Jurriaan Schrofer Frederike Huygen, 2013 The Dutch designer and polymath Jurriaan Schrofer (1926-1990) was one of the defining figures in European graphic design in the 1950s-70s. Working across all genres, from public relations brochures to interior design, and from magazines to advertising and alphabets, Schrofer is particularly regarded as a pioneer in the field of photo books and experimental typography. During the 1970s, he also became involved with government art policy and environmental art, and was an especially active force at the Association of Graphic Designers. The design historian Frederike Huygen describes his work as research into perception, visual effects and the optical illusion of perspective: or the interplay of letterform, pattern and meaning. This monograph tracks Schrofer's career through a set of thematic chapters: his public relations brochures for various corporations; the photo book designs; his work as a cultural ambassador; advertising design; interior design; art policy and education; typographic experiments; and his art works. This monograph provides a full survey of Schrofer's career.

Fotografiks Philip B. Meggs, 1999 A new expression of Carson's famously original way of seeing, 'fotografiks' are curiously fleeting images that seem to have been lifted out of their mundane context and abstracted to another realm. Anecdotal captions provide philosophic comments on the nature of the photographs, aspects of the page

design and observations on the process of assembling parts to form a whole. Possibly the most influential graphic designer working today, David Carson has been profiled by several of the world's leading publications including Newsweek and The New York Times, and has won an award from the International Center for Photography in New York for the best use of design with photography. He creates cutting edge advertising for a number of high profile clients including Nike, Microsoft, MTV, Jaguar, Ray-Ban and Sony. David Carson: Fotografiks will appeal to anyone interested in experiencing a fresh method of visual communication.

Free Innovation Eric Von Hippel,2024-04-30 A leading innovation scholar explains the growing phenomenon and impact of free innovation, in which innovations developed by consumers and given away "for free." In this book, Eric von Hippel, author

of the influential Democratizing Innovation, integrates new theory and research findings into the framework of a "free innovation paradigm." Free innovation, as he defines it, involves innovations developed by consumers who are self-rewarded for their efforts, and who give their designs away "for free." It is an inherently simple grassroots innovation process, unencumbered by compensated transactions and intellectual property rights. Free innovation is already widespread in national economies and is steadily increasing in both scale and scope. Today, tens of millions of consumers are collectively spending tens of billions of dollars annually on innovation development. However, because free innovations are developed during consumers' unpaid, discretionary time and are given away rather than sold, their collective impact and value have until very recently been hidden from view. This has caused researchers, governments, and firms to focus too much on the Schumpeterian idea of innovation as a producer-dominated activity. Free innovation has both advantages and drawbacks. Because free innovators are self-rewarded by such factors as personal utility, learning, and fun, they often pioneer new areas before producers see commercial potential. At the same time, because they give away their innovations, free innovators generally have very little incentive to invest in diffusing what they create, which reduces the social value of their efforts. The best solution, von Hippel and his colleagues argue, is a division of labor between free innovators and producers, enabling each to do what they do best. The result will be

both increased producer profits and increased social welfare—a gain for all.
