Unifying Theories of Programming Steve Dunne,2006-06-27 This book constitutes the thoroughly refereed post-proceedings of the First International Symposium on Unifying Theories of Programming, UTP 2006, held at Walworth Castle, County Durham, UK, in February 2006. The book presents 14 revised full papers. Based on the pioneering work on unifying theories of programming by Tony Haare and Jifeng He, UTP 2006 focused on the most significant results and raised awareness of the benefits of unifying theoretical frameworks.

**Sams Teach Yourself Beginning Programming in 24 Hours** Greg Perry,2001-11-02 Sams Teach Yourself Beginning Programming in 24 Hours, Second Edition explains the basics of programming in the successful 24-Hours format. The book begins with the absolute basics of programming: Why program? What tools to use? How does a program tell the computer what to do? It teaches readers how to program the computer and then moves on by exploring the some most popular programming languages in use. The author starts by introducing the reader to the Basic language and finishes with basic programming techniques for Java, C++, and others.

**Improving Agile Retrospectives** Marc Loeffler,2017-12-11 Agile retrospectives help you get to the root of your real problems, so you can solve them quickly and effectively. They're the cornerstone of a successful continuous improvement process, and one of your best tools for triggering positive cultural change. In *Improving Agile Retrospectives*, leading agile coach/trainer Marc Loeffler combines practical guidance, proven practices, and innovative approaches for maximizing the value of retrospectives for your team—and your entire organization. You can apply his powerful techniques in any project, agile or otherwise. These techniques offer exceptional value wherever continuous improvement is needed: from “lessons-learned” workshops in traditional project management to enterprise-wide change management. Loeffler’s detailed, results-focused examples help you recognize and overcome common pitfalls, adapt retrospectives to your unique needs, and consistently achieve tangible results. Throughout, he integrates breakthrough concepts, such as using experimentation and learning from system thinking. He presents small ideas that make a big difference—because they’re deeply grounded in real experience. • Learn from failures and successes, and make good things even better • Master facilitation techniques that help you achieve your goals (and have fun doing it) • Prepare your retrospective so it runs smoothly • Practice techniques for generating actionable insights • Keep your retrospectives fresh and interesting • Perform retrospectives that address the entire system, not just your team • Focus on your “better future” with solution-focused retrospectives • Learn how to avoid typical pitfalls when facilitating retrospectives • Lead retrospectives across multiple distributed teams • Use retrospectives to support large-scale change
