📖 **As Gods** Matthew Cobb,2022-11-15 The thrilling and terrifying history of genetic engineering In 2018, scientists manipulated the DNA of human babies for the first time. As biologist and historian Matthew Cobb shows in As Gods, this achievement was one many scientists have feared from the start of the genetic age. Four times in the last fifty years, geneticists, frightened by their own technology, have called a temporary halt to their experiments. They ought to be frightened: now we have powers that can target the extinction of pests, change our own genes, or create dangerous new versions of diseases in an attempt to prevent future pandemics. Both awe-inspiring and chilling, As Gods traces the history of genetic engineering, showing that this revolutionary technology is far too important to be left to the scientists. They have the power to change life itself, but should we trust them to keep their ingenuity from producing a hellish reality?

📖 **The Genetic Age** Matthew Cobb,2022-09-01 A Times Environment and Science Book of the Year 2022 ‘The ideal guide to what is not just a fiendishly complex area of science but also an ethical minefield’ Mail on Sunday A new gene editing technology, invented just seven years ago, has turned humanity into gods. Enabling us to manipulate the genes in virtually any organism with exquisite precision, CRISPR has given scientists a degree of control that was undreamt of even in science fiction. But CRISPR is just the latest, giant leap in a long journey to master genetics. The Genetic Age shows the astonishing, world-changing potential of the new genetics and the possible threats it poses, sifting between fantasy and the reality when it comes to both benefits and dangers. By placing each phase of discovery, anticipation and fear in the context of over fifty years of attempts to master the natural world, Matthew Cobb, the Baillie-Gifford-shortlisted author of The Idea of the Brain, weaves the stories of science, history and culture to shed new light on our future. With the powers now at our disposal, it is a future that is almost impossible to imagine – but it is one we will create ourselves.

📖 **How Cool Are Penguins** Kathleen U. Frosch,2020-11-30 How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

📖 **Microinjection and Transgenesis** Angel Cid-Arregui,Alejandro Garcia-Carranca,2012-12-06 The establishment of microinjection protocols about 20 years ago for cultured cells and shortly thereafter for the generation of transgenic mice by microinjection of DNA into fertilized mouse eggs greatly influenced many fields of biology. Not only have the data generated using these approaches contributed to a large extent to our present understanding of gene regulation and cellular function of higher eukaryotic cells, but current knowledge and future developments in this area will certainly have a great impact on basic and applied research for many years to come. This laboratory manual describes the current state of the art in this research area and focuses primarily on both the experimental strategies with an extensive bibliography and the detailed procedures. A large number of studies are presently being performed and a great variety of new experimental designs are rapidly being developed. The book contains protocols on injection of somatic cells as well as on injection of embryos, the use of similar equipment being a common feature. In the articles dedicated to somatic cells, full descriptions of the manual and automatic injection systems are given as well as the methods for the analysis of injected cells by video-microscopy, electron microscopy or in situ hybridizations. In addition, comprehensive protocols are given for injection experiments with very different purposes, such as to study signal transduction or microtubule dynamics.

📖 **In Slocum’s Wake** Nat Warren-White,2022-01-26 In Slocum’s Wake, written for sailors and non-sailors alike, is an autobiographical tale of a hard-won circumnavigation aboard a 43-foot cutter. This story will entice, entrance and inspire the reader whether you intend to embark on your own voyage or just enjoy a good adventure saga. With a primary focus on the remarkable people and places encountered during nearly five years at sea, In Slocum’s Wake also offers those who are planning their own long-distance off-shore exploit invaluable advice and data about best routes, strategies, stops, services and tricks of the trade. If you have always dreamed of undertaking such a journey, In Slocum’s Wake will either help you summon the courage to actually take the leap or convince you it’s really not worth the risk or trouble you will surely encounter along the watery way. It’s impossible to sail around the world without facing some of the most challenging experiences of your life. On the flip side, you will also surely discover the most sublime and exhilarating moments and memories guaranteed to stay with you for the rest of your earthbound days. Nat Warren-White’s five-year journey follows many of the same passages and roughly traces much of the route followed by Joshua Slocum who, in the late 1800s, became the first person to sail alone around the world. In Slocum’s Wake compares the challenges Warren-White faced aboard his South African-built sloop, Bahati, with those faced by Slocum aboard his 37-foot Chesapeake Bay oyster-fishing vessel, Spray . The two boats are similar in design and capability though built more than 100 years apart, one in wood, the other in fiberglass. The two captains are similar in background and stature, though born almost 100 years apart. To both men, navigating the world’s oceans came from a similar motivation: ...a natural outcome of [a] love of adventure, [and] of [our] lifelong experience in, on and around the sea.
