**Visualizing Data** Ben Fry, 2008 Provides information on the methods of visualizing data on the Web, along with example projects and code.

**Beginning Dreamweaver MX** Charles E. Brown, Imar Spaanjaars, Todd Marks, 2003-02-10 What is this book about? With this book you'll quickly be creating powerful, dynamic web sites with Dreamweaver MX - the latest version of Macromedia's powerful, integrated web development and editing tool. You'll learn how to use the tools and features of Dreamweaver to construct three complete sites using HTML, JavaScript, Active Server Pages (ASP), and databases. We start by creating a hobbyist site - The Cooking Place - that you can use to list your favorite recipes, ingredients, and dishes. What does this book cover? As you build this site you'll learn how to use Dreamweaver MX to Plan, create, and set up a web site Add web pages to the site and edit their content Use Stylesheets and templates to create a consistent style across the site Use tables, frames, and layers to lay out web pages Add dynamic effects - like drop down menus - to web pages using JavaScript and DHTML Interact with users via forms on web pages Create dynamic ASP web pages to respond to user actions and input As you progress through the book, the sites you create become ever more ambitious. The second site you build is a fan site for soccer that provides information on upcoming events for fans around the world. As you build the second site you'll learn how to use Dreamweaver MX to: Add logic to your ASP pages, so that you can display different information to

different users, based on their location, or even the time of day Keep track of users as they move around the site, so that you can learn what parts of your site are the most popular Secure parts of the web site so that only authorized users are allowed to see sensitive information Personalize the web site for individual users - so that the site appears in the colors of the user's favorite team or so that the user only sees events in their home country Store and extract information about users and upcoming events in a database - and use this information to dynamically create web pages The final site in the book shows off many of the advanced features of Dreamweaver MX, as you walk through how to design a modular, extensible, and scalable site, and create a set of dynamic building blocks that can be quickly modified and reused in different sites. As you build this site - which is used to display a set of images that users can view and purchase - you'll learn how to use Dreamweaver MX to: Create a set of building blocks whose look and content is determined dynamically by the settings in a database Create a content management page that you can use to manage the database that stores information about the images on the site, including their title, price, and how they should be laid out Put the building blocks you created earlier to a variety of uses, including a news blogger, a media display, and a product display Use Dreamweaver Extensions to make our building blocks easy to reuse and to add e-commerce functionality to the site At the end of some of the chapters you'll find a series of suggested exercises from the author that are

designed to test your understanding of what's been covered in the chapter as well as to encourage you to experiment with the features of Dreamweaver MX and to modify and extend the example applications. Who is this book for? This book is primarily for complete beginners to web site programming who have access to Dreamweaver MX and want to learn how to create dynamic web sites with it. But the book doubles as a comprehensive reference to the features of Dreamweaver MX, so it will also be a useful resource to more experienced web developers who want to learn how to use the latest version of Dreamweaver. As you work through the book, you'll learn how to program using Active Server Pages (ASP), but this will prove useful even if you eventually want to use Dreamweaver MX to create web sites with JavaServer Pages (JSP), ASP.NET, PHP, or ColdFusion MX. Programming in any of these languages is very similar in Dreamweaver MX, and the core concepts you learn in building web sites with ASP are applicable and easily transferred to other languages. To help, the book includes four appendices that provide fast paced guides on how to get started using JSP, ASP.NET, PHP, and ColdFusion MX with Dreamweaver MX. What do you need to use this book? To run the examples in this book on your computer you'll need: Dreamweaver MX Microsoft Windows 98, 98SE, 2000 or XP Professional If you don't have a copy of Dreamweaver MX you can download a 30-day evaluation edition from Macromedia at [http://www.macromedia.com/software/trial\\_download/](http://www.macromedia.com/software/trial_download/). The evaluation edition is fully-featured, and you'll be able to use it to work through all the

examples in the book. If you have Microsoft Windows Me, Windows XP Home Edition, or a Macintosh you'll still be able to create all the examples in the book but to see them in action you'll need to use a remote server, as your operating system doesn't, by default, include a web server that can process ASP pages. Fortunately, getting access to an ASP web host is easy -- there are dozens available. And to make things even easier, the book includes detailed information on how to set up a web application to use a remote server or web host.

*Geographic Information Systems in Fisheries Management and Planning* Gertjan de Graaf, 2003 Many fishery biologists and policy makers involved in inland fisheries management and planning are unaware of GIS technology and its potential for fisheries planning and management. The FAO Inland Water Resources and Aquaculture Service (FIRI) has been active for the last 19 years in promoting the use of GIS and remote sensing in fisheries and aquaculture. Promotional activities have been carried out through training, projects, field missions, and oral presentations and publications. However, a manual to use along with GIS software for the fisheries biologists in the field explaining GIS in a way that is understandable to non-GIS users had not been produced until now. This manual was written to overcome this knowledge-gap, it is a do-it-yourself manual giving a short introduction to GIS software and its applications in fishery science. The overall objective of this manual is to encourage fishery managers to use this tool (GIS) to foster the

sustainable use of natural resources. There are five main sections in the manual: GIS concepts and functions and key tools provided by ArcView 3.x, Geographic coordinate system and map projections, Raster data and analysis, Regression analysis, and Application case studies. All sections are accompanied by exercises that have been designed to illustrate key applications of GIS in inland and marine fisheries management. Also, a custom-designed ArcView grid regression extension is included to show the integration of GIS with surplus production models.

*Assessment of the SIMITAR Gunnery Training Strategy Through Development of a Database of Gunnery Outcome Measures* Monte D. Smith, 1998 This report assesses the impact of the Simulation in Training for Advanced Readiness (SIMITAR) compressed gunnery training strategy for Army National Guard (ARNG) armored and mechanized infantry units. This strategy emphasizes the use of state of the art training aids, devices, simulators, and simulations (TADSS) in response to challenges posed by time and range constraints experienced by ARNG combat units. Assessment entailed development of a longitudinal database of gunnery related information generated before (1993-1994) and during (1995-1997) SIMITAR strategy implementation. This information was collected from armored and mechanized infantry units from a SIMITAR test brigade and from six

enhanced no SIMITAR comparison brigades. Overall, the SIMITAR training strategy was successful. Results showed that final, crew level, tank gunnery qualification on Table 8 did not differ either between the SIMITAR and comparison units, or within the SIMITAR test unit, across data collection years. Bradley Fighting Vehicle Table 8 qualification rate, however, did favor the comparison units. Perhaps more importantly, the SIMITAR strategy permitted most (94%) fully staffed SIMITAR platoons to complete gunnery Table 8 (with a 45% overall qualification rate) and enabled company and higher level maneuver training objectives to be accomplished, all within a normal 39 day yearly training calendar. Suggestions for research needed to extend SIMITAR training strategy benefits are provided.--DITC.

#### Applied Statistics with SPSS Eelko

Huizingh, 2007-01-24 Accessibly written and easy to use, Applied Statistics Using SPSS is an all-in-one self-study guide to SPSS and do-it-yourself guide to statistics. Based around the needs of undergraduate students embarking on their own research project, the text's self-help style is designed to boost the skills and confidence of those that will need to use SPSS in the course of doing their research project. The book is pedagogically well developed and contains many screen dumps and exercises, glossary terms and worked examples. Divided into two parts, Applied Statistics Using SPSS covers : 1. A self-study guide for learning how to use SPSS. 2. A reference guide for selecting the appropriate statistical technique and a stepwise do-it-yourself guide for analysing data and interpreting the results. 3. Readers of the book can download the SPSS data file that is used for most of the examples throughout the book here. Geared explicitly for

undergraduate needs, this is an easy to follow SPSS book that should provide a step-by-step guide to research design and data analysis using SPSS.
