The Crisis in Pro Baseball and Japan's Lost Decade Paul Dunscomb, 2023-10-27 This book examines Japan's Heisei era through the lens of the crisis in Japanese professional baseball of 2004, challenging the narrative of decline which dominates the discourse on the period. The story of this crisis reveals much about the Japanese psyche during the "Lost Decade," about the nature of change during Heisei Japan and of the nation's resilience. The business of professional baseball provides crucial insights as it achieved its basic form at the same time as Japan's post-war political economy, and shared many characteristics with it, including systemic inefficiencies which post "bubble" Japan could no longer sustain. The book traces how the crisis unfolded and the cast of characters who appeared during it (including team owners, players, IT entrepreneurs, and ordinary fans) revealing much about the push and pull of continuity and change in Japan. Featuring an in-depth analysis of the key participants and developments of the crisis in baseball this book will be a valuable resource for students and scholars of sports management, Japanese history, and Japanese culture, particularly of the Heisei era.

Knowledge Sharing in Chinese Hospitals Lihong Zhou, José Miguel Baptista Nunes, 2015-01-05 This book aims to identify, understand and qualify

barriers to the patient-centred knowledge sharing (KS) in interprofessional practice of Traditional Chinese Medicine (TCM) and Western Medicine (WM) healthcare professionals in Chinese hospitals. This collaboration is particularly crucial and unique to China since, contrary to Western practice, these two types of professionals actually work together complimentary in the same hospital. This study adopted a Grounded Theory approach as the overarching methodology to guide the analysis of the data collected in a single case-study design. A public hospital in central China was selected as the case-study site, at which 49 informants were interviewed by using semi-structured and evolving interview scripts. The research findings point to five categories of KS barriers: contextual influences, hospital management, philosophical divergence, Chinese healthcare education and interprofessional training. Further conceptualising the research findings, it is identified that KS is mostly prevented by philosophical and professional tensions between the two medical communities. Therefore, to improve KS and reduce the effects of the identified barriers, efforts should be made targeted at resolving both types of tensions. The conclusion advocates the establishment of national policies and hospital management strategies aimed at maintaining equality of the two medical communities and putting in place an interprofessional common ground to encourage and facilitate communication and KS.

Knowledge Sharing in Professions Alexander Styhre,2016-04-22 No professional is an island. Despite their capacity to monopolize and erect entry barriers in terms of either formal credentials or membership of certain organizations, professionalism is inextricably bound up with collective accomplishments on a day-to-day basis and the capacity to share all the resources that constitute the professional domain of expertise. Knowledge Sharing in Professions looks at professionalism as a form of systematic and institutionalized knowledge sharing. It analyses professionalism through the everyday practices in professional communities and the organizations where they work. Three empirical studies, of pharmaceutical clinical trials researchers, management consultants, and architects, are presented, serving to illustrate the relational nature of these and other professions, and how members of professional communities are constantly exchanging data, information, and know-how in their everyday work. Alexander Styhre seeks to understand the role of professions and other forms of experts in contemporary society on the basis of complementary perspectives, that is to say, the communal and collegial nature of professional work. This book represents a valuable contribution both to the sociological literature on professions and the business orientated literature on knowledge management and should promote further new research on professionalism.
