The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

The Force-Free Dilemma Nicola Ferguson, 2024-03-01 Dog training methodology is an increasingly hotly-contested topic. A vocal number of trainers insist that dogs should be instructed through exclusively positive reinforcement, and that training should be totally force free. Utilizing social media, force-free training movement has grown into a lucrative, billion-dollar industry, but the consequences may outweigh the positives. This book examines the current state of dog training in order to determine ethical alternatives to force-free methods. Chapters cover the history of dog training, common myths, equipment, and the merits of balanced training methods that don't dogmatically avoid occasional force.

American War Cinema and Media since Vietnam Patricia Keeton, Peter Scheckner, 2013-08-28 No other cinematic genre more sharply illustrates the contradictions of American society - notions about social class, politics, and socio-economic ideology - than the war film. This book examines the latest cycle of war films to reveal how they mediate and negotiate the complexities of war, class, and a military-political mission largely gone bad.

imwe imba - the other room Munashe Wadzanai, Anne Schlechters, Thomas F. Andersson, 2022-11-01 Munashe is a bright adolescent girl living in Zimbabwe. She feels a pressure to leave Zimbabwe and to follow most of her peers to a university or to work in the West. However, she is not convinced that this is what she really wants. Via Thomas, an experienced European scientist and manager, initiating a technical Start-up Hub at her boarding school, Munashe comes in contact with Anne. *Imwe imba - the other room* - is a novel covering the last 2 high-school years of Munashe and Anne in letters between the young women as well as from Thomas to Simon, his now retired personal and business coach. Through the letters, Anne and Simon discover unknown and fascinating aspects of the (southern) African society. Especially, since Thomas includes stories from Nelson, Munashe's grandfather and small holder farmer. Based on the stories and hearing about Munashe's activities in more technical projects, Anne develops a critical attitude towards both the current Western school system and the effectiveness of traditional Western development or aid projects. On the other side, Munashe learns that Europe is not the land of milk and honey for everybody. Munashe and Anne, assisted by Thomas, review the so-called development work activities in emerging markets and propose a promising approach to economically uplift more rural areas. In part 2, the Start-up Hub activities are proven to be sustainable and Munashe asks where do we want to go? A design is made for a more ideal (global) society and the issues faced, implementing their ideas, are discussed. The letters in this novel cover a wide spectrum of topics: personal

struggles and contemplations, educational and business practices, science and art, geopolitics and historical backgrounds, change management as well as social developments. Each letter is written in an accessible language and underlined with references to allow the reader to explore more. Most of all, imwe imba wants to create awareness. Awareness for the wonderful, real life in Africa. Awareness that Africa is prosperity. Awareness that our younger generation is perfectly able to initiate change. That a single person can initiate change. That complaining or being upset about various (unacceptable) global happenings or actions is not enough. That a further polarisation and blaming the others doesn't help. That we have to do things. That we should not fear change but embrace the changes that are needed to come to the necessary improvements.

The Simulation Hypothesis Rizwan Virk, 2019-03-31 The Simulation Hypothesis, by best-selling author, renowned MIT computer scientist and Silicon Valley video game designer Rizwan Virk, is the first serious book to explain one of the most daring and consequential theories of our time. Riz is the Executive Director of Play Labs @ MIT, a video game startup incubator at the MIT Game Lab. Drawing from research and concepts from computer science, artificial intelligence, video games, quantum physics, and referencing both speculative fiction and ancient eastern spiritual texts, Virk shows how all of these traditions come together to point to the idea that we may be inside a simulated reality like the Matrix. The Simulation Hypothesis is the idea that our physical reality, far from being a solid physical universe, is part of an increasingly sophisticated video game-like simulation, where we all have multiple lives, consisting of pixels with its own internal clock run by some giant Artificial Intelligence. Simulation theory explains some of the biggest mysteries of quantum and relativistic physics, such as quantum indeterminacy, parallel universes, and the integral nature of the speed of light. Recently, the idea that we may be living in a giant video game has received a lot of attention: “There’s a one in a billion chance we are not living in a simulation” - Elon Musk “I find it hard to argue we are not in a simulation.” - Neil deGrasse Tyson “We are living in computer generated reality.” - Philip K. Dick Video game technology has developed from basic arcade and text adventures to MMORPGs. Video game designer Riz Virk shows how these games may continue to evolve in the future, including virtual reality, augmented reality, Artificial Intelligence, and quantum computing. This book shows how this evolution could lead us to the point of being able to develop all encompassing virtual worlds like the Oasis in Ready Player One, or the simulated reality in the Matrix. While the idea sounds like science fiction, many scientists, engineers, and professors have given the Simulation Hypothesis serious consideration. Futurist Ray Kurzweil has popularized the idea of downloading our consciousness into a silicon based device, which would mean we are just digital information after all. Some, like Oxford lecturer Nick Bostrom, goes further and thinks we may in fact be artificially intelligent consciousness inside such a simulation already! But the Simulation Hypothesis is not just a modern idea. Philosophers like Plato have been telling us that we live in a “cave” and can only see shadows of the real world. Mystics of all traditions have long contended that we are living in some kind of “illusion” and that there are other realities which we can access with our minds. While even Judeo-Christian traditions have this idea, Eastern traditions like Buddhism and Hinduism make this idea part of their core tradition — that we are inside a dream world (“Maya” or illusion, or Vishnu’s Dream), and we have “multiple lives” playing different characters when one dies, continuing to gain experience and “level up” after completing certain challenges. Sounds a lot like a video game! Whether you are a computer scientist, a fan of science fiction like the Matrix movies, a video game enthusiast, or a spiritual seeker, The Simulation Hypothesis touches on all these areas, and you will never look at the world the same way again!

the day feels too long. And in his place, he's left a substitute with a whole new set of rules that Clementine just can't figure out. The Bird Sisters Rebecca Rasmussen, 2011-11-22 In Spring Green, Wisconsin, spinster sisters Milly and Twiss have spent their lives listening to heartbeats and heartaches, nursing birds and the people who bring them back to health. Back in the summer of 1947, Milly and Twiss knew nothing about trying to mend what had been accidentally broken. Milly was known as a great beauty with emerald eyes and Twiss was a brazen wild child who never wore a dress or did what she was told. That was the summer their golf pro father had an accident that cost him both his swing and his charm, and their mother, the daughter of a wealthy jeweler, finally admitted that their hardscrabble lives wouldn't change. It was the summer their priest, Father Rice, announced that God didn't exist and ran off to Mexico, and a boy named Asa finally caught Milly's eye. Most unforgettably, it was also the summer their cousin Bett came down from a town called Deadwater and changed the course of their lives forever. Rebecca Rasmussen's masterful debut novel is full of hope and beauty, heartbreak and sacrifice, love and the power of sisterhood, offering wonderful surprises at every turn.

Migration Law and the Externalization of Border Controls Anna Liguori, 2019-03-27 Over the last few decades, both the European Union and European States have been implementing various strategies to externalize border controls with the declared intent of saving human lives and countering smuggling but with the actual end result of shifting borders, circumventing international obligations and ultimately preventing access to Europe. What has been principally deplored is the fact that externalizing border controls risks creating 'legal black holes'. Furthermore, what is particularly worrying in the current European debate is the intensification of this practice by multiple arrangements with unsafe third countries, exposing migrants and asylum seekers to serious human rights violations. This book explores whether European States can succeed in shifting their responsibility onto Third States in cases of human rights violations. Focusing, in particular, on the 2017 Italy-Libya Memorandum of Understanding, the book investigates the possible basis for triggering the responsibility of outsourcing States. The second part of the book examines how the Italy-Libya MoU is only a small part of a broader scenario, exploring EU policies of externalization. A brief overview of the recent decisions of the EU Court vis-à-vis two aspects of externalization (the EU-Turkey statement and the issue of humanitarian visas) will pave the way for the conclusions since, in the author's view, the current attitude of the Luxembourg Court confirms the importance of focusing on the responsibility of European States and the urgent need to investigate the possibility of bringing a claim against the outsourcing States before the Court of Strasbourg. Offering a new perspective on an extremely topical subject, this book will appeal to students, scholars and practitioners with an interest in European Law, International Law, Migration and Human Rights.

Business Model Transformation Danny Samson, Alon Ellis, Stuart Black, 2022-09-22 A large opportunity exists for Australian organisations to use new and powerful technologies (Artificial intelligence [AI] and Cloud technologies) to transform their businesses to keep pace with or ahead of the leading edge of competitiveness. This book showcases inspirational Australian case studies in order to inspire Australian (and non-Australian) organisations to undertake the challenge. This book synthesises the key learnings and contrasts those with the conventional wisdom on this topic. The book also defines what AI- and Cloud-based business transformations are and what they can do for businesses. Furthermore, it explains why it is imperative that businesses should address the business opportunities of these technological advancements, without going into the technical details any more than the 'literacy' that is necessary for business leaders. Finally, it also includes international best practice case studies beyond the usual suspects. This book provides guidance and motivation for business executives, managers and students interested in innovating and transforming their businesses through the use of the two critical new technologies.
