**With a Little Help** Cory Doctorow, 2015-07-16 With a Little Help is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. With a Little Help consists of 12 stories, all reprints except for Epoch (commissioned by Mark Shuttleworth).

**Immune Infertility** Walter K.H. Krause, Rajesh K. Naz, 2016-11-02 This book offers comprehensive coverage of both basic and clinical aspects of immune reactions responsible for infertility. It has four sections focusing on Sperm antigens, Antisperm antibodies (ASAs), Clinical impact of ASAs, and Immune contraception, and include contributions from leading experts in these fields. This new edition of the book offers a comprehensive update that reflects the very significant advances in reproductive immunology that have been achieved over the past five years, especially related to the sperm proteome, sperm-egg binding/fusion proteins, gene knockout studies, and immunocontraception. Reproductive immunology continues to be a fast-growing discipline in which new knowledge is emerging almost every day. Immune Infertility is a model source of vital and reliable information on the latest scientific developments in the field. It will be of value for clinicians, scientists, students, residents, and fellows working in reproductive biology, obstetrics and gynecology, and urology.

**Critical Findings in Neuroradiology** Renato Hoffmann Nunes, Ana Lorena Abello, Mauricio Castillo, 2016-04-29 This book provides clear guidance as to which neuroradiological findings in ill or injured patients should be immediately communicated by radiologists and trainees to the emergency room and referring physicians in order to

facilitate key decisions and eliminate preventable errors. It offers a practical and illustrative approach that identifies what to look for and how to report it and describes the required follow-up and the most common differential diagnoses of the main critical findings in neuroradiology. The book is distinctive in being written from a “critical findings perspective”, which makes its content more practical and memorable than that of a standard Emergency Neuroradiology textbook. It also illustrates the value of developing algorithmic approaches to report and communicate critical findings based on lists. While the book will appeal to a broad and variable audience, it is especially addressed to radiology training programs and will be a “must read” for residents and fellows in training.

*A Beat a Week* Glenn Kotche, 2013-09-27 *A Beat a Week*, by Wilco drummer Glenn Kotche, contains 52 unique beats from his recorded catalog. **Abiotic Stress-Mediated Sensing and Signaling in Plants: An Omics Perspective** Sajad Majeed Zargar, Mohammad Yousuf Zargar, 2018-02-20 The natural environment for plants is composed of a complex set of abiotic and biotic stresses; plant

responses to these stresses are equally complex. Systems biology allows us to identify regulatory hubs in complex networks. It also examines the molecular “parts” (transcripts, proteins and metabolites) of an organism and attempts to combine them into functional networks or models that effectively describe and predict the dynamic activities of that organism in different environments. This book focuses on research advances regarding plant responses to abiotic stresses, from the physiological level to the molecular level. It highlights new insights gained from the integration of omics datasets and identifies remaining gaps in our knowledge, outlining additional focus areas for future crop improvement research. Plants have evolved a wide range of mechanisms for coping with various abiotic stresses. In many crop plants, the molecular mechanisms involved in a single type of stress tolerance have since been identified; however, in order to arrive at a holistic understanding of major and common events concerning abiotic stresses, the signaling pathways involved must also be elucidated. To date several molecules, like transcription factors and kinases, have been identified as promising candidates that are involved in crosstalk between stress signalling pathways. However, there is a need to better understand the tolerance mechanisms for different abiotic stresses by thoroughly grasping the signalling and sensing mechanisms involved. Accordingly, this book covers a range of topics, including the impacts of different abiotic stresses on plants, the molecular mechanisms leading to tolerance for different abiotic stresses, signaling cascades revealing cross-talk among various abiotic stresses, and elucidation of major candidate molecules that may provide abiotic stress tolerance in plants.

*Paradoxes of Interactivity* Uwe Seifert, Jin Hyun Kim, Anthony Moore, 2015-09-25

Current findings from anthropology, genetics, prehistory, cognitive and neuroscience indicate that human nature is grounded in a co-evolution of tool use, symbolic communication, social interaction and cultural transmission. Digital information technology has recently entered as a new tool in this co-evolution, and will probably have the strongest impact on shaping the human mind in the near future. A common effort from the humanities, the sciences, art and technology is necessary to understand this ongoing co-evolutionary process. Interactivity is a key for understanding the new relationships formed by humans with social robots as well as interactive environments and wearables underlying this process. Of special importance for understanding interactivity are human-computer and human-robot interaction, as well as media theory and New Media Art. »Paradoxes of Interactivity« brings together reflections on »interactivity« from different theoretical perspectives, the interplay of science and art, and recent technological

developments for artistic applications, especially in the realm of sound.

**Bioresponsive Polymers** Deepa H. Patel, 2020-10-08 This volume, *Bioresponsive Polymers: Design and Application in Drug Delivery*, focuses on recent advancements in bioresponsive polymers and their design, characterization, and applications in varied fields, such as drug delivery and gene delivery. It looks at several carriers for drug delivery and biological molecules using different bioresponsive polymers. To address the many difficulties in existing dosage forms, this book provides information on recent developments to overcome drawbacks of conventional forms of the drug delivery. The chapters cover most areas of bioresponsive polymers, starting with a basic introduction to bioresponsive polymers, followed by chapters on design, characterization, and mechanism of bioresponsive polymers; and applications of drug and gene delivery using bioresponsive polymers via oral, topical, nasal, ocular, and parenteral methods. The book also reviews recent advancements in bioresponsive polymers and advanced applications, such as engineering particulate moieties, biomedical applications, hydrogels as emerging therapy, and electrochemical responses, bioresponsive nanoparticles, and bioresponsive hydrogels.

**Spatial Planning and Sustainable Development** Mitsuhiro Kawakami, Zhen-jiang Shen, Jen-te Pai, Xiao-lu Gao, Ming Zhang, 2013-02-28 This book attempts to provide insights into the achievement of a sustainable urban form, through spatial planning and implementation; here, we focus on planning experiences at the levels of local cities and some metropolitan areas in Asian countries. This book investigates the impact of planning policy on spatial planning implementation, from multidisciplinary viewpoints encompassing land-use patterns, housing development, transportation, green design, and

agricultural and ecological systems in the urbanization process. We seek to learn from researchers in an integrated multidisciplinary platform that reflects a variety of perspectives, such as economic development, social equality, and ecological protection, with a view to achieving a sustainable urban form.

Best Practices in State and Regional Innovation Initiatives National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, 2013-06-04 Most of the policy discussion about stimulating innovation has focused on the federal level. This study focuses on the significant activity at the state level, with the goal of improving the public's understanding of key policy strategies and exemplary practices. Based on a series of workshops and conferences that brought together policymakers along with leaders of industry and academia in a select number of states, the study highlights a rich variety of policy initiatives underway at the state and regional level to foster knowledge based growth and employment. Perhaps what distinguishes this effort at the state level is most of all the high degree of pragmatism. Operating out of necessity, innovation policies at the state level often involve taking advantage of existing resources and recombining them in new ways, forging innovative partnerships among universities, industry and government organizations, growing the skill base, and investing in the infrastructure to develop new technologies and new industries. Many of these initiatives are being guided by leaders from the private sector and universities. The objective of Best Practices in State and Regional Innovation Initiatives: Competing in the 21st Century is not to do an empirical review of the inputs and outputs

of various state programs. Nor is it to evaluate which programs are superior. Indeed, some of the notable successes, such as the Albany nanotechnology cluster, represent a leap of leadership, investment, and sustained commitment that has had remarkable results in an industry that is actively pursued by many countries. The study's goal is to illustrate the approaches taken by a variety of highly diverse states as they confront the increasing challenges of global competition for the industries and jobs of today and tomorrow.

**Transnational Organized Crime** Heinrich-Böll-Stiftung,Regine

Schönenberg,2014-03-31 Transnational organized crime interferes with the everyday lives of more and more people - and represents a serious threat to democracy. By now, organized crime has become an inherent feature of economic globalization, and the fine line between the legal and illegal operation of business networks is blurred. Additionally, few experts could claim to have comprehensive knowledge and understanding of the laws and regulations governing the international flow of trade, and hence of the borderline towards criminal transactions. This book offers contributions from 12 countries around the world authored by 25 experts from a wide range of academic disciplines, representatives from civil society organizations and private industry, journalists, as well as activists. Recognizing the complexity of the issue, this publication provides a cross cultural and multi-disciplinary analysis of transnational organized crime including a historical approach from different regional and cultural contexts.

**Improvement of Crops in the Era of Climatic Changes** Parvaiz Ahmad,Mohd Rafiq

Wani,Mohamed Mahgoub Azooz,Lam-Son Phan Tran,2014-07-28 Abiotic stress drastically limits agricultural crop productivity worldwide. Climate change threatens the sustainable

agriculture with its rapid and unpredictable effects, making it difficult for agriculturists and farmers to respond to the challenges cropping up from environmental stresses. In light of population growth and climate changes, investment in agriculture is the only way to avert wide scale food shortages. This challenge comes at a time when plant sciences are witnessing remarkable progress in understanding the fundamental processes of plant growth and development. Plant researchers have identified genes controlling different aspects of plant growth and development, but many challenges still exist in creating an apt infrastructure, access to bioinformatics and good crop results. Improvement of Crops in the Era of Climatic Changes, Volume 2 focuses on many existing opportunities that can be applied methodically through conventional breeding, without touching upon the latest discoveries such as the power of genomics to applied breeding in plant biology. Written by a diverse faction of internationally famed scholars, this volume adds new horizons in the field of crop improvement, genetic engineering and abiotic stress tolerance. Comprehensive and lavishly illustrated, Improvement of Crops in the Era of Climatic Changes, Volume 2 is a state-of-the-art guide to recent developments vis-à-vis various aspects of plant responses in molecular and biochemical ways to create strong yields and overall crop improvement.

**The Zoroastrian Diaspora** John R. Hinnells, 2005-04-28 What is the distinctive Zoroastrian experience, and what is the common diasporic experience? The Zoroastrian Diaspora is the outcome of twenty years of research and of archival and fieldwork in eleven countries, involving approximately 250,000 miles of travel. It has also involved a survey questionnaire in eight countries, yielding over 1,840 responses. This is the first book to attempt a global comparison of Diaspora groups in six continents. Little has been written about Zoroastrian communities as far apart as China, East Africa, Europe, America, and Australia or on Parsis in Mumbai post-Independence. Each chapter is based on unused original sources ranging from nineteenth century archives to contemporary newsletters. The book also includes studies of Zoroastrians on the Internet, audio-visual

resources, and the modern development of Parsi novels in English. As well as studying the Zoroastrians for their own inherent importance, this book contextualizes the Zoroastrian migrations within contemporary debates on Diaspora studies. John R. Hinnells examines what it is like to be a religious Asian in Los Angeles or London, Sydney or Hong Kong. Moreover, he explores not only how experience differs from one country to another, but also the differences between cities in the same country, for example, Chicago and Houston. The survey data is used firstly to consider the distinguishing demographic features of the Zoroastrian communities in various countries; and secondly to analyse different patterns of assimilation between different groups: men and women and according to the level and type of education. Comparisons are also drawn between people from rural and urban backgrounds; and between generations in religious beliefs and practices, including the preservation of secular culture.
