Digital Archaeology Michael W. Graves, 2013 In *Digital Archaeology*, expert practitioner Michael Graves has written the most thorough, realistic, and up-to-date guide to the principles and techniques of modern digital forensics. He begins by providing a solid understanding of the legal underpinnings and critical laws affecting computer forensics, including key principles of evidence and case law. Next, he explains how to systematically and thoroughly investigate computer systems to unearth crimes or other misbehavior, and back it up with evidence that will stand up in court. Drawing on the analogy of archaeological research, Graves explains each key tool and method investigators use to reliably uncover hidden information in digital systems. Graves concludes by presenting coverage of important professional and business issues associated with building a career in digital forensics, including current licensing and certification requirements.

Food Flavour Technology Andrew J. Taylor,Robert S. T. Linforth,2009-12-15 Food flavour technology is of key importance for the food industry.Increasingly, food products must comply with legal requirements andconform to consumer demands for “natural” products, butthe simple fact is that, if foods do not taste good, they will notbe consumed and any nutritional benefit will be lost. Thereis therefore keen interest throughout the world in the production,utilisation and analysis of flavours. The second edition of this successful book offers a broadintroduction to the formulation, origins, analysis and performanceof food flavours, updating the original chapters and addingvaluable new material that introduces some of the newermethodologies and recent advances. The creation of flavourings is the starting point for the book,outlining the methodology and constraints faced byflavourists. Further constraints are considered in a chapterdealing with international legislation. The origins of flavours aredescribed in three chapters covering thermal generation,biogeneration and natural sources, keeping in mind the adjustmentsthat manufacturers have had to make to their raw

materials and processes to meet the demand for natural products whilst complying with cost issues. Delivery of flavours using encapsulation or through an understanding of the properties of the food matrix is described in the next two chapters, and this section is followed by chapters describing the different ways to analyse flavours using instrumental, modelling and sensory techniques. The book is aimed at food scientists and technologists, ingredients suppliers, quality assurance personnel, analytical chemists and biotechnologists.

The Aarhus Convention, 2014 The Aarhus Convention, which is open for global accession, offers powerful twin protections for the environment and human rights. It provides an effective model for ensuring public input in defining and implementing green economy programmes, in choosing the most appropriate road maps to sustainability and for increasing transparency and Government accountability, thereby putting Principle 10 of the Rio Declaration on Environment and Development into practice and paving the way for its universal application. The Aarhus Convention Implementation Guide is therefore intended as a convenient non-legally binding and user-friendly reference tool to assist policymakers, legislators and public authorities in their daily work of implementing the Convention and of realising the provisions of Principle 10 in practice. It is also hoped that it will assist members of the public and environmental non-governmental organizations to exercise their rights under the Convention. The Implementation Guide provides both a general overview of the principles behind the Convention and a detailed article-by-article analysis of its provisions. In its analysis, the Guide draws on other international law instruments in the area of the environment and human rights, decisions adopted by the Meeting of the Parties to the Aarhus Convention, findings of the Aarhus Convention Compliance Committee, academic writings and examples from national legislation and practice.

Human-Computer Interaction Advanced Interaction, Modalities, and Techniques Masaaki Kurosu, 2014-05-27 The 3-volume set LNCS 8510, 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Preliminary Studies on the Scholia to Euripides Donald Mastronarde, 2017 This work presents five studies that are parerga to the online edition of Euripidean scholia (EuripidesScholia.org), for which the release of a much more complete sample covering Orestes 1-500 is planned for 2018. The first chapter reviews the achievements and shortcomings of previous editions of Euripidean scholia and argues for a more comprehensive treatment of this and similar corpora of scholia and for the importance of glosses. It assesses the few surviving traces in the scholia of views attributed to philologists and commentators working from Hellenistic times to early Byzantium. The second chapter

illuminates a genre of annotation termed here teachers' scholia, prominent in many of the younger manuscripts, but also present to a small degree in the oldest witnesses. Evidence for the teaching of Ioannes Tzetzes related to Euripides is gathered more completely than previously, as is that for Maximus Planudes. The third chapter offers an edition and commentary on a miscellany of teachers' notes on Hecuba first attested in 1287 but clearly copied from an older source, and treats some other unusual notes related to Hecuba carried in Palaeologan sources. The connection of this material with middle Byzantine sources (especially Tzetzes and Eustathius) is assessed. The fourth chapter marshals the evidence for the dating of the Marcianus graecus 471 (M) in the 11th (and not the 12th) century and provides palaeographic and codicological details. The fifth chapter argues that any possibly Planudean connections to Vaticanus graecus 909 (V) are to be found only in the cursive notes added more than a generation after the codex was produced (probably ca. 1250-1280, as proposed by Nigel Wilson). The hands of the two scribes who worked in tandem on V are described, and the distribution of their work documented.--Site web de l'éditeur.

Environmental Justice in India Gitanjali Nain Gill, 2016-11-10 Modern environmental regulation and its complex intersection with international law has led many jurisdictions to develop environmental courts or tribunals. Strikingly, the list of jurisdictions that have chosen to do this include numerous developing countries, including Bangladesh, Kenya and Malawi. Indeed, it seems that developing nations have taken the task of capacity-building in environmental law more seriously than many developed nations. *Environmental Justice in India* explores the genesis, operation and effectiveness of the Indian National Green Tribunal (NGT). The book has four key objectives. First, to examine the importance of access to justice in environmental matters promoting sustainability and good governance. Second, to provide an analytical and critical account of the judicial structures that offer access to environmental justice in India. Third, to analyse the establishment, working practice and effectiveness of the NGT in advancing a distinctively Indian green jurisprudence. Finally, to present and review the success and external challenges faced and overcome by the NGT resulting in growing usage and public respect for the NGT's commitment to environmental protection and the welfare of the most affected people. Providing an informative analysis of a growing judicial development in India, this book will be of great interest to students and scholars of environmental justice, environmental law, development studies and sustainable development.
