Technology for Learners with Autism Spectrum Disorders Demetria Loryn Ennis-Cole,2014-09-08 Technology for Learners with Autism Spectrum Disorders provides readers with an in-depth look at the characteristics of learners with ASD and explains how different forms of technology can be used to create learning opportunities for autistic students. The book is both academic and practical to appeal to multiple audiences: academicians, parents, teachers and therapists. Currently, there is scant literature speaking to the types of academic activities that should be developed and used to help children with ASD gain skills in academic areas: reading, writing, effective communication and mathematics. This book fills that void by including sample academic activities, explaining strategies for working with children diagnosed with ASD and examining ways a variety of technology tools can be used. All of the activities are visually appealing and they have been used with learners diagnosed with ASD.

Fotografiks Philip B. Meggs, 1999 A new expression of Carson's famously original way of seeing, 'fotografiks' are curiously fleeting images that seem to have been lifted out of their mundane context and abstracted to another realm. Anecdotal captions provide philosophic comments on the nature of the photographs, aspects of the page design and observations on the process of assembling parts to form a whole. Possibly the most influential graphic designer working today, David Carson has been profiled by several of the world's leading publications including Newsweek and The New York Times, and has won an award from the International Center for Photography in New York for the best use of design with photography. He creates cutting edge advertising for a number of high profile clients including Nike, Microsoft, MTV, Jaguar, Ray-Ban and Sony. David Carson: Fotografiks will appeal to anyone interested in experiencing a fresh method of visual communication.

Ancient Stories of the HODJA John E. Hillman, 2012-12-20 This book, and the next two volumes in the series, are perfect for reading to your children. I guarantee that you will find the experience highly enjoyable and your child will be left spellbound and hungry for more! All of the Hodja Stories have a little "twist" to them, an unexpected or thought provoking view of life. The stories themselves are ancient and have their roots in the Persian Empire of 2500 years ago. They are extremely popular in modern day Turkey and in the Middle East. There are some literal translations about but due to the complex language used they are difficult for young

children to appreciate and fully understand. In these books the stories have been re-written in a simple form that Primary age children can understand and relate to but without distorting or watering down the story elements, or essential meaning, in any way. The stories rely on careful thought process and the child’s application of lateral thinking to fully understand the hidden message within each story, Each volume contains carefully graded stories. The text for Volumes 2 and 3 has already been completed but I await illustrations drawn by the readers. It was great fun preparing the illustrations in Volume 1 but in later volumes I would like to include pictures drawn by the readers. Inside the volume are details of a competition which all readers are invited to enter. See the Competition page inside for full details! If their picture is chosen for inclusions in Volumes 2 or 3 they will win a free book containing their illustration, signed by the author! Email me at jhillman.hodja.stories@aol.com for further news and updates on the competition results and more books.
