Journalism Tony Harcup, 2009-03-18 A holistic assessment of what journalism is all about, with plenty of enterprising interpretations of our trade - a word I prefer to 'profession'. I never met a more 'unprofessional' breed than that of my fellow hacks. This book will, I hope, lead our successors both to question and rebel more than we have. - Jon Snow, Channel 4 News Stands out in a crowded field. The Guardian The bible of professional education in journalism... Every student of journalism should buy a copy. - THE (Times Higher Education) This is the indispensable guide to the theory and practice of journalism, now updated with 25% entirely new material. With its innovative text design, it creatively combines the experience and advice of practising journalists with the theories and insights from the academic study of journalism. This second edition thoroughly addresses the 'converged' nature of much 21st century journalism, with discussion and examples of online practice embedded throughout to represent the reality that online journalism is increasingly part of the job for all journalists. New and improved features include: More examples, more depth, and more interviews with journalists. A whole new chapter on telling stories through pictures, whether on TV or online. Fresh new examples reflecting today's journalistic practice. More insights from online journalists on blogging, the use of video and audio on the web, interactive maps and other ways of doing journalism online. This edition embraces the new without abandoning the fundamentals of what journalism is all about. It will continue to inspire students of journalism to reflect on everyday practice and connect it to academic debate.

DIR 8.5 STUDIO, ROBBINS, 2001-08-20 There are things that Flash does badly or not at all—namely, sound and 3D. These two also happen to be the hottest areas for web development, as more and more segments of the entertainment industry realise that for sound and 3D, and a heavyweight project, Director is the tool of choice. Director has long been established as the premier multimedia authoring tool. Version 8 brought closer web focus. But Director 8.0 did not include Flash asset management, nor was it capable of working in 3D. With the upgrade to 8.5, Director has become an important Flash-compatible 3D development tool. This integration of two of Macromedia's most exciting graphics tools, as well as the inclusion of a sophisticated 3D modelling environment, mean that Director 8.5 is not a half-version so much as a rapid response to a burgeoning and demanding market. Following the multi-author single-voice Studio format, this book brings together experts in the many different facets of Director lore and technique, programming and modelling. What you'll learnWho this book is for Multimedia designers interested in working with the net and/or multimedia computer graphics Flash 5 users who need to deepen and perfect their Director skills, required for working with 3D and more sophisticated interactivity than they can achieve with Flash

The Palgrave Handbook of Cross-Border Journalism Liane Rothenberger,Martin Löffelholz,David H. Weaver,2024-02-03 This handbook critically analyzes cross-border news production and “transnational journalism cultures” in the evolving field of cross-border journalism. As the era of the internet has further expanded the border-transcending production, dissemination and reception of news, and with transnational co-operations like the European Broadcasting Union and BBC World News demonstrating different kinds of cross-border journalism, the handbook considers the field with a range of international contributions. It explores cross-border journalism from conceptual and empirical angles and includes perspectives on the systemic contexts of cross-border journalism, its structures and routines, changes in production processes, and the shifting roles of actors in digital environments. It examines cross-border journalism across regions and concludes with discussions on the future of cross-border journalism, including the influence of automation, algorithmisation, virtual reality and AI.
