COMPLETE VOCABULARY.

Sailing Solitaire James and Nancy Aadland,2008-11-25 Jim and Nancy had a different dream for their retirement. They imagined themselves traveling to remote settlements on tropical Islands in their sailboat - meeting the people, learning the history, enjoying the environment, and giving a little back along the way. Their biggest challenge was how to accomplish that without the means of the rich and famous. They were a late-in-life couple; starting over in their forties. They didn't have trust funds and stock portfolios - just government jobs with modest pensions, 401K's and social security. They didn't even have a boat yet. What they did have was a plan. Sail with Jim and Nancy on their 41 foot sailboat, Solitaire, during their first year as cruisers. Read Jim's journals and Nancy's logs as they travel from New England to the Bahamas; learning one lesson after another and getting ready to venture into more remote areas of the world.

The Computers and Games (CG) series began in 1998 with the objective of showcasing new developments in artificial intelligence (AI) research that used games as the experimental test-bed. The first two CG conferences were held at Hamamatsu, Japan (1998, 2000). Computers and Games 2002 (CG2002) was the third event in this biennial series. The conference was held at the University of Alberta (Edmonton, Alberta, Canada), July 25–27, 2002. The program consisted of the main conference featuring refereed papers and keynote speakers, as well as several side events including the Games Informatics Workshop, the Agents in Computer Games Workshop, the Trading Agents Competition, and the North American Computer Go Championship. CG 2002 attracted 110 participants from over a dozen countries. Part of the success of the conference was that it was co-located with the National Conference of the American Association for Artificial Intelligence (AAAI), which began in Edmonton just as CG 2002 ended. The CG 2002 program had 27 refereed paper presentations. The papers ranged over a wide variety of AI-related topics including search, knowledge, learning, planning, and combinatorial game theory. Research test-beds included one-player games (blackjack, sliding-tile puzzles, Sokoban), two-player games (Amazons, awari, chess, Chinese chess, clobber, Go, Hex, Lines of Action, Othello, shogi), multi-player games (Chinese checkers, cribbage, Diplomacy, hearts, spades), commercial games (role-playing games, real-time strategy games), and novel applications (Post's Correspondence Problem).
