Business Games For Management And Economics: Learning By Playing Bazil Leon, 2012-01-30 Business Games for Management and Economics: Learning by Playing presents board and video business games which combine teamwork with individual decisions based on computer models. Business games support integration of learning experience for different levels of education and between different disciplines: economics, management, technological, environmental and social studies. The work is based on experience in adaptation, design and conducting of field, and board and video games played in college settings within standard schedules. Most of the games are played in Modeling and Simulation, Microeconomics, Logistics and Supply Chain Management courses. Game boards are 2- or 3-dimensional displays of subsystems, their components and phases of technological and business processes, which allow customization of games of the same type for different missions in schools, universities, and corporate training centers. The range of games applied to economics and management classes spreads from 2-person games for kid's "Aquarium" up to the REACTOR games for several teams of executives.

When I Grow Up I Want to Be a Farmer Deborah Jacobs, 2012-02 The sun was hot on her head, and the soil beneath her bare feet was silky. The breeze on her face and hair was heavy with humidity, and smelled of sweet prairie grass. A soft drone could be heard from the insects that lived there. It was her favorite place. That farm belonged to Deborah Jacobs' grandparents. It was on their farm that she knew that her future would somehow involve an agriculture profession. Deborah felt the urge to become a farmer for her entire life, so her journey began at a very young age. Her parents preferred city life, so she spent most of her life in urban America. She could never get past the memories of her rural experiences, and when she got the chance to leave the city, she did so. The stories in this book capture Deborah's experiences dealing with the activities of farm living. They seize the transition between wearing dress clothes and pantyhose in an office position, to donning muddy boots to do her job. It is a love story.

Farming While Black Leah Penniman, 2018-10-30 James Beard Foundation Leadership Award 2019: Leah Penniman Choice Reviews, Outstanding Academic Title An extraordinary book...part agricultural guide, part revolutionary manifesto--VOGUE In 1920, 14 percent of all land-owning US farmers were black. Today less than 2 percent of farms are controlled by black people—a loss of over 14 million acres and the result of discrimination and dispossession. While farm management is among the whitest of professions, farm labor is predominantly brown and exploited, and people of color disproportionately live in “food apartheid” neighborhoods and suffer from diet-related illness. The system is built on stolen land and stolen labor and needs a redesign. Farming While Black is the first comprehensive “how to” guide for aspiring African-heritage growers to reclaim their dignity as agriculturists and for all farmers to understand the distinct, technical contributions of African-heritage people to sustainable agriculture. At Soul Fire Farm, author Leah Penniman co-created the Black and Latinx Farmers Immersion (BLFI) program as a container for new farmers to share growing skills in a culturally relevant and supportive environment led by people of color. Farming While Black organizes and expands upon the curriculum of the BLFI to provide readers with a concise guide to all aspects of small-scale farming, from business planning to preserving the harvest. Throughout the chapters Penniman uplifts the wisdom of the African diasporic farmers and activists whose work informs the techniques described—from whole farm planning, soil fertility, seed selection, and agroecology, to using whole foods in culturally appropriate recipes, sharing stories of ancestors, and tools for healing from the trauma associated with slavery and economic exploitation on the land. Woven throughout the book is the story of Soul Fire Farm, a national leader in the food justice movement. The technical information is designed for farmers and gardeners with beginning to intermediate experience. For those with more experience, the book provides a fresh lens on practices that may have been taken for granted as ahistorical or strictly European. Black ancestors and contemporaries have always been leaders—and continue to lead—in the sustainable agriculture and food justice movements. It is time for all of us to listen.

Linking Smallholder Producers to Modern Agri-Food Chains: Case Studies from South Asia, Southeast Asia and China Vijay Paul Sharma, Bill Vorley, Jikun Huang, Abid Qaiyum Suleri, Larry Digal, Thomas A. Reardon, 2013-05-05 This publication examines the processes and impact of market restructuring through comparative in-depth empirical case studies in selected Asian countries, namely, China, India, Indonesia, Philippines, Sri Lanka and Thailand. These countries represent both a broad geographic coverage and a range of stages of market concentration in the region. The country papers address important questions such as what determines the participation of producers in different channels, what is the impact of farmer participation on incomes and what institutional, technological, economic and other reforms are necessary to enhance their effective participation in the emerging and restructuring markets. The case studies attempt to identify major factors that affect smallholder producers' access to output markets, input markets, e.g. seeds, fertilizers, agrochemicals, technology and services such as credit, extension, insurance. Each case study has tried to analyse one specific innovation and these innovations are specific arrangements built on public policies, business initiatives, collective/group action by small-scale producers, etc. that appear to have played a positive role in supporting greater inclusion. The studies aim to derive models, strategies and policy principles to guide public and private sector players in promoting greater participation of small-scale producers in dynamic markets.

Good Husbandry Kristin Kimball, 2020-05-12 From the author of the beloved bestseller *The Dirty Life*, this “superb memoir chronicles the evolution of a farm, marriage, family, and her own personal identity with humor, insight, and candor” (Publishers Weekly, starred review) detailing life on Essex Farm—a 500-acre farm that produces food for a community of 250 people. *The Dirty Life* chronicled Kimball's move from New York City to 500 acres near Lake Champlain where she started a new farm with her partner, Mark. In *Good Husbandry*, she reveals what happened over the next five years at Essex Farm. Farming has many ups and downs, and the middle years were hard for the Kimballs. Mark got injured, the weather turned against them, and the farm faced financial pressures. Meanwhile, they had two small children to care for. How does one traverse the terrain of a maturing marriage and the transition from being a couple to being a family? How will the farm survive? What does a family need in order to be happy? Kristin chose Mark and farm life after having a good look around the world, with a fair understanding of what her choices meant. She knew she had traded the possibility of a steady paycheck, of wide open weekends and spontaneous vacations, for a life and work that was challenging but beautiful and fulfilling. So with grit and grace and a good sense of humor, she chose to dig in deeper. Featuring some of the same local characters and cherished animals first introduced in *The Dirty Life*, (Jet the farm dog, Delia the dairy cow, and those hardworking draft horses), plus a colorful cast of aspiring first-generation farmers who work at Essex Farm to acquire the skills they need to start sustainable farms of their own, *Good Husbandry* “considers what it means to build a good, happy life, and how we are tested in that endeavor” (Mary Beth Keane, New York Times bestselling author of *Ask Again, Yes*).

So God Made A Farmer Levi Lyle,2021-07-29 Paul Harvey would be proud of Levi Lyle. He truly embodies what it means to be a steward of the land. He has shown that working with nature can not only improve the environment, but can be financially profitable as well. Dale Hilgenkamp, President, American Aronia Berry Association With farmers facing climate challenges now more than ever – we need bold leaders and innovative strategies to reshape U.S. food and farm policy. Levi calls us to action to revitalize the American farm and revolutionize the future of farming in the U.S. Rosalyn Lehman, Executive Director, Iowa Organic Association Levi exposes the fundamental flaws in our system of modern, industrialized agriculture and lays out a regenerative vision for the future of agriculture. Tom Wahl, Red Fern Farm Levi lights a hopeful path forward... Christophe Jospe, President, Carbon A List 'This book shows a deep understanding of the land and a well-honed perspective of the many intricacies of life as a farmer. Patrick O'Malley, Ph.D., Native Fruit Association Levi is not just a philosopher of the history and culture of agriculture; he is an innovative farmer who marries technology with ecology. Francis Thicke, Soil scientist and organic farmer In a state dominated by mono-cropped GMO corn and soybeans and hog factory farms, sixth-generation farmer Levi Lyle offers a new, comprehensive, and holistic, yet practical vision to regenerate rural Iowa-and America-that he thoughtfully and eloquently presents in *So God Made a Farmer: A Retrospective on The Living Words of Paul Harvey* by an Organic Farmer. Levi sees the problems with the current corporate-dominated industrial agriculture methods that are eroding Iowa's rich soils, polluting its waterways, and hollowing out its once vibrant small towns. But Levi's thoughtful message is not one of division but one of hope, aiming to bring people together to revive rural communities. Levi's perspective is solidly grounded on his family farm with its diversified production based on organic and regenerative agriculture practices. Levi Lyle is not only a farmer, but in his prolific writings, such as *So God Made a Farmer*, he is also an eloquent spokesperson for a new vision of agriculture that is quickly gaining ground in America and around the world. In this way, Levi Lyle may become the Wendell Berry of his generation. Ken Roseboro, editor, *The Organic & Non-GMO Report*

Birth, Death, and a Tractor Kelly Payson-Roopchand,2015-06-15 Once there were no stone walls. For the fiercely idealistic Yankee homesteader, a small family farm was worth fighting for, and the rocky soil yielded far more than walls. Cleared and plowed, it fed a family and provided a living. Oxen gave way to horses, horses to tractors, and still the farm persisted and the family persevered, each generation overcoming the challenges of their day. Two hundred years later, the farm, ever generous in its rewards, has not changed; but society has shifted, forgetting its connection to the land that nourishes us. It is time we remembered. *Birth, Death and a Tractor* is the story of a small family farm in Somerville, Maine, from its settling in the early 1800s to its perilous transfer to a new farm family in 2008. Chronicling the history of seven generations, it is a reminder of the role small farms have played in our national and family histories, and a challenge to find innovative ways to re-connect our communities to this rich but threatened resource.

A Farm Dies Once a Year Arlo Crawford,2014-04-01 A Book of the Month for GQ, The New Yorker, and Flavorwire Beautifully told...In this one season of life, Crawford's writing about the work, people, nature and his family legacy reveals much about a simple life, and reminds us all to appreciate life's riches.–Seattle Post Intelligencer A must-read...–Washington Independent Review of Books An intimate, gorgeously observed memoir about family and farming that forms a powerful lesson in the hard-earned risks that make life worth living The summer he was thirty-one, Arlo Crawford returned home for the summer harvest at New Morning Farm—seventy-five acres tucked in a hollow in south-central Pennsylvania where his parents had been growing organic vegetables for almost forty years. Like many summers before, Arlo returned to the family farm's familiar rhythms—rise, eat, bend, pick, sort, sweat, sleep. But this time he was also there to change his direction, like his father years ago. In the 1970s, well before the explosion of the farm-to-table and slow food movement, Arlo's father, Jim, left behind law school and Vietnam, and decided to give farming a try. Arlo's return also prompts a reexamination of a past tragedy: the murder of a neighboring farmer twenty years before. A chronicle of one full season on a farm, with all its small triumphs and inevitable setbacks, *A Farm Dies Once a Year* is a meditation on work—the true nature of it, and on taking pride in it—and a son's reckoning with a father's legacy. Above all, it is a striking portrait of how one man builds, sows, and harvests his way into a new understanding of the risks necessary to a life well-lived.

For the Love of Farming Farmer Will,2023-10-17 In *For the Love of Farming*, Farmer Will reveals his life on the farm, season by season. It's relentless: the mornings are early and sometimes things don't go right, but is it fun? Would he be dancing otherwise??
