Using a series of carefully developed tutorials, you will be led from basic Flash CS4 techniques to the point where you can create animations, MP3 players, and customized Flash video players in no time. Each chapter focuses on a major aspect of Flash, and then lets you take the reins in a Your Turn exercise to create something amazing with what you've learned. You will start by studying the Flash CS4 interface, and while you're at it, you'll be guided toward mastery of the fundamentals, such as movie clips, text, and graphics, which will lead you into some of the more fascinating aspects of Flash, including audio, video, animation, and 3D transformations. Multimedia Mining Chabane Djeraba,2012-12-06 Multimedia Mining: A Highway to Intelligent Multimedia Documents brings together experts in digital media content analysis, state-of-art data mining and knowledge discovery in multimedia database systems, knowledge engineers and domain experts from diverse applied disciplines. Multimedia documents are ubiquitous and often required, if not essential, in many applications today. This phenomenon has made multimedia documents widespread and extremely large. There are tools for managing and searching within these collections, but the need for tools to extract hidden useful knowledge embedded within multimedia objects is becoming pressing and central for many decision-

making applications. The tools needed today are tools for discovering relationships between objects or segments within multimedia document components, such as classifying images based on their content, extracting patterns in sound, categorizing speech and music, and recognizing and tracking objects in video streams.

Corpus Approaches to Language in Social Media Matteo Di Cristofaro,2023-08-18 This book showcases the unique possibilities of corpus linguistic methodologies in engaging with and analysing language data from social media, surveying current approaches, and offering guidelines and best practices for doing language analysis. The book provides an overview of how language in social media has been approached by linguists and non-linguists, before delving into the identification of the datasets requirements needed to pursue investigations in social media, and of the technical aspects of particular platforms that may influence the analysis, such as emoticons, retweets, and metadata. Sample Python code, along with general guidelines for using it, is provided to empower researchers to apply these techniques in their own work, supported by actual examples from three real-life case studies. Di Cristofaro highlights the full potential of using these methodologies in analysing social media language data and the ways in which they might pave the way for future applications of data analysis and processing for corpus linguistics. The book will be key reading for researchers in corpus linguistics and linguists and social scientists interested in data-driven analysis of social media.

The Methodology and Philosophy of Collective Writing Michael A. Peters,Tina Besley,Marek Tesar,Liz Jackson,Petar Jandric,Sonja Arndt,Sean Sturm,2021-07-12 This multi-authored collection covers the methodology and philosophy of collective writing. It is based on a series of articles written by the authors in Educational Philosophy and Theory, Open Review of Educational Research and Knowledge Cultures to explore the concept of collective writing. This tenth volume in the Editor's Choice series provides insights into the philosophy of academic writing and peer review, peer production, collective intelligence, knowledge socialism, openness, open science and intellectual commons. This collection represents the development of the philosophy, methodology and philosophy of collective writing developed in the last few years by members of the Editors' Collective (EC), who also edit, review and contribute to Educational Philosophy and Theory (EPAT), as well as to PESA Agora, edited by Tina Besley, and Access, edited by Nina Hood, two PESA 'journals' recently developed by EC members. This book develops the philosophy, methodology and pedagogy of collective writing as a new mode of academic writing as an alternative to the normal academic article. The philosophy of collective writing draws on a new mode of academic publishing that emphasises the metaphysics of peer production and open review along with the main characteristics of openness, collaboration, co-creation and co-social innovation, peer review and collegiality that have become a praxis for the self-reflection emphasising the subjectivity of writing, sometimes called self-writing. This collection, under the EPAT series Editor's Choice, draws on a group of members of the Editors' Collective,who constitute a network of editors, reviewers and authors who established the organisation to further the aims of innovation in academic writing and publishing. It provides discussion and examples of the philosophy, methodology and pedagogy of collective writing. Split into three sections: Introduction, Openness and Projects, this volume offers an introduction to the philosophy and methodology of collective writing. It will be of interest to scholars in philosophy of education and those interested in the process of collective writing.
