**Googling Security** Greg Conti,2008-10-10 What Does Google Know about You? And Who Are They Telling? When you use Google's "free" services, you pay, big time–with personal information about yourself. Google is making a fortune on what it knows about you...and you may be shocked by just how much Google does know. Googling Security is the first book to reveal how Google's vast information stockpiles could be used against you or your business–and what you can do to protect yourself. Unlike other books on Google hacking, this book covers information you disclose when using all of Google's top applications, not just what savvy users can retrieve via Google's search results. West Point computer science professor Greg Conti reveals the privacy implications of Gmail, Google Maps, Google Talk, Google Groups, Google Alerts, Google's new mobile applications, and more. Drawing on his own advanced security research, Conti shows how Google's databases can be used by others with bad intent, even if Google succeeds in its pledge of "don't be evil." Uncover the trail of informational "bread crumbs" you leave when you use Google search How Gmail could be used to track your personal network of friends, family, and acquaintances How Google's map and location tools could disclose the locations of your home, employer, family and friends, travel plans, and intentions How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared, or subpoenaed and later used for identity theft or even blackmail How the Google AdSense and DoubleClick advertising services could track you around the Web How to systematically reduce the personal information you expose or give away This book is a wake-up call and a "how-to" self-defense manual: an indispensable resource for everyone, from private citizens to security professionals, who relies on Google. *Identity and Privacy in the Internet Age* Audun Jøsang,Torleiv Maseng,Svein J. Knapskog,2009-09-30 The NordSec workshops were started in 1996 with the aim of bringing together - searchers and practitioners within computer security in the Nordic countries – thereby establishing a forum for discussions and co-operation between universities, industry and computer societies. Since then, the workshop has developed into a fully fledged inter- tional information security conference, held in the Nordic countries on a round robin basis. The 14th Nordic Conference on Secure IT Systems was held in Oslo on 14-16 October 2009. Under the theme Identity and Privacy in the Internet Age, this year's conference explored policies, strategies and technologies for protecting identities and the growing flow of personal information passing through the Internet and mobile n- works under an increasingly serious threat picture. Among the contemporary security issues discussed were security services modeling, Petri nets, attack graphs, electronic voting schemes, anonymous payment schemes, mobile ID-protocols, SIM cards, n- work embedded systems, trust, wireless sensor networks, privacy, privacy disclosure regulations, financial cryptography, PIN verification, temporal access control, random number generators, and some more. As a pre-cursor to the conference proper, the Nordic Security Day on Wednesday 14 October hosted talks by leading representatives from industry, academia and the g- ernment sector, and a press conference was given.

Cult of the Dead Cow Joseph Menn,2019-06-04 The shocking untold story of the elite secret society of hackers fighting to protect our privacy, our freedom -- even democracy itself Cult of the Dead Cow is the tale of the oldest, most respected, and most famous American hacking group of all time. Though until now it has remained mostly anonymous, its members invented the concept of hacktivism, released the top tool for testing password security, and created what was for years the best technique for controlling computers from afar, forcing giant companies to work harder to protect customers. They contributed to the development of Tor, the most important privacy tool on the net, and helped build cyberweapons that advanced US security without injuring anyone. With its origins in the earliest days of the Internet, the cDc is full of oddball characters -- activists, artists, even future politicians. Many of these hackers have become top executives and advisors walking the corridors of power in Washington and Silicon Valley. The most famous is former Texas Congressman and current presidential candidate Beto O'Rourke, whose time in the cDc set him up to found a tech business, launch an alternative publication in El Paso, and make long-shot bets on unconventional campaigns. Today, the group and its followers are battling electoral misinformation, making personal data safer, and battling to keep technology a force for good instead of for surveillance and oppression. Cult of the Dead Cow shows how governments, corporations, and criminals came to hold immense power over individuals and how we can fight back against them.

**Burn It Down!** Breanne Fahs,2024-02-27 A must-read, an antidote to powerlessness, a literary companion for the ages. –Michelle Tea, author of Against Memoir Editors' Choice –New York Times Book Review A comprehensive collection of feminist manifestos, chronicling rage and dreams from the nineteenth century to the present day A landmark collection spanning two centuries and four waves of feminist activism and writing, Burn It Down! is a testament to what is possible when women are driven to the edge. The manifesto—raging, demanding, quarreling and provocative—has always been central to feminism, and it's the angry, brash feminism we need now. Collecting over seventy-five manifestos from around the world, Burn It Down! is a rallying cry and a call to action. Among this confrontational sisterhood, you'll find the Dyke Manifesto by the Lesbian Avengers, The Ax Tampax Poem Feministo by the Bloodsisters Project, The Manifesto of Apocalyptic Witchcraft by Peter Grey, Simone de Beauvoir's pro-abortion Manifesto of the 343, Double Jeopardy: To Be Black and Female by Frances M. Beal, and many more. Feminist academic and writer Breanne Fahs argues that we need manifestos in all their urgent rawness, for it is at the bleeding edge of rage and defiance that new ideas are born.

**Lessons from the Identity Trail** Ian Kerr,Carole Lucock,Valerie Steeves,2009-03-18 During the past decade, rapid developments in information and communications technology have transformed key social, commercial and political realities. Within that same time period, working at something less

than internet speed, much of the academic and policy debates arising from these new and emerging technologies have been fragmented. There have been few examples of interdisciplinary dialogue about the potential for anonymity and privacy in a networked society. Lessons from the Identity Trail fills that gap, and examines key questions about anonymity, privacy and identity in an environment that increasingly automates the collection of personal information and uses surveillance to reduce corporate and security risks. This project has been informed by the results of a multi-million dollar research project that has brought together a distinguished array of philosophers, ethicists, feminists, cognitive scientists, lawyers, cryptographers, engineers, policy analysts, government policy makers and privacy experts. Working collaboratively over a four-year period and participating in an iterative process designed to maximize the potential for interdisciplinary discussion and feedback through a series of workshops and peer review, the authors have integrated crucial public policy themes with the most recent research outcomes.

Beginning with a history of media, the book explores the nature and effects of technomedia like the blogosphere, Blackberries and related technologies. Because they are transforming the relations of their users to the social environment, the topic is fast becoming an important focus of modern social theory.

Ciberactivismo Yolanda Quintana,Mario Tascón,2018-03-22 Se extiende por el mundo una nueva forma de activismo social. En los últimos años hemos presenciado las revueltas árabes, las filtraciones de secretos de las embajadas de EE UU y los gobiernos de todo el mundo a través de Wikileaks, las acciones del colectivo de ciberatacantes Anonymous contra compañías como Visa o Amazon o la campaña electoral basada en redes sociales que llevó a Obama a la presidencia de Estados Unidos. Con la popularización de las redes sociales la gente tiene a su alcance unas poderosas herramientas para protestar contra los gobiernos, los políticos o las grandes empresas. Lo que hasta hace escasos años era privilegio de los pocos expertos que manejaban Internet, se está democratizando con las nuevas herramientas y la simplificación de la capacidad de emitir mensajes y relacionarse rápidamente con otras personas, sin importar la edad, el sexo, la religión o el lugar del mundo en el que se encuentran. Cualquiera puede ser un cabecilla o puede apoyar con facilidad un movimiento, la difusión de una idea que comparta o con la que no esté de acuerdo. Mientras, los poderes clásicos asisten con estupefacción a un mundo en el que el "control" sobre los clientes, lectores, espectadores y trabajadores se les escapa de las manos.
