The Adventures of Vince the Cat Heidi

Bryant, 2018-11-16 This book is the first in the Catnap Stories™ Series of Books for children, which have been written to educate children about the world in which we live in a fun way. Where they don't even realise they are learning. This first book subtly includes French in the story. If you're unsure of how to pronounce the French words or what they mean, there is a glossary at the back and pronunciation suggestions. Fun and learning for both adults and children. To develop this book, we have used a special font designed around cats, created beautifully detailed illustrations and included little details throughout that

children will love. Each book has been crafted with exceptional care and attention to detail. More Details and original books can be found at www.catnapstories.com

Weird Radio Charles River Editors, 2019-05-16
*Includes pictures *Includes online resources and a bibliography for further reading For more than a century, radio has been a part of people's lives. No one alive today remembers a time when it hadn't always been there as a familiar, reliable source of information and entertainment. Today, it seems a bit mundane, overtaken by the Internet and satellite television. Even in the 1980s, the development of cable television (50 channels instead of five) and the start of MTV made radio seem quaint, and as many once claimed, Radio is dead. It wasn't, of course. Radio is still popular today, with as many stations as ever, and it remains a part of the world that is taken for granted. While not dead, its familiarity has made it seem a bit mundane, but people shouldn't think of it that way. In fact, the airwaves have always been a place of mystery, a battleground of competing ideologies, and a source of anonymous voices. Radio has been used to support war efforts, topple governments, communicate secretly, and even attempt to communicate with the dead. *Weird Radio: A Collection of Spy Transmissions, Unidentified Stations, and other Mysteries of the Airwaves* includes strange stories that will make

this familiar medium seem a bit less familiar and far more interesting. Along with pictures of important people, places, and events, you will learn about some of the world's strangest radio stories like never before.

Climate Dana Desonie, 2008 Discusses the issue of global warming and what we can do to prevent its rise. This book addresses how people must use energy more efficiently, develop alternative energy sources, and lower emissions technologies.
