something that can not only be known, but also felt, inhabited, and, crucially, transformed.

🔍 **THE AGE OF SPIRITUAL MACHINES** RAY KURZWEIL,2000-01-01 Ray Kurzweil is the inventor of the most innovative and compelling technology of our era, an international authority on artificial intelligence, and one of our greatest living visionaries. Now he offers a framework for envisioning the twenty-first century--an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live. Kurzweil's prophetic blueprint for the future takes us through the advances that inexorably result in computers exceeding the memory capacity and computational ability of the human brain by the year 2020 (with human-level capabilities not far behind); in relationships with automated personalities who will be our teachers, companions, and lovers; and in information fed straight into our brains along direct neural pathways. Optimistic and challenging, thought-provoking and engaging, The Age of Spiritual Machines is the ultimate guide on our road into the next century.

🔍 **THE GOLDEN YOKE** REBECCA REDWOOD FRENCH,2019-06-07 The Golden Yoke is a remarkable achievement. It is the first elaboration of the legal, cultural, and ideological dimensions of precommunist Tibetan jurisprudence, a unique legal system that maintains its secularism within a thoroughly Buddhist setting. Layer by layer, Rebecca Redwood French reconstructs the daily operation of law in Tibet before the Chinese invasion in 1959. In the Tibetans' own words, French identifies their courts, symbols, and personnel and traces the procedures for petitioning and filing documents. There are stories here from judges, legal conciliators, and lay people about murder, property disputes, and divorce. French shows that Tibetan law is deeply embedded in its Buddhist culture and that the system evolved not from the rules and judgments but from what people actually do and say. In what amounts to a fully developed cosmology, she describes the cultural foundation that informs the system: myths, notions of time and conflux, inner morality, language patterns, rituals, use of space, symbols, and concepts. Based on extensive readings of Tibetan legal documents and codes, interviews with Tibetan scholars, and the reminiscences of Tibetans at home and in exile, this generously illustrated, elegantly written work is a model of outstanding research. French combines the talents of a legal anthropologist with those of a former law practitioner to develop a new field of study that has implications for other judicial systems, including our own.
