**Studies in Aramaic Poetry (c. 100 B.C.E.-c. 600 C.E.)** Rodrigues Pereira,2018-07-17 The paucity of material, which has limited the study of Aramaic for too long, is gradually being alleviated. An ever growing body of well-edited texts is being made available to the scholarly world. These publications have provoked a number of important and penetrating linguistical and grammatical studies. Generally, however, corresponding literary studies of these texts are still lacking. The present work is an attempt to add a literary approach to the earlier analyses. The study deals with Aramaic poetry of the period between c. 100 B.C.E. and c. 600 C.E. The discussion of the textual material is organized in a number of levels, one superimposed upon the other. The basis is formed by a close exegetical and literary reading of the poems to elucidate essential elements of content, style and form. Particular attention is paid to structure and composition as a function of the content of the poems, and to the use made by the poets of stylistic devices as structural elements.

*Public Service Management and Employment Relations in Europe* Stephen Bach,Lorenzo Bordogna,2016-07-07 Has there been a transformation of public service employment relations in Europe since the crisis? Public Service Management and Employment Relations in Europe examines public service employment relations after the economic crisis, including analysis of more than thirty years of public service and workforce reform, and addresses the interplay between an emerging post-crisis public service sector and the consequences for the state, employers and trade unions in core public services. Written by leading national experts, this book places the economic crisis in a longer timeframe and examines how far trends in public sector employment relations were reinforced or reversed by the crisis. It provides an up-to-date analysis of the restructuring of public service employment relations in 12 major European countries, including analysis of little studied central and Eastern European countries. This book will be vital reading for researchers, academics and PhD Students in the fields of Public Management, Public Administration, Employment Relations, and Human Resource Management.

**Routledge Handbook of European Welfare Systems** Sonja Blum,Johanna Kuhlmann,Klaus Schubert,2019-11-21 Published ten years after the first edition, this new Handbook offers topical, and comprehensive information on the welfare systems of all 28 EU member states and their recent reforms, giving the reader an invaluable introduction and basis for comparative welfare research. Additional chapters provide detailed information on EU social policy, as well as comparative analyses of European welfare systems and their reform pathways. For this second edition, all chapters have been updated and substantially revised, and Croatia additionally included. The second edition of this Handbook is most timely, given the often-fundamental welfare state transformations against the background of the financial and economic crises, transforming social policy ideas, as well as political shifts in a number of European countries. The book sets out to analyse these new developments when it comes to social policy. In the first part, all country chapters provide systematic and comparable information on the foundations of the different national welfare systems and their characteristics. In the second part, using a joint conceptual foundation, they focus on policy changes (especially of the last two decades) in different social policy areas, including old-age, labour market, family, healthcare, and social assistance policies. As the comparative chapters conclude, European welfare system landscapes have been in constant motion in the last two decades. While austerity is not to be seen on the aggregate level, the in-depth country studies show that all policy sectors have been characterised by different reform directions and ideas. The findings not only reveal both change and continuity, but also policy reversal as a distinct type that characterises social policy reform. The book provides a rich resource to the international welfare state research community, and is also useful for social policy teaching.

Global Women's Work Beth English,Mary E. Frederickson,Olga Sanmiguel-Valderrama,2018-12-07 This volume considers how women are shaping the global economic landscape through their labor, activism, and multiple discourses about work. Bringing together an interdisciplinary group of international scholars, the book offers a gendered examination of work in the global economy and analyses the effects of the 2008 downturn on women's labor force participation and workplace activism. The book addresses three key themes: exploitation versus opportunity; women's agency within the context of changing economic options; and women's negotiations and renegotiations of unpaid social reproductive labor. This uniquely interdisciplinary and comparative analysis will be crucial reading for anyone with an interest in gender and the post-crisis world.

Comparative Analysis of ICT in Education Between China and Central and Eastern European Countries Dejian Liu,Ronghuai Huang,Bojan Lalic,Haijun Zeng,Nikola Zivlak,2020-09-18 This book presents the status quo of Information and Communication Technology (ICT) in Education, with a focus on China and the 17 Central and Eastern European Countries (CEECs), including Albania, Bosnia and Herzegovina, Bulgaria, Croatia, the Czech Republic, Estonia, Greece, Hungary, Latvia, Lithuania, Macedonia, Montenegro, Poland, Romania, Serbia, Slovakia and Slovenia (the "17+1" cooperation mechanism, as an incubator for pragmatic trans-regions cooperation platform, created by China and the 17 CEECs). With recent advances in ICT in China and the CEECs, it has assumed increasingly important roles in education, including the improvement of the quality of teaching and learning, as well as the promotion of equity in education. The significant contribution of ICT in education is an enabler to achieving the goals of the "17+1 cooperation" mechanism between China and the CEECs, which has attracted considerable attention worldwide, given fresh impetus to cooperation between the two parties, and opened a new chapter in China-CEEC cooperation. The contributors, all of whom hail from these 18 countries, describe the state-of-the-art of ICT in education in their respective country, and focus on three major aspects, namely: the country profile, general status of education development, and ICT in education. In turn, leading experts in educational informatization research compare the situations in different countries. Taken together, the papers offer valuable insights for policymakers and educators on how to integrate ICT into educational processes, and on inter-regional cooperation with regard to ICT in education.

**Old-Age Provision and Homeownership - Fiscal Incentives and Other Public Policy Options** Martina Eckardt,Jörg Dötsch,Stefan Okruch,2018-05-10 In light of demographic change and the growing problems of traditional old-age security systems, this book discusses two essential instruments in connection with privately providing for old-age security: (1) savings in private pension schemes and (2) building up equity for homeownership. Further, it assesses the relationship between the two instruments and offers a unique overview of the latest market developments. In order to represent the profound differences between the individual member states of the EU, this book features six country-specific studies – covering Germany, Hungary, Ireland, Italy, the Netherlands and the United Kingdom – that provide detailed insights into the complexity of local private pension schemes, mortgage markets, and housing markets. Lastly, the book discusses public policies and fiscal incentives intended to better integrate residential property with private pensions. It will appeal to both, private households seeking to build up old-age security, as well as policy makers interested in providing secure pension schemes.

**The Praeger International Handbook of Special Education** Michael L. Wehmeyer,James R. Patton,2017-06-15 This handbook provides a concise overview of special education services in countries across the world, using the Article on Education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. The Praeger International Handbook of Special Education presents a concise and clear overview of special education services in more than 70 countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with disabilities as the analytical frame. Each chapter offers information about the country in general, followed by sections on the public education system, the private education system, the special education system, teacher training requirements, and barriers to and promising trends in inclusive and special education. The volumes and chapters are organized by the United Nations Geoscheme, with Volume 1 including an overview of the volumes and chapters on countries in the Americas, Volume 2 addressing countries from Europe and Africa, and Volume 3 focusing on countries in Asia and Oceania. This is the most complete exploration of the delivery of supports and services to children and youth with disabilities across the globe available. The volumes do not compare among or between countries, but rather provide a baseline for understanding current special education practices and their relationship with general education and inclusive practices across the globe. Readers will come away with an in-depth understanding of what is happening with regard to the implementation of special education services and Article 24 of the Convention for the Rights of People with Disabilities. This valuable reference set serves researchers, graduate students, and policymakers in special and general education as well as professionals focused on issues of education worldwide and scholars focused on international special education. As such, this handbook will be an important reference source for university libraries, professional associations, and policy entities.

*Combining Modern Communication Methods With Heritage Education* Bassa, Lia,2023-03-21 Cultural heritage has tremendous importance in human development. The communication of culture is determinant for society, whereas that of heritage can be a driving force for individual development. If cultural heritage is communicated and incorporated into the educational development of children from the very beginning, it will contribute to the formation of their entire lives and sustainable social development. Combining Modern Communication Methods With Heritage Education provides relevant theoretical frameworks and the latest empirical research findings in the area. It shows that heritage related to information provision is to be started at a very early age and continued by schools and later educational forms. Covering topics such as cultural heritage, world heritage education, and indigenous archives, this premier reference work is an essential resource for educators and administrators of both K-12 and higher education, pre-service teachers, teacher educators, sociologists, anthropologists, business leaders and executives, marketers, librarians, researchers, and academicians.

The XFT Quadrature in Discrete Fourier Analysis Rafael G. Campos,2019-05-24 This book has two main objectives, the first of which is to extend the power of numerical Fourier analysis and to show by means of theoretical examples and numerous concrete applications that when computing discrete Fourier transforms of periodic and non periodic functions, the usual kernel matrix of the Fourier transform, the discrete Fourier transform (DFT), should be replaced by another kernel matrix, the eXtended Fourier transform (XFT), since the XFT matrix appears as a convergent quadrature of a more general transform, the fractional Fourier transform. In turn, the book's second goal is to present the XFT matrix as a finite-dimensional transformation that links certain discrete operators in the same way that the corresponding continuous operators are related by the Fourier transform, and to show that the XFT matrix accordingly generates sequences of matrix operators that represent continuum operators, and which allow these operators to be studied from another perspective.

*Tainted Democracy* Zsuzsanna Szelényi,2022-11-21 Hungary, once the poster-child of liberal democracy, is fast becoming an autocracy under Viktor Orbán. After winning an absolute majority in 2010, Orbán launched a series of 'reforms', fundamentally undermining the country's twenty-year, post-Cold War liberal consensus. For supporters and foes alike, the rise and rise of Hungary's prime minister is a vivid example of how democracy can be subverted from within. Zsuzsanna Szelényi, a leading member of Orbán's Fidesz in its early years, has witnessed first-hand the party's shift from liberalism to populist nationalism. Offering an insider's account of Fidesz's evolution since its creation, she explains how the party rose to leadership of the country under Orbán and made sweeping legal, political and economic changes to solidify its grip on power—from reining in the public media to slashing the number of parliamentary seats. She answers a key question: why has Orbán been so successful, winning widespread support within Hungary and wielding considerable influence in European politics? And how can Hungary's opposition party Together, which she co-founded in 2014, work to turn the country around? Underpinned by Szelényi's own experiences at the heart of Hungarian politics, Tainted Democracy offers accessible, nuanced insights into the global rise of populist autocracy—and how it can be challenged.
