C++ Gotchas Stephen C. Dewhurst,2003 Corpus linguistics is a research approach to investigate the patterns of language use empirically, based on analysis of large collections of natural texts. While corpus-based analysis has had relatively little influence on theoretical linguistics, it has revolutionized the study of language variation and use: what speakers and writers actually do with the lexical and grammatical resources of a language. Corpus-based research employs the research methods of quantitative and qualitative social science to investigate language use patterns empirically. This four-volume collection is organized around linguistic research questions that can be investigated from a corpus perspective and includes amongst others studies of individual words, comparisons of supposedly synonymous words, studies of grammatical variation, and sociolinguistic studies of dialects, registers, styles, and world varieties. Corpus-based analysis has also proven to be important for the study of historical change.

Conjunctive Markers of Contrast in English and French Maïté Dupont,2021-06-15 Situated at the interface between corpus linguistics and Systemic Functional Linguistics, this volume focuses on conjunctive markers expressing contrast in English and French. The frequency and placement patterns of the markers are analysed using large corpora of texts from two written registers: newspaper editorials and research articles. The corpus study revisits the long-standing but largely unsubstantiated claim that French requires more explicit markers of cohesive conjunction than English and shows that the opposite is in fact the case. Novel insights into the placement preferences of English and French conjunctive markers are provided by a new approach to theme and rheme that attaches more importance to the rheme than previous studies. The study demonstrates the significant benefits of a combined corpus and Systemic Functional Linguistics approach to the cross-linguistic analysis of cohesion.

Internet & World Wide Web Harvey M. Deitel,Paul J. Deitel,Tem R. Nieto,2002 For a wide variety of Web Programming, HTML, and JavaScript courses found in Computer Science, CIS, MIS, IT, Business, Engineering, and Continuing Education departments. Also appropriate for an introductory programming course (replacing traditional programming languages like C, C++ and Java) for schools wanting to integrate the Internet and World Wide Web into their curricula. The revision of this groundbreaking book in the Deitels'How to Program series offers a thorough treatment of programming concepts, with programs that yield visible or audible results in Web pages and Web-based applications. The book discusses effective Web-page design, server- and client-side scripting, ActiveX(R) controls and the essentials of electronic commerce. Internet & World Wide Web How to Program also offers an alternative to traditional introductory programming courses. The fundamentals of programming no longer have to be taught in languages like C, C++ and Java. With Internet/Web markup languages (such as HTML, Dynamic HTML and XML) and scripting languages (such as JavaScript(R), VBScript(R) and Perl/CGI), you can teach the fundamentals of programming wrapped in the Web-page metaphor.

Web-Based Human Resources Alfred J. Walker,Towers Perrin,2001-06-11 This guide shows human resource professionals how to use online technology to offer more services to employees. It offers tips on which approaches are the most effective depending upon the size of the organization and explains the Web technologies that are changing the way human resources work.

<u>Contrastive Analysis of Discourse-pragmatic Aspects of Linguistic Genres</u> Karin Aijmer,Diana Lewis,2017-03-29 This volume will give readers insight into how genres are characterised by the patterns of frequency and distribution of linguistic features across a number of European languages. The material presented in this book will also stimulate further corpus-based contrastive research including more languages, more genres and different types of corpora. This is the first special issue of the Yearbook of Corpus Linguistics and Pragmatics, a publication that addresses the interface between the two disciplines and offers a platform to scholars who combine both methodologies to present rigorous and interdisciplinary findings about language in real use. Corpus linguistics and Pragmatics have traditionally represented two paths of scientific thought, parallel but often mutually exclusive and excluding. Corpus Linguistics can offer a meticulous methodology based on mathematics and statistics, while Pragmatics is characterized by its effort in the interpretation of intended meaning in real language.

Out of Corpora Hasselgård,2023-11-20 Main headings: Introduction. - I. Representing language use. - II. Grammar and lexis in English corpora. - III. Contrastive and translation studies. - IV. English abroad. - List of Stig Johansson's publications (selection).

Corpus Linguistics and Linguistic Theory Christian Mair,Marianne Hundt,2000 From being the occupation of a marginal (and frequently marginalised) group of researchers, the linguistic analysis of machine-readable language corpora has moved to the mainstream of research on the English language. In this process an impressive body of results has accumulated which, over and above the intrinsic descriptive interest it holds for students of the English language, forces a major and systematic re-thinking of foundational issues in linguistic theory. Corpus linguistics and linguistic theory was accordingly chosen as the motto for the twentieth annual gathering of ICAME, the International Computer Archive of Modern/ Medieval English, which was hosted by the University of Freiburg (Germany) in 1999. The present volume, which presents selected papers from this conference, thus builds on previous successful work in the computer-aided description of English and at the same time represents an attempt at stock-taking and methodological reflection in a linguistic subdiscipline that has clearly come of age.Contributions cover all levels of linguistic description - from phonology/ prosody, through grammar and semantics to discourse-analytical issues such as genre or gender-specific linguistic usage. They are united by a desire to further the dialogue between the corpus-linguistic community and researchers working in other traditions. Thereby, the atmosphere ranges from undisguised skepticism (as expressed by Noam Chomsky in an interview which is part of the opening contribution by Bas Aarts) to empirically substantiated optimism (as, for example, in Bernadette Vine's significantly titled contribution Getting things done).

<u>Information Structure in a Cross-Linguistic Perspective</u> ,2016-08-29 The present volume draws together contributions from a number of scholars with an interest in empirical, cross-linguistic description. Most of the papers were first presented at the symposium Information Structure in a Cross-linguistic Perspective held in Oslo in November/December 2000. The descriptions are functionally oriented, and their common focus is how information structure – in a broad sense – can be compared across languages.

'Information structure' has been approached in a variety of ways by the authors, so as to give a broad picture of this fundamental principle of text production, involving the way in which a speaker/writer chooses to present a message in terms of given/new information, focus, cohesion, and point of view. Central to much of the research is the problem of establishing criteria for isolating linguistic constraints on language use from cultural-linguistic conventions in text production. The linguistic comparison includes English, German and/or one of the Scandinavian languages, with sidelights to other languages. Most of the papers are text- or corpus-based, and the ongoing work on parallel corpora in Scandinavia is reflected in several contributions.

Empirical Translation Studies Gert De Sutter,Marie-Aude Lefer,Isabelle Delaere,2017-05-08 The present volume is devoted to the study of language use in translated texts as a function of various linguistic, contextual and cognitive factors. It contributes to the recent trend in empirical translation studies towards more methodological sophistication, including mixed methodology designs and multivariate statistical analyses, ultimately leading to a more accurate understanding of language use in translations.

Corpora and Cross-Linguistic Research ,2023-11-27 In recent years there has been increasing interest in the development and use of bilingual and multilingual corpora. As Karin Aijmer writes in this book, 'The contrastive or comparative perspective ... makes it possible to dig deeper and to ask new questions about the relationship between languages with the aim of sharpening our conceptions of cross-linguistic correspondences and adding to our knowledge of the languages compared.' The papers in this volume are a showcase of the great variety of purposes to which bilingual and multilingual corpora can be put. They do not only lend themselves to descriptive and applied approaches, but are also suitable for theory-oriented studies. The range of linguistic phenomena covered by the various approaches is very wide; the papers focus on fields of research like syntax, discourse, semantics, information structure, lexis, and translation studies. The range of languages studied comprises English, Norwegian, Swedish, German, Dutch, and Portuguese. In addition to purely linguistic papers, there are contributions on computer programs developed for the compilation and use of bilingual and multilingual corpora.

Extending the Scope of Corpus-based Research Sylviane Granger,Stephanie Petch-Tyson,2003 This collection of articles highlights some of the challenges facing English Corpus Linguistics at the beginning of the 21st century and shows how these challenges are being addressed by researchers.

Corpora and Language Teaching Karin Aijmer,2009 Articles in this volume discuss the role and effectiveness of corpora and corpus-linguistic techniques for language teaching but also deal with broader issues such as the relationship between corpora and second language teaching and how the different perspectives of foreign language teachers and applied linguists can be reconciled.

Seeing Through Multilingual Corpora Stig Johansson,2007-01-01 Through electronic corpora we can observe patterns which we were unaware of before or only vaguely glimpsed. The availability of multilingual corpora has led to a renewal of contrastive studies. We gain new insight into similarities and differences between languages, at the same time as the characteristics of each language are brought into relief. The present book focuses on the work in building and using the English-Norwegian Parallel Corpus and the Oslo Multilingual Corpus. Case studies are reported on lexis, grammar, and discourse. A concluding chapter sums up problems and prospects of corpus-based contrastive studies, including applications in lexicography, translator training, and foreign-language teaching. Though the main focus is on English and Norwegian, the approach should be of interest more generally for corpus-based contrastive research and for language studies in general. Seeing through corpora we can see through language.

Thinking Translation Sandor Hervey,Ian Higgins,2002-09-11 Thinking Translation is a comprehensive and revolutionary 20-week course in translation method. It has been fully and successfully piloted at the University of St. Andrews. The course offers a challenging and entertaining approach to the acquisition of translation skills. Translation is presented as a problem-solving discipline. Discussion, examples and a full range of exercise work allows students to acquire the skills necessary for a broad range of translation problems. Thinking Translation draws on a wide range of material from technical texts to poetry and song.

Corpus-based Approaches to Contrastive Linguistics and Translation Studies ,2021-08-04 Corpus-based Approaches to Contrastive Linguistics and Translation Studies presents readers with up-to-date research in corpus-based contrastive linguistics and translation studies, showing the high degree of complementarity between the two fields in terms of research methodology, interests and objectives. Offering theoretical, descriptive and applied perspectives, the articles show how translation and contrastive approaches to grammar, lexis and discourse can be harmoniously combined through the use of monolingual, bilingual and multilingual corpora and how contrastive information needs to inform translation research and vice versa. The notion of contrastive linguistics adopted here is broad; thus, alongside comparisons of Malay/English idioms and the French imparfait and its English equivalents, there are articles comparing different varieties of French, and sign language with spoken language. This collection should be of interest to researchers in corpus linguistics, contrastive linguistics and translation studies. In addition, the section on corpus-based teaching applications will be of great value to teachers of translation and contrastive linguistics.

Handbook of Translation Studies Yves Gambier,Luc van Doorslaer,2010-10-28 As a meaningful manifestation of how institutionalized the discipline has become, the new Handbook of Translation Studies is most welcome. The HTS aims at disseminating knowledge about translation and interpreting to a relatively broad audience: not only students who often adamantly prefer user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars, experts and professionals from other disciplines (among which linguistics, sociology, history, psychology). Moreover, the HTS is the first handbook with this scope in Translation Studies that has both a print edition and an online version. The HTS is variously searchable: by article, by author, by subject. Another benefit is the interconnection with the selection and organization principles of the online Translation Studies Bibliography (TSB). Many items in the reference lists are hyperlinked to the TSB, where the user can find an abstract of a publication. All articles are written by specialists in the different subfields and are peer-reviewed
