The Millionaire Fastlane MJ DeMarco,2011-01-04 10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as The Slowlane your plan for creating wealth? You know how it goes; it sounds a lil something like this: Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich. The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to settle-for-less and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why

the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of do what you love will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Transforming Barcelona Tim Marshall,2004-07-31 This unique book, written by local experts in the city, deals with the transformation of Barcelona during the last twenty years. Barcelona has been held up as a model of urban planning and economic regeneration amongst built environment professionals. The redesign of square parks and streets throughout the city in the 1980s first attracted attention and praise and then the 1992 Olympics hosted in the city raised international awareness. The city received many awards and accolades including a Gold Medal from the RIBA. The selection of writings is well illustrated throughout with maps, drawings and photographs and will be of interest to architects, planners and urban designers as well as those interested in the social and economic impacts of regeneration.

Game Engine Black Book: DOOM Fabien Sanglard, It was early 1993 and id Software was at the top of the PC gaming industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel Spear of Destiny were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. Game Engine Black Book: Doom is the story of how they did it. This is a book about history and engineering. Don't expect much prose (the author's English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine's revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

Data-Intensive Text Processing with MapReduce Jimmy Lin,Chris Dyer,2022-05-31 Our world is being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-to-understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader think in MapReduce, but also discusses limitations of the programming model as well. Table of Contents: Introduction / MapReduce Basics / MapReduce Algorithm Design / Inverted Indexing for Text Retrieval / Graph Algorithms / EM Algorithms for Text Processing / Closing Remarks

An Intellectual Biography of Africa Francis Kwarteng,2022-07-13 Africa is the birthplace of humanity and civilization. And yet people generally don’t want to accept the scientific impression of Africa as the birthplace of human civilization. The skeptics include Africans themselves, a direct result of the colonial educational systems still in place across Africa, and even those Africans who acquire Western education, particularly in the humanities, have been trapped in the symptomatology of epistemic peonage. These colonial educational systems have overstayed their welcome and should be dismantled. This is where African agency comes in. Agential autonomy deserves an authoritative voice in shaping the curricular direction of Africa. Agential autonomy implicitly sanctions an Afrocentric approach to curriculum development, pedagogy, historiography, literary theory, indigenous language development, and knowledge construction. Science, technology, engineering, mathematics?information and communications technology (STEM-ICT) and research and development (R&D) both exercise foundational leverage in the scientific and cultural discourse of the kind of African Renaissance Cheikh Anta Diop envisaged. “Mr. Francis Kwarteng has written a book that looks at some of the major distortions of African history and Africa’s major contributions to human civilization. In this context, Mr. Kwarteng joins a long list of thinkers who roundly reject the foundational Eurocentric epistemology of Africa in favor of an Afrocentric paradigm of Africa’s material, spiritual, scientific, and epistemic assertion. Mr. Kwarteng places S.T.E.M. and a revision of the humanities at the center of the African Renaissance and critiques Eurocentric fantasies about Africa and its Diaspora following the critical examples of Cheikh Anta Diop, Ama Mazama, Molefi Kete Asante, Abdul Karim Bangura, Theophile Obenga, Maulana Karenga, Mubabingo Bilolo, Kwame Nkrumah, Ivan Van Sertima, W.E.B. Du Bois, and several others. Readers of this book will be challenged to look at Africa through a critical lens.” Ama Mazama, editor/author of Africa in the 21st Century: Toward a New Future “There are countless books about the evolution of European intellectual thought but scarcely any that captures the pioneering contributions of Africans since the beginning of recorded knowledge in Kmet, a.k.a. Ancient Egypt. Well, that long drought has ended with the publication of Kwarteng’s An Intellectual Biography of Africa: A Philosophical Anatomy of Advancing Africa the Diopian Way. Prepare to be educated.” Milton Allimadi, author of Manufacturing Hate: How Africa Was Demonized in the Media
