**A Toolkit for Self-service, Barrier-free Fare Collection** Multisystems, Inc, Transit Cooperative Research Program, 2002 TRB's Transit Cooperative Research Program (TCRP) Report 80: A Toolkit for Self-Service, Barrier-Free Fare Collection addresses the full range of issues and parameters-including policy and enforcement issues, operational issues, and capital and equipment issues-that an agency must consider in determining the applicability of self-service fare collection systems.

**Computer-Human Interaction** Seongil Lee, Hyunseung Choo, Sungdo Ha, In Chul Shin, 2008-07-04 Welcome to the proceedings of APCHI 2008, the 8th Asia-Pacific Conference on Computer-Human Interaction held in Seoul, Korea. Following the success of the preceding APCHI conferences, in Singapore (1996, 2000), Australia (1997), Japan (1998), China (2002), New Zealand (2004) and Taiwan (2006), the 8th APCHI brought together the researchers, developers, practitioners, and educators in the field of human-computer interaction. APCHI has been a major forum for scholars and practitioners in the Asia-Pacific region on the latest challenges and developments in HCI. Theoretical breakthroughs and practical systems and interfaces were presented at this 2008 conference, thanks to the support of KADO, the HCI ITRC of Sungkyu-wan University, and KIST. APCHI 2008 featured a comprehensive program including keynote speeches, regular paper presentations, poster, demos, and special panel sessions. To address the challenge of socially blending ubiquitous computing technologies and a wider spectrum of people with a variety of skills, knowledge, and capabilities, APCHI 2008 set "Universal and Ubiquitous" as the conference theme. APCHI 2008 attracted a total of 151 paper submissions. Among such a large number of submissions, 45 full papers were accepted as submitted or with minor revisions. All papers were reviewed by at least two reviewers. For the remaining submissions, 41 were recommended to change according to the reviews and were submitted as extended abstracts and posters. One special session with six invited papers was organized to support the conference theme of "Universal and Ubiquitous."

**Fencing for Conservation** Michael J. Somers, Matthew Hayward, 2011-11-23 The conflict between increasing human population and biodiversity conservation is one of the IUCN's key threatening processes. Conservation planning has received a great deal of coverage and research as a way of conserving biodiversity yet, while theoretically successful, it has never been tested. Simple lines on maps to illustrate conservation areas are unlikely to be successful in the light of human encroachment. It may be that some form of overt display is necessary to ensure the protection of reserves. This may be signage, presence of guards/rangers or physical fencing structures. The need for some form of barrier goes beyond restricting human access. The megafauna of Africa pose a genuine threat to human survival. In southern Africa, fences keep animals in and protect the abutting human population. Elsewhere, fencing is not considered important or viable. Where poverty is rife, it won't take much to tip the balance from beneficial conservation areas to troublesome repositories of crop-raiders, diseases and killers. Conversely, in New Zealand fences are used to keep animals out. Introduced species have decimated New Zealand's endemic birds, reptiles and invertebrates, and several sites have been entirely encapsulated in mouse-proof fencing to ensure their protection. Australia faces the same problems as New Zealand, however surrounds its national parks with cattle fences. Foxes and cats are free to enter and leave at will, resulting in rapid recolonisation following poisoning campaigns. How long will these poison campaigns work before tolerance, aversion or resistance evolves in the introduced predator populations?

**Mobile Human-Computer Interaction - Mobile HCI 2004** Stephen Brewster, Mark Dunlop, 2004-09-01 MobileHCI is a forum for academics and practitioners to discuss the challenges and potential solutions for effective human-computer interaction with mobile systems and services. It covers the design, evaluation and application of techniques and approaches for all mobile computing devices and services. MobileHCI 2004 was the sixth in the series of conferences that was started at Glasgow University in 1998 by Chris Johnson. We previously chaired the conference in 1999 in Edinburgh (as part of INTERACT 1999) and in 2001 in Lille (as part of IHM-HCI 2001). The last two years saw the conference move to Italy, first under the chairmanship of Fabio Paternò in Pisa then under Luca Chittaro in Udine. In 2005 the conference will move to Austria to be chaired by Manfred Tscheligi. Each year the conference has its own website hosted by the conference chair, however the address [www.mobilehci.org](http://www.mobilehci.org) will always point to the next (or current) conference. The number of submissions has increased every year. This year we received 79 full papers (63 were received last year) from which we accepted the best 25. We had 81 short papers and posters submitted (59 last year) and accepted 20 of these as short papers and 22 as posters. We received 9 workshop, 4 tutorial and 2 panel proposals, from which 5, 2 and 2, respectively, were accepted.

**The Unauthorized Guide to Pocket PC** Michael Morrison, 2001 The Unauthorized Guide to Pocket PC is the best place to start for someone seriously considering the purchase of a Pocket PC, or someone who has just made the purchase and is eager to hit the ground running and use it to its full potential. *Handhelds in Medicine* Scott M. Strayer, Peter L. Reynolds, Mark H. Ebell, 2005-11-25 Have you ever wanted to calculate the predicted peak flow for one of your asthmatic patients without spending valuable minutes searching for that confounded little slide rule gizmo? Wouldn't it be great if you could somehow remember all Mrs. Jones' medications when the nursing home calls to see if it's OK to treat her acutely elevated blood pressure with some atenolol? Handheld computers are emerging as the stethoscopes of the twenty-first century, and no clinician should be without this essential tool. These small, easy-to-use devices are now powerful enough to help clinicians manage information and make medical decisions at the point of

care. This comprehensive how-to guide targets all levels of handheld computer users, from novices to experts, and demonstrates how to make the most of handheld computers in any medical practice. Designed with easy-to-understand, hands-on exercises for each new skill presented, this book begins with choosing a handheld and getting to know your new device. It then progresses through downloading and installing software, using charge capture and e-prescription programs, Internet and evidence-based resources for your device, designing and programming your own programs, and going wireless. Written by three experienced family medicine clinicians, Handhelds in Medicine is designed to improve every day practice for any busy health professional. There are chapters written for and by nearly every health professional, including nurses, physician assistants and speech pathologists.
