The Columbia Guide to Digital Publishing William E. Kasdorf,2003 What is metadata? When do you need to archive digital content? How does electronic publication affect copyrights? How can XML and PDF improve your workflow and your publications? There is a digital dimension to virtually all publishing today. Beyond the obvious electronic media--the music and movies we take for granted, the increasingly indispensable Web, the eBooks that most of us will take for granted in a few years--almost everything we read, even on paper, was produced digitally. This new digital world offers a steadily increasing number of choices. It is this rich and rapidly changing publishing environment for which The Columbia Guide to Digital Publishing was created. Although there is a vast amount of information on a host of topics relevant to digital production and publishing

available--some in print, more on the Web--there has been, until now, no single resource to which those involved in any dimension of publishing could turn for guidance. The Columbia Guide to Digital Publishing fills that need. The Guide is definitive: written by experts in the broad array of subjects it covers, it provides reliable, authoritative, user-friendly information about a vast number of topics. Designed to be the first place to go to learn about any of the numerous interrelated issues that define the digital publishing landscape, it offers readers a multilevel approach, from a brief glossary definition of a technical term or acronym (sometimes all a user needs), to a concise discussion of a topic (comprehensible to the lay person, yet useful for the technical expert). It puts a subject in the context of other topics and broader issues, with real-world examples, liberal cross-references, and pointers to sources of further information in print or electronic form.

E-Commerce and Convergence: A Guide to the Law of Digital Media Susan Singleton,2021-03-12 Since the last edition ten years ago the pace of technological and legal change has stepped up even more than before with previous editions. New legislation is in force such as the General Data Protection Regulation (GDPR) and UK Data Protection Act 1998 and from 1 January 2021 UKGDPR. The UK Information Commissioner has been looking closely at Ad Tech and what has become known as big data and how data are gathered on-line. Intellectual Property law in the ecommerce area has also changed. There is a very recently agreed new EU copyright directive which is due to be implemented in the 27 EU member states (but not the UK) in 2021. The post-Brexit transition period expired on 31 December 2020 which has implications for the application of ecommerce law in a number of different areas which are all addressed in the new addition. The 2010 EU vertical regulation and guidelines have recently been built on with the EU geo-blocking regulation and the related EU Commission's initiatives in relation to ecommerce in the anti-trust area. In 2020 the UK implemented changes in relation to EU law in the revised 2018 Audiovisual Media Services Directive (AVMS) through the Audiovisual Media Services Regulations 2020 which are addressed in the new edition as post-Brexit the UK is retaining this legislation. Other updates include the distance selling legislation in the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013 and the Consumer Rights Act 2015 which came into force since the last edition.

Multimodality and Active Listenership Dawn Knight,2011-10-13 Current corpora are invaluable resources for generating accurate and objective analyses of patterns of language use. However, spoken corpora are effectively mono-modal, presenting data in the same physical medium – text. The reality of a discourse situation is lost in its representation as text. Using multimodal data sets when conducting corpus-based pragmatic analyses is one solution. This book looks at multimodal corpora in some depth, using backchanneling as the conversational feature to be analysed. It provides a bottom-up investigation of the issues and challenges faced at every stage of multimodal corpus construction and analysis, as well as providing an in-depth linguistic analysis of a cross section of multimodal corpus data. The collaborative and co-operative nature of backchannels is highlighted in this book and an adapted pragmatic-functional linguistic coding matrix for the characterisation of backchanneling phenomena is presented. Dawn Knight also looks at possible directions in the construction and use of multimodal corpus linguistics.
