Gordo Jaime Cortez, 2021-08-10 This debut story collection “masterfully navigates adverse conditions of migrant life while . . . managing to find joy and amusement, love and triumph” (San Francisco Chronicle). Gordo brings readers inside a migrant workers camp near Watsonville, California in the 1970s. At the heart of these interrelated stories is a young, probably gay, boy named Gordo, who must find a way to contend with the notions of manhood imposed on him by his father. As he comes of age, Gordo learns about sex, watches his father’s drunken fights, and discovers even his own documented

Mexican-American parents are wary of illegal migrants. We also meet Fat Cookie, high schooler and resident artist who runs away from home one day with her mother's boyfriend, Manny. And then there are Los Tigres, the twins who show up every season and whose drunken brawl ends with one of them rushed to the emergency room in an upholstered chair tied to the back of a pick-up truck. These scenes from Steinbeck Country are full of humor, family drama, and a sweet frankness about serious questions: Who belongs to America and how are they treated? How does one learn decency when grown adults must fear for their lives and livelihoods? Gordo "announces a vibrant new voice on the literary scene, at once wise and authentic and supremely gifted" (Booklist, starred review). Finalist for the 2022 Lambda Literary Award for Gay Fiction Longlisted for the Andrew Carnegie Medal for Excellence in Fiction

Merchants of Death Helmuth Carol Engelbrecht, Frank Cleary Hanighen, 1937

Review of VA Clinical Guidance for the Health Conditions Identified by the Camp Lejeune Legislation Institute of Medicine, Committee on the Review of Clinical Guidance for the Care of Health Conditions Identified by the Camp Lejeune Legislation, Board on the Health of Select Populations, Committee On The Review Of Clinical Guid, 2015 U.S. Marine Corps Base Camp Lejeune, located in eastern North Carolina, is a large installation that covers 156,000 acres and is home at any given time to a population of about 170,000 active-duty personnel, family members, retirees, and civilian employees living on base or in the surrounding community. Between 1957 and 1987, the ground water at Camp Lejeune was inadvertently contaminated with chemicals, primarily industrial solvents that are now known to cause cancer and other health problems. In 1980, drinking water contaminants, primarily trichloroethylene (TCE) and perchloroethylene (PCE), as well as other solvents, were first detected at Camp Lejeune in treated drinking water. The contaminated wells were closed in 1987. In 1989, the U.S. Environmental Protection Agency placed Camp Lejeune on the National Priorities List, also known as Superfund. It is estimated that between 500,000 and 1,000,000 people may have used the contaminated

water and many of them continue to have concerns about the long-term effects that might result from that exposure. In 2012 Congress passed the Honoring America's Veterans and Caring for Camp Lejeune Families Act. The law provides health benefits to veterans and family members who have any of 15 health outcomes associated with exposure to TCE, PCE, or solvent mixtures. At the request of the Veteran's Administration, Review of the VA Guidance for the Health Conditions Identified by the Camp Lejeune Legislation reviews the latest scientific literature to ensure that the clinical guidance provided for the 15 covered medical conditions is scientifically sound. This report also describes the medical conditions that result from renal toxicity due to solvent exposures and characterizes neurobehavioral effects as mandated for coverage in the law.

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08
While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

The Last Mermaid Shana Abé, 2008-04-29 Shana Abé has entranced countless

readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of *The Secret Swan* delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell itself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That's what happens to Ruri Kell when she accepts Iain MacInnes's invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him. Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

Theoretical Optics Hartmann Römer, 2006-03-06 Starting from basic electrodynamics, this volume provides a solid, yet concise introduction to theoretical optics, containing topics such as nonlinear optics, light-matter interaction, and modern topics in quantum optics, including entanglement, cryptography, and quantum computation. The author, with many years of experience in teaching and research, goes way beyond the scope of traditional lectures, enabling readers to keep up with the current state of knowledge. Both content and presentation make it essential reading for graduate and PhD students as well as a valuable reference for researchers.

Mathematical Models of Fluid Dynamics Rainer Ansorge, 2006-03-06 This

introduction to the field contains a careful selection of topics and examples without sacrificing scientific strictness. The author guides readers through mathematical modelling, the theoretical treatment of the underlying physical laws and the construction and effective use of numerical procedures to describe the behaviour of the dynamics of physical flow. Both students and experts intending to control or predict the behavior of fluid flows by theoretical and computational fluid dynamics will benefit from the combination of all relevant aspects in one handy volume. The book consists of three main parts: - The design of mathematical models of physical fluid flow; - A theoretical treatment of the equations representing the model, as Navier-Stokes, Euler, and boundary layer equations, models of turbulence, in order to gain qualitative as well as quantitative insights into the processes of flow events; - The construction and effective use of numerical procedures in order to find quantitative descriptions of concrete physical or technical fluid flow situations. This is the first text of its kind to merge all these subjects so thoroughly.

IEEE Standard Test Interface Language (STIL) for Digital Test Vector Data, 1999 Standard Test Interface Language (STIL) provides an interface between digital test generation tools and test equipment. A test description language is defined that: (a) facilitates the transfer of digital test vector data from CAE to ATE environments; (b) specifies pattern, format, and timing information sufficient to define the application of digital test vectors to a

DUT; and (c) supports the volume of test vector data generated from structured tests.

Positive Lightning Laurie Salzler, 2014-12-15 Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and where least expected . . . no matter who's in its path.

With a lilting, rhyming text, colorful illustrations, and a recipe for baking your own sun bread, this tasty treat

from the illustrator of the best-selling *Abuela* is just right for all ages to enjoy.
