Real-World Flash Game Development Christopher Griffith, 2012-11-12 Your deadline just got moved up. Your artist has never worked with Flash before. Your inner programmer is telling you that no OOP is a big Oops! Any Flash developer can share similar tales of woe. This book breaks down the process of Flash game development into simple, approachable steps. Never heard of a game loop before? No idea what a design pattern is? No problem! Chris Griffith gives you real-world expertise, and real-world code that you can use in your own games. Griffith has been building games in Flash long enough to know what works and what doesn't. He shows you what you need to know to get the job done. Griffith covers Flash for the everyday developer. The average Flash developer doesn't have luxurious timelines, employers who understand the value of reusability, or the help of an information architect to design a usable experience. This book helps bridge the gap for these coders who may be used to C++, Java, or C# and want to move over to Flash. Griffith covers real-world scenarios pulled from his own experiences developing games for over 10 years in the industry. The 2nd edition will include: completely new game examples on more advanced topics like 3D; more robust physics and collision detection; and mobile device coverage with Android platform development for us on phones and tablets. Also coverage of the new features available in Flash CS5, Flash Player 10.1, and AIR 2.0 that can be used for

game development. The associated web site for the book: www.flashgamebook.com gets close to 1,000 visits a month. On the site, readers can find all the source code for the examples, news on industry happenings, updates and special offers, and a discussion forum to ask questions and share ideas.

ActionScript 3.0 Cookbook Joey Lott, Darron Schall, Keith Peters, 2006-10-11

Well before Ajax and Microsoft's Windows Presentation Foundation hit the scene, Macromedia offered the first method for building web pages with the responsiveness and functionality of desktop programs with its Flash-based Rich Internet Applications. Now, new owner Adobe is taking Flash and its powerful capabilities beyond the Web and making it a full-fledged development environment. Rather than focus on theory, the ActionScript 3.0 Cookbook

concentrates on the practical application of `ActionScript`, with more than 300 solutions you can use to solve a wide range of common coding dilemmas. You'll find recipes that show you how to: Detect the user's Flash Player version or their operating system Build custom classes Format dates and currency types Work with strings Build user interface components Work with audio and video Make remote procedure calls using Flash Remoting and web services Load, send, and search XML data And much, much more ... Each code recipe presents the Problem, Solution, and Discussion of how you can use it in other ways or personalize it for your own needs, and why it works. You can quickly locate the recipe that most closely matches your situation and get the solution without reading the whole book to understand the underlying code. Solutions progress from short recipes for small problems to more complex scripts for thornier riddles, and the discussions offer a deeper analysis for resolving similar issues in the future, along with possible design choices and ramifications. You'll even learn how to link modular `ActionScript` pieces together to create rock-solid solutions for Flex 2 and Flash applications. When you're not sure how `ActionScript` 3.0 works or how to approach a specific programming dilemma, you can simply pick up the book, flip to the relevant recipe(s), and quickly find the solution you're looking for. DataPower SOA Appliance Service Planning, Implementation, and Best Practices Byron Braswell, David Shute, Daniel Dickerson, Richard Kinard, Manuel Carrizosa, Bruno Neves, Pablo Sanchez, Gerry Kaplan, IBM Redbooks, 2011-08-25 This IBM® Redbooks® publication will help you to better understand the effective use of the WebSphere® DataPower® family of appliances. It provides guidance on the best methods identified to date for building the various components that implement solutions, such as handling MQ-based message flows or creating authentication and authorization policies. The information and recommendations in this publication are the result of real world experiences using the appliances. Such experience shows that taking the time to plan a solution implementation before beginning the work yields the greatest savings in time and energy and the highest quality outcome. This publication begins

with a checklist of items to consider when planning a DataPower solution. This publication is intended to provide answers or guidance to implementation problems often encountered by users of the appliance. This book is not intended to present complete solutions or templates because experience shows that every customer uses the appliance in their own unique environment with unique requirements. Thus, this publication provides a compendium of information about particular aspects of a solution. Use the Table of Contents or Index to find your current issue, and return to this publication when the next issue or question arises. End-to-end Integration with IBM Sterling B2B Integration and Managed File Transfer solutions James Ballentine, Claudemir Braghirolli, Vasfi Gucer, Rahul Gupta, James B Herry, Richard Kinard, Gianluca Meloni, Bala Sivasubramanian, Eduardo Ribeiro de Souza, Frank Strecker, Gang Yin, IBM Redbooks, 2012-07-21 Across numerous vertical industries, enterprises are challenged to improve processing efficiency as transactions flow from their business communities to their internal systems and vice versa, simplify management and expansion of the external communities, accommodate customer and supplier preferences, govern the flow of information, enforce policy and standards, and protect sensitive information. Throughout this process, external partners must be on-boarded and off-boarded, information must flow across multiple communications infrastructures, and data must be mapped and transformed for consumption across multiple applications. Some transactions require synchronous or real-time processing while others are of a more periodic nature. For some classes of customer or supplier, the enterprise

might prefer a locally-managed, on-premise solution. For some types of communities (often small businesses), an as-a-Service solution might be the best option. Many large enterprises combine the on-premise and as-a-Service approach to serve different categories of business partners (customers or suppliers). This IBM® Redbooks® publication focuses on solutions for end-to-end integration in complex value chains and presents several end-to-end common integration scenarios with IBM Sterling and IBM WebSphere® portfolios. We believe that this publication will be a reference for IT Specialists and IT Architects implementing an integration solution architecture involving IBM Sterling and IBM WebSphere portfolios.
