Sweet Potato Jennifer A. Woolfe,1992-03-05 The sweet potato is at present grown in more than 100 of the independent countries of the world. Most of the producer nations are situated in the tropical developing world where a high proportion of the poorest people live. Increasing recognition of the potential which sweet potato holds for combating food shortages and malnutrition has resulted in intensified research efforts to enhance production and consumption. This book reviews our knowledge about the varied aspects of the sweet potato as a human food and animal feedstuff. This volume will be found practical and informative by all those involved in food and nutrition sciences, especially but not exclusively in developing countries. These include research workers in food or agriculture, dieticians, nutritionists, food technologists, students, planners and policy makers.

Hollyhock Cooks Moreka Jolar,Linda Solomon,2003-06-07 Garden-fresh recipes from an island retreat. Imagine a educational retreat center nestled in the tall forest of an island paradise where the sea laps at the beach below. Now add the most delicious food imaginable, created by a host of talented artist-cooks using vegetables and flowers gathered from the center's lush gardens, and presented with delicate care. Then think of the most well-known

names from the body, mind, and soul circuit who frequently teach here, and the guests who hail from the furthest reaches of the continent. This is Hollyhock. Located on Cortes Island in British Columbia's Georgia Strait, Hollyhock is about nourishing those who work to make the world a better place. It has been attracting visitors like bees to honey for the past twenty-five years-partly because of its delicious food. Now, for the first time, Hollyhock Cooks showcases the best of its globally influenced cuisine, with over 200 recipes including everything from soups and salads to entrées, sauces and spreads, desserts, and drinks. Special chapters focus on how to combine garden with kitchen, and on secrets for cooking for a crowd. And interspersed throughout are comments from the famous Hollyhock presenters-Ram Dass, Eckhart Tolle, Robert Bly, Joan Borysenko and more-on their very favorite dishes. Maharaji said that we should eat only food cooked with love. The food at Hollyhock is tasty, cooked with care and love. I take away a soft sweetness and a fat stomach!-Ram Dass

How Not to Die Michael Greger, M.D., FACLM,Gene Stone,2015-12-08 From the physician behind the wildly popular NutritionFacts website, **How Not to Die** reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In **How Not to Die**, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America-heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more-and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, **How Not to Die** includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day.Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.
