Wide Area Surveillance Vijayan K. Asari,2013-11-19 The book describes a system for visual surveillance using intelligent cameras. The camera uses robust techniques for detecting and tracking moving objects. The real time capture of the objects is then stored in the database. The tracking data stored in the database is analysed to study the camera view, detect and track objects, and study object behavior. These set of models provide a robust framework for coordinating the tracking of objects between overlapping and non-overlapping cameras, and recording the activity of objects detected by the system.

The Infrastructures of Security Martin Murray,2022-08-15 Much of the South African government's response to crime—especially in Johannesburg—has been to rely increasingly on technology. This includes the widespread use of video cameras, Artificial Intelligence, machine-learning, and automated systems, effectively replacing human watchers with machine watchers. The aggregate effect of such steps is to determine who is, and isn't, allowed to be in public spaces—essentially another way to continue segregation. In The Infrastructures of Security, author Martin J. Murray concentrates on not only the turn toward technological solutions to managing the risk of crime through digital (and software-based) surveillance and automated information systems, but also the introduction of somewhat bizarre and fly-by-night experimental "answers" to perceived risk and danger. Digitalized surveillance is significant for two reasons: first, it enables monitoring to take place across wide geographical distances with little time delay; and second, it allows for the active sorting, identification, and tracking of bodies, behaviors, and characteristics of subject populations on a continuous, real-time basis. These new software-based surveillance technologies represent monitoring, tracking, and information gathering without walls, towers, or guards.

Video Analytics for Business Intelligence Caifeng Shan,Fatih Porikli,Tao Xiang,Shaogang Gong,2012-04-05 Closed Circuit TeleVision (CCTV) cameras have been increasingly deployed pervasively in public spaces including retail centres and shopping malls. Intelligent video analytics aims to automatically analyze content of massive amount of public space video data and has been one of the most active areas of computer vision research in the last two decades. Current focus of video analytics research has been largely on detecting alarm events and abnormal behaviours for public safety and security applications. However, increasingly CCTV installations have also been exploited for gathering and analyzing business intelligence information, in order to enhance marketing and operational efficiency. For example, in retail environments, surveillance cameras can be utilised to collect statistical information about shopping behaviour and preference for marketing (e.g., how many people entered a shop; how many females/males or which age groups of people showed interests to a particular product; how long did they stay in the shop; and what are the frequent paths), and to measure operational efficiency for improving customer experience. Video analytics has the enormous potential for non-security oriented commercial applications. This book presents the latest developments on video analytics for business intelligence applications. It provides both academic and commercial practitioners an understanding of the state-of-the-art and a resource for potential applications and successful practice.

Manual of Security Sensitive Microbes and Toxins Dongyou Liu,2014-04-08 Security sensitive microbes (viruses, bacteria, fungi, and parasites) and toxins, which are often referred to as the select agents and toxins, have the capacity to cause serious illness and death in humans, animals, and plants. Throughout history, these microbes and toxins have been exploited in one form or another as biowarfare and bioterror agents that create fear and panic well beyond any actual physical damages they might cause. Manual of Security Sensitive Microbes and Toxins provides comprehensive, state-of-the-art coverage of microbes and toxins of biosecurity concern. The ultimate goal is to increase our awareness of these agents and enhance our preparedness against any future bio-emergencies. The book begins with an introduction containing a brief overview of the historical aspects of security sensitive microbes and toxins. This is followed by a concise summary of the current status in relation to the regulation of security sensitive microbes and toxins and a discussion of future development trends. The book is divided into seven parts: Microbes and Toxins Affecting Humans and Animals: Viruses Microbes and Toxins Affecting Human and Animals: Bacteria Microbes and Toxins Affecting Human and Animals: Fungus and Parasite Microbes and Toxins Affecting Human and Animals: Toxins Microbes Affecting Animals: Viruses Microbes Affecting Animals: Bacteria Microbes Affecting Plants Written by experts in the relevant areas of research, the chapters are authoritative reviews, each one covering a single microbe or toxin with respect to its classification, biology, epidemiology, pathogenesis, identification, diagnosis, treatment, and prevention. The chapters also discuss the limitations of our current knowledge and challenges relating to improved detection and control of the microbe or toxin.

Indigenous Geographies in the Yucatan Miguel Sioui,2021-01-25 This book is part of a broader attempt to decolonize colonial histories and understandings about Indigenous peoples and their relationships with their territories, and argues that the land ethos of being part of the land, specifically among the Mayan community of Xuilub (Yucatan), Mexico, is guided by the cultural precept of 'responsibility-based' thinking. The work uniquely adds much needed insights into 'responsibility-based' thinking for land-use practices, and develops a theoretical framework for assessing historical impacts on Indigenous cultures and livelihoods. In six chapters, the text bridges Western and Indigenous Knowledge (IK) approaches to achieve deeper understanding of IKs, focusing on more Indigenous-centered methods, with the goal of expanding the disciplinary perspectives of postcolonial scholarship and Indigenous geographies. The book contains useful information for environmental planning/management scholars and geographers who

may not be familiar with Indigenous approaches to land-use, and to Indigenous geographers working to bridge Western and Indigenous methodologies.
