**New Keywords** Tony Bennett, Lawrence Grossberg, Meaghan Morris, 2013-05-29 Over 25 years ago, Raymond Williams' *Keywords: A Vocabulary of Culture and Society* set the standard for how we understand and use the language of culture and society. Now, three luminaries in the field of cultural studies have assembled a volume that builds on and updates Williams' classic, reflecting the transformation in culture and society since its publication. *New Keywords: A Revised Vocabulary of Culture and Society* is a state-of-the-art reference for students, teachers and culture enthusiasts everywhere. Assembles a stellar team of internationally renowned and interdisciplinary social thinkers and theorists Showcases 142 signed entries – from art, commodity, and fundamentalism to youth, utopia, the virtual, and the West– that capture the practices, institutions, and debates of contemporary society Builds on and updates Raymond Williams's classic *Keywords: A Vocabulary of Culture and Society*, by reflecting the transformation in culture and society over the last 25 years Includes a bibliographic resource to guide research and cross-referencing The book is supported by a website: [www.blackwellpublishing.com/newkeywords](http://www.blackwellpublishing.com/newkeywords).

**The Darker Side of Travel** Richard Sharpley, Philip R. Stone, 2009 *The Darker Side of Travel* is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.

**Medical Science and Research** Mieczyslaw Pokorski, 2019-06-22 This book shares the latest research and practice-oriented findings in medical sciences with a wide audience. It addresses a range of contemporary issues, often unresolved or contentious, across various medical fields, including advances in the management of hemorrhagic brain stroke. It also discusses metastatic renal cell carcinoma – a global scourge with an extremely poor long-term survival prognosis, the course and sequelae of renal cell carcinoma, as well as advances in targeted molecular therapy with sunitinib, a receptor tyrosine kinase inhibitor. Further, it examines the molecular targeting of proliferative signaling of the epidermal growth factor receptor in the first-line treatment of patients with metastatic non-small-cell lung cancer. Other articles cover clearance of toxins in hemodialyzed patients; the search for diagnostic and therapeutic markers in the connective tissue disease scleroderma; obesity linked to inappropriate dietary habit; clinical problems related to the diagnosis of sensitization to fungi and its role in asthma; and reasons for the perilous trend of avoiding basic vaccinations in children. Lastly, the book explores the rapid developments in e-health technologies that increase access to health services, particularly for the elderly. The book is intended for clinical specialists, researchers, and all allied health professionals from various fields.

**Security Engineering** Ross Anderson, 2020-12-22 Now that there's software in everything, how can you make anything secure? Understand how to engineer dependable systems with this newly updated classic *In Security Engineering: A Guide to Building Dependable Distributed Systems*, Third Edition Cambridge University professor Ross Anderson updates his classic textbook and teaches readers how to design, implement, and test systems to withstand both error and attack. This book became a best-seller in 2001 and helped establish the discipline of security engineering. By the second edition in 2008, underground dark markets had let the bad guys specialize and scale up; attacks were increasingly on users rather than on technology. The book repeated its success by showing how security engineers can focus on usability. Now the third edition brings it up to date for 2020. As people now go online from phones more than laptops, most servers are in the cloud, online advertising drives the Internet and social networks have taken over much human interaction, many patterns of crime and abuse are the same, but the methods have evolved. Ross Anderson explores what security engineering means in 2020, including: How the basic elements of cryptography, protocols, and access control translate to the new world of phones, cloud services, social media and the Internet of Things Who the attackers are – from nation states and business competitors through criminal gangs to stalkers and playground bullies What they do – from phishing and carding through

SIM swapping and software exploits to DDoS and fake news Security psychology, from privacy through ease-of-use to deception The economics of security and dependability - why companies build vulnerable systems and governments look the other way How dozens of industries went online - well or badly How to manage security and safety engineering in a world of agile development - from reliability engineering to DevSecOps The third edition of Security Engineering ends with a grand challenge: sustainable security. As we build ever more software and connectivity into safety-critical durable goods like cars and medical devices, how do we design systems we can maintain and defend for decades? Or will everything in the world need monthly software upgrades, and become unsafe once they stop?

*IBM Flex System p270 Compute Node Planning and Implementation Guide* David Watts, Kerry Anders, Simon Casey, Fabien Willmann, IBM Redbooks, 2014-01-07 To meet today's complex and ever-changing business demands, you need a solid foundation of compute, storage, networking, and software resources that is simple to deploy and can quickly and automatically adapt to changing conditions. You also need to make full use of broad expertise and proven preferred practices in systems management, applications, hardware maintenance, and more. The IBM® Flex System p270 Compute Node is an IBM Power Systems™ server that is based on the new dual-chip module POWER7+™ processor and is optimized for virtualization, performance, and efficiency. The server supports IBM AIX®, IBM i, or Linux operating environments, and is designed to run various workloads in IBM PureFlex™ System. The p270 Compute Node is a follow-on to the IBM Flex System™ p260 Compute Node. This IBM Redbooks® publication is a comprehensive guide to the p270 Compute Node. We introduce the related Flex System offerings and describe the compute node in detail. We then describe planning and implementation steps including converged networking, management, virtualization, and operating system installation. This book is for customers, IBM Business Partners, and IBM technical specialists who want to understand the new offerings and plan and implement an IBM Flex System installation that involves the Power Systems compute nodes.

*Sexual Reproduction in Animals and Plants* Hitoshi Sawada, Naokazu Inoue, Megumi Iwano, 2014-02-07 This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

**Innovations in Bio-Inspired Computing and Applications** Ajith Abraham, Hideyasu Sasaki, Ricardo Rios, Niketa Gandhi, Umang Singh, Kun Ma, 2021-04-09 This book highlights recent

research on bio-inspired computing and its various innovative applications in information and communication technologies. It presents 51 high-quality papers from the 11th International Conference on Innovations in Bio-Inspired Computing and Applications (IBICA 2020) and 10th World Congress on Information and Communication Technologies (WICT 2020), which was held online during December 16-18, 2019. As a premier conference, IBICA-WICT brings together researchers, engineers and practitioners whose work involves bio-inspired computing, computational intelligence and their applications in information security, real-world contexts, etc. Including contributions by authors from 25 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.

*Molecular Modeling of Proteins* Andreas Kukol, 2017-04-30 *Molecular Modeling of Proteins*, Second Edition provides a theoretical background of various methods available and enables non-specialists to apply methods to their problems by including updated chapters and new material not covered in the first edition. This detailed volume opens by featuring classical and advanced simulation methods as well as methods to set-up complex systems such as lipid membranes and membrane proteins and continues with chapters devoted to the simulation and analysis of conformational changes of proteins, computational methods for protein structure prediction, usage of experimental data in combination with computational techniques, as well as protein-ligand interactions, which are relevant in the drug design process. Written for the highly successful *Methods in Molecular Biology* series, chapters include thorough introductions, step-by-step instructions and notes on troubleshooting and avoiding common pitfalls. Update-to-date and authoritative, *Molecular Modeling of Proteins*, Second Edition aims to aid researchers in the physical, chemical and biosciences interested in utilizing this powerful technology.

**Pediatric Rheumatology** Sujata Sawhney, Amita Aggarwal, 2016-11-26 This book on rheumatology in children is intended to be a handy tool for all professionals interested in this field. It is divided into five sections: General considerations, arthritic problems, connective tissue diseases, systemic vasculitides and finally a section that covers miscellaneous issues such as Immunodeficiencies, bone health and uveitis. The book has an easy format with each chapter having one or more clinical vignettes at the start of the chapter. In addition each chapter outlines the learning objectives and key take home messages. At the end of each section a collection of cases to highlight important issues in the clinic are included. The colorful charts, pictures and tables make reading this book an easy task. The authors are leading experts in their fields working at best practices centers globally to provide the reader with state-of-the-art information.

*Spawn #230* Jonathan David Goff, Todd McFarlane, 2013-04-01 As a small online community continues to look into Jim's connection with the Curse of the Hellspawn, the fervor around the world's new messiah begins to reach an apex. Meanwhile, the Vatican makes a house call, taking the first steps in their efforts to test Jim's true origin. Sinner or Saint, the church has no intention of allowing his gifts to be used against them.

Landscape Perspectives Marc Antrop, Veerle Van Eetvelde, 2017-12-19 Climb a mountain and experience the landscape. Try to grasp its holistic nature. Do not climb alone, but with others and share your experience. Be sure the ways of seeing the landscape will be very different. We experience the landscape with all senses as a complex, dynamic and hierarchically structured whole. The landscape is tangible out there and simultaneously a mental reality. Several perspectives are obvious because of language, culture and background. Many disciplines developed to study the landscape focussing on specific interest groups and applications. Gradually the holistic way of seeing became lost. This book explores the different perspectives on the landscape in relation to its holistic nature. We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups. Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept.

*Digital Material* Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.
