**The Ascension of the Messiah in Lukan Christology** Arie W. Zwiep,2014-04-09 Building on the form-critical assessment of the Lukan ascension story (LK 24:50-53; Acts 1:1-12) as a rapture story, and motivated by the consideration that the 'monotheistic principle' almost inevitably must have led to a reestimate of the meaning and function of rapture in comparison with heathen rapture stories (immortalisation and deification!), the present study seeks to investigate the Lukan ascension story in the light of the first-century Jewish rapture traditions (Enoch, Elijah, Moses, Baruch, Ezra, etc.). The author argues that first-century Judaism provides a more plausible horizon of understanding for the ascension story than the Graeco-Roman rapture tradition, and that Luke develops his 'rapture christology' not as a reinterpretation of the primitive exaltation kerygma (G. Lohfink), but as a response to the eschatological question, i.e. the delay of the parousia, so as to secure the unity of salvation history.

Jewels Of Stringology: Text Algorithms Maxime Crochemore,Wojciech Rytter,2002-09-16 The term “stringology” is a popular nickname for text algorithms, or algorithms on strings. This book deals with the most basic algorithms in the area. Most of them can be viewed as “algorithmic jewels” and deserve reader-friendly presentation. One of the main aims of the book is to present several of the most celebrated algorithms in a simple way by omitting obscuring details and separating algorithmic structure from combinatorial theoretical background. The book reflects the relationships between applications of text-algorithmic techniques and the classification of algorithms according to the measures of complexity considered. The text can be viewed as a parade of algorithms in which the main purpose is to discuss the foundations of the algorithms and their interconnections. One can partition the algorithmic problems discussed into practical and theoretical problems. Certainly, string matching and data compression are in the former class, while most problems related to symmetries and repetitions in texts are in the latter. However, all the problems are interesting from an algorithmic point of view and enable the reader to appreciate the importance of combinatorics on words as a tool in the design of efficient text algorithms. In most textbooks on algorithms and data structures, the presentation of efficient algorithms on words is quite short as compared to issues in graph theory, sorting, searching, and some other areas. At the same time, there are many presentations of interesting algorithms on words accessible only in journals and in a form directed mainly at specialists. This book fills the gap in the book literature on algorithms on words, and brings

together the many results presently dispersed in the masses of journal articles. The presentation is reader-friendly; many examples and about two hundred figures illustrate nicely the behaviour of otherwise very complex algorithms.

*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The New Calvinists E. S. Williams,2014-03-01 Enmity between the church and the world dates from the Fall of man, so God says in Genesis 3.15. Satan's major strategy is the overthrow of the church by the world, through infiltration and contamination. But seldom has this battle reached the proportions of this present hour, when worldliness threatens every believer and church. And so subtle is the enemy that fatal compromise now comes with an appearance of sound doctrine - in an apparent resurgence of the very best of Reformation and Puritan teaching. This book reveals the new 'gospel' of the so-called 'new Calvinism'. It is a gospel that changes the terms of salvation, and that loves the world and embraces its culture. Here are the objectives of the new Calvinists, taken from their own words. - Dr Peter Masters, Metropolitan Tabernacle

**Hieroglyphic Egyptian** Daniel L. Selden,2013-02-05 This book offers a comprehensive, self-contained introduction to one of the oldest known recorded languages—Hieroglyphic Egyptian. Unlike other approaches, it is geared toward learning to read one of the masterpieces of Middle Egyptian literature, the story “Shipwrecked Sailor,” written around 2200 bce. The text’s eighteen lessons—organized around such topics as the body, flora, fauna, titles, administration, religion, sexuality, and warfare—cover all the basic grammar and syntax of Middle Egyptian. The book includes exercises for each chapter, sign lists, Egyptian/English and English/Egyptian dictionaries defining all the words and phrases used in the lessons, and a new edition of the tale “Shipwrecked Sailor” with facing commentary. Although the overall approach is literary, Hieroglyphic Egyptian can also be used as an introduction

to reading other material, such as biographical inscriptions, religious texts, historical annals, and mathematical or medical papyri. The text is suitable for classroom use, as well as for those who want to learn independently.

**Luke** Darrell L. Bock, 2009-08-19 The NIV Application Commentary helps you communicate and apply biblical text effectively in today's context. To bring the ancient messages of the Bible into today's world, each passage is treated in three sections: Original Meaning. Concise exegesis to help readers understand the original meaning of the biblical text in its historical, literary, and cultural context. Bridging Contexts. A bridge between the world of the Bible and the world of today, built by discerning what is timeless in the timely pages of the Bible. Contemporary Significance. This section identifies comparable situations to those faced in the Bible and explores relevant application of the biblical messages. The author alerts the readers of problems they may encounter when seeking to apply the passage and helps them think through the issues involved. This unique, award-winning commentary is the ideal resource for today's preachers, teachers, and serious students of the Bible, giving them the tools, ideas, and insights they need to communicate God's Word with the same powerful impact it had when it was first written.

**Matthew 14-28, Volume 33B** Donald A. Hagner, 2018-04-24 The Word Biblical Commentary delivers the best in biblical scholarship, from the leading scholars of our day who share a commitment to Scripture as divine revelation. This series emphasizes a thorough analysis of textual, linguistic, structural, and theological evidence. The result is judicious and balanced insight into the meanings of the text in the framework of biblical theology. These widely acclaimed commentaries serve as exceptional resources for the professional theologian and instructor, the seminary or university student, the working minister, and everyone concerned with building theological understanding from a solid base of biblical scholarship. Overview of Commentary Organization Introduction—covers issues pertaining to the whole book, including context, date, authorship, composition, interpretive issues, purpose, and theology. Each section of the commentary includes: Pericope Bibliography—a helpful resource containing the most important works that pertain to each particular pericope. Translation—the author's own translation of the biblical text, reflecting the end result of exegesis and attending to Hebrew and Greek idiomatic usage of words, phrases, and tenses, yet in reasonably good English. Notes—the author's notes to the translation that address any textual variants, grammatical forms, syntactical constructions, basic meanings of words, and problems of translation. Form/Structure/Setting—a discussion of redaction, genre, sources, and tradition as they concern the origin of the pericope, its canonical form, and its relation to the biblical and extra-biblical contexts in order to illuminate the structure and character of the pericope. Rhetorical or compositional features important to understanding the passage are also introduced here. Comment—verse-by-verse interpretation of the text and dialogue with other interpreters, engaging with current opinion and scholarly research. Explanation—brings together all the results of the discussion in previous sections to expose the meaning and intention of the text at several levels: (1) within the context of the book itself; (2) its meaning in the OT or NT; (3) its place in the entire canon; (4) theological relevance to broader OT or NT issues. General Bibliography—occurring at the end of each volume, this extensive bibliography contains all sources used anywhere in the commentary.

Problems in Distributions and Partial Differential Equations C. Zuily, 1988-04-01 The aim of this book is to provide a comprehensive introduction to the theory of distributions, by the use of solved problems. Although written for mathematicians, it can also be used by a wider audience, including engineers and physicists. The first six chapters deal with the classical theory, with special emphasis on the concrete aspects. The reader will find many examples of distributions and learn how to work with them. At the beginning of each chapter the relevant theoretical material is briefly recalled. The last chapter is a short introduction to a very wide and important field in analysis which can be considered as the most natural application of distributions, namely the theory of partial differential equations. It includes exercises on the classical differential operators and on fundamental solutions, hypoellipticity, analytic hypoellipticity, Sobolev spaces, local solvability, the Cauchy problem, etc.
