Repairing Your Flooded Home, 2010 When in doubt, throw it out. Don't risk injury or infection. 2: Ask for help. Many people can do a lot of the cleanup and repairs discussed in this book. But if you have technical questions or do not feel comfortable doing something, get professional help. If there is a federal disaster declaration, a telephone hotline will often be publicized to provide information about public, private, and voluntary agency programs to help you recover from the flood. Government disaster programs are there to help you, the taxpayer. You're paying for them; check them out. 3: Floodproof. It is very likely that your home will be flooded again someday. Floodproofing means using materials and practices that will prevent or minimize flood damage in the future. Many floodproofing techniques are inexpensive or can be easily incorporated into your rebuilding program. You can save a lot of money by floodproofing as you repair and rebuild (see Step 8).

Repairing Your Flooded Home Coleen Simmons, 1993-07 Gives step-by-step advice you can use to clean up, rebuild, and get help after a flood. Covers: restoring the utilities, drying out your home, cleaning up, financial assistance, flood proofing, preparing for the next flood, and much more. Illustrated.

On Floods and Photo Ops Paul Martin Lester, 2010 A close study of the visual record left by political visits following disasters Presidents Herbert Clark Hoover and George Walker Bush were challenged many times during their political careers. *On Floods and Photo Ops: How Herbert Hoover and George W. Bush Exploited Catastrophes* focuses on the visual record of two such tests: the relief efforts led by Commerce Secretary Hoover during the 1927 Mississippi River flood and the Bush team's response to Hurricane Katrina. By concentrating on these two historic events, Paul Martin Lester discusses political photography, particularly the use of photo ops during catastrophes. He illuminates the evolution of a genre and explores the differences and similarities between these two American politicians. Hoover and Bush reached the pinnacle of political achievement, only to lose in the court of popular opinion. From two photo ops that occurred almost eighty years apart, Lester offers a model for close readings and comparisons of images in practicing visual history. Under Lester's examination, these otherwise unremarkable photographs speak volumes about political response to natural disasters. He offers readers not just a deeper appreciation of these pictures but a methodology for seriously studying photographs and what they can reveal about a historical moment. Paul Martin Lester is a professor of communications at California State University, Fullerton. He is the author of *Visual Communication: Images with Messages* and *Photojournalism: An Ethical Approach* and coeditor of *Images That Injure: Pictorial Stereotypes in the Media*.

Thinking with Animals Lorraine Daston,Gregg Mitman,2005-02-02 Is anthropomorphism a scientific sin? Scientists and animal researchers routinely warn against animal stories, and contrast rigorous explanations and observation to facile and even fanciful projections about animals. Yet many of us, scientists and researchers included, continue to see animals as humans and humans as animals. As this innovative new collection demonstrates, humans use animals to transcend the confines of self and species; they also enlist them to symbolize, dramatize, and illuminate aspects of humans' experience and fantasy. Humans merge with animals in stories, films, philosophical speculations, and scientific treatises. In their performance with humans on many stages and in different ways, animals move us to think. From Victorian vivisectionists to elephant conservation, from ancient Indian mythology to pet ownership in the contemporary United States, our understanding of both animals and what it means to be human has been shaped by anthropomorphic thinking. The contributors to Thinking with Animals explore the how and why of anthropomorphism, drawing attention to its rich and varied uses. Prominent scholars in the fields of anthropology, ethology, history, and philosophy, as well as filmmakers and photographers, take a closer look at how deeply and broadly ways of imagining animals have transformed humans and animals alike. Essays in the book investigate the changing patterns of anthropomorphism across different time periods and settings, as well as their transformative

effects, both figuratively and literally, upon animals, humans, and their interactions. Examining how anthropomorphic thinking works in a range of different contexts, contributors reveal the ways in which anthropomorphism turns out to be remarkably useful: it can promote good health and spirits, enlist support in political causes, sell products across boundaries of culture of and nationality, crystallize and strengthen social values, and hold up a philosophical mirror to the human predicament.
