Business Games For Management And Economics: Learning By Playing Bazil Leon,2012-01-30 Business Games for Management and Economics: Learning by Playing presents board and video business games which combine teamwork with individual decisions based on computer models. Business games support integration of learning experience for different levels of education and between different disciplines: economics, management, technological, environmental and social studies. The work is based on experience in adaptation, design and conducting of field, and board and video games played in college settings within standard schedules. Most of the games are played in Modeling and Simulation, Microeconomics, Logistics and Supply Chain Management courses. Game boards are 2- or 3-dimensional displays of subsystems, their components and phases of technological and business processes, which allow customization of games of the same type for different missions in schools, universities, and corporate training centers. The range of games applied to economics and management classes spreads from 2-person games for kid's "Aquarium" up to the REACTOR games for several teams of executives.

Rule of Two: Star Wars Legends (Darth Bane) Drew Karpysyn,2011-06-28 In this essential Star Wars Legends novel, the second in the Darth Bane trilogy, the fearsome Sith lord takes on a deadly new apprentice. Darth Bane's twisted genius made him a natural leader among the Sith—until his radical embrace of an all-but-forgotten wisdom drove him to destroy his own order . . . and create it anew from the ashes. As the last surviving Sith, Darth Bane promulgated a harsh new directive: the Rule of Two. Two there should be; no more, no less. One to embody the power, the other to crave it. Now Darth Bane is ready to put his policy into action and thinks he has found the key element that will make his triumph complete: a student to train in the ways of the dark side. Though she is young, Zannah possesses an instinctive link to the dark side that rivals his own. With his guidance, she will become essential in his quest to destroy the Jedi and dominate the galaxy.

Museum of Thieves Lian Tanner,2010-09-28 Welcome to the tyrannical city of Jewel, where impatience is a sin and boldness is a crime. Goldie Roth has lived in Jewel all her life. Like every child in the city, she wears a silver guardchain and is forced to obey the dreaded Blessed Guardians. She has never done anything by herself and won't be allowed out on the streets unchained until Separation Day. When Separation Day is canceled, Goldie, who has always been both impatient and bold, runs away, risking not only her own life but also the lives of those she has left behind. In the chaos that follows, she is lured to the mysterious Museum of Dunt, where she meets the boy Toadspit and discovers terrible secrets. Only the cunning mind of a thief can understand the museum's strange, shifting rooms. Fortunately, Goldie has a talent for thieving. Which is just as well, because the leader of the Blessed Guardians has his own plans for the museum—plans that threaten the lives of everyone Goldie loves. And it will take a daring thief to stop him. . . . Museum of Thieves is a thrilling tale of destiny and danger, and of a courageous girl who has never been allowed to grow up—until now.

The Garland Handbook of African Music Ruth M. Stone,2010-04-02 The Garland Handbook of African Music is comprised of essays from The Garland Encyclopedia of World Music: Volume 1, Africa, (1997). Revised and updated, the essays offer detailed, regional studies of the different musical cultures of Africa and examine the ways in which music helps to define the identity of this particular area. Part One provides an in-depth introduction to Africa. Part Two focuses on issues and processes, such as notation and oral tradition, dance in communal life, and intellectual property. Part Three focuses on the different regions, countries, and cultures of Africa with selected regional case studies. The second edition has been expanded to include exciting new scholarship that has been conducted since the first edition was published. Questions for Critical Thinking at the end of each major section guide and focus attention on what musical and cultural issues arise when one studies the music of Africa - - issues that might not occur in the study of other musics of the world. An accompanying audio compact disc offers musical examples of some of the music of Africa.

Black Feminist Anthropology Irma McClaurin,2001 In the discipline's early days, anthropologists by definition were assumed to be white and male. Women and black scholars were relegated to the field's periphery. From this marginal place, white feminist anthropologists have successfully carved out an acknowledged intellectual space, identified as feminist anthropology. Unfortunately, the works of black and non-western feminist anthropologists are rarely cited, and they have yet to be respected as significant shapers of the direction and transformation of feminist anthropology. In this volume, Irma McClaurin has collected—for the first time—essays that explore the role and contributions of black feminist anthropologists. She has asked her contributors to disclose how their experiences as black women have influenced their anthropological practice in Africa, the Caribbean, and the United States, and how anthropology has influenced their development as black feminists. Every chapter is a unique journey that enables the reader to see how scholars are made. The writers present material from their own fieldwork to demonstrate how these experiences were shaped by their identities. Finally, each essay suggests how the author's field experiences have influenced the theoretical and methodological choices she has made throughout her career. Not since Diane Wolf's *Feminist Dilemmas in the Field* or Hortense Powdermaker's *Stranger and Friend* have we had such a breadth of women anthropologists discussing the critical (and personal) issues that emerge when doing ethnographic research.

Multi-UAS Minimum Time Search in Dynamic and Uncertain Environments Sara Pérez Carabaza,2021 This book proposes some novel approaches for finding unmanned aerial vehicle trajectories to reach targets with unknown location in

minimum time. At first, it reviews probabilistic search algorithms that have been used for dealing with the minimum time search (MTS) problem, and discusses how metaheuristics, and in particular the ant colony optimization algorithm (ACO), can help to find high-quality solutions with low computational time. Then, it describes two ACO-based approaches to solve the discrete MTS problem and the continuous MTS problem, respectively. In turn, it reports on the evaluation of the ACO-based discrete and continuous approaches to the MTS problem in different simulated scenarios, showing that the methods outperform in most all the cases over other state-of-the-art approaches. In the last part of the thesis, the work of integration of the proposed techniques in the ground control station developed by Airbus to control ATLANTIS UAV is reported in detail, providing practical insights into the implementation of these methods for real UAVs.

Eclipse 3 Jonathan Strahan, 2009-10-01 To observe an eclipse is to witness a rare and unusual event. Under darkened skies the sun becomes a negative image of itself, its corona transforming the landscape into a strange space where anything might happen, and any story may be true... In the spirit of classic science fiction anthologies such as *Universe*, *Orbit*, and *Starlight*, master anthologist Jonathan Strahan (The Best Science Fiction and Fantasy of the Year) presents the non-themed genre anthology *Eclipse: New Science Fiction and Fantasy*. Here you will find stories where strange and wonderful things happen--where reality is eclipsed by something magical and new. Continuing in the footsteps of the multiple-award-nominated anthologies *Eclipse One* and *Eclipse Two*, *Eclipse Three* delivers new fiction by some of the genre's most celebrated authors, including Karen Joy Fowler's story of a family's desperation and a rebellious young woman's strange incarceration; Ellen Klages's fable of a practical girl, an unusual tortoise, and an ancient mathematical puzzle; Pat Cadigan's story of a mysterious photograph and two friends' journey through space and time in order to solve its riddle; Jeffrey Ford's tale of a legendary sword imbued with the power to turn flesh to coral, and of the artist that wields it; Daniel Abraham's story of divine providence, sacred oaths, and the omens that indicate whether a man is fit to be king; and Caitlin R. Kiernan's chronicle of an astronaut whose memories of a lover lost to an alien intelligence haunt her.

Puzzles and Brain Teasers Reader's Digest Editors, Robert Dolezal, Reader's Digest, 2004-10 An intriguing collection of over a thousand specially commissioned riddles, mysteries, and verbal conundrums, this one-of-a-kind collection is guaranteed to build analytical, creative, and practical thinking power while bringing hours of fun and entertainment. All rated with a level of difficulty from 1 to 3, the puzzles will strengthen a wide spectrum of mental skills.

Tiger Eye Marjorie Liu, 2010-06-03 An antique Chinese box unlocks a world of adventure for a psychically gifted woman in this fantasy by a New York Times–bestselling author. The first book in the extraordinary Dirk & Steele Series! Long ago they roamed the earth—dragons, tigers . . . shapeshifters—men who wore the forms of beasts. Their world was magic. Now it is gone. But some remain . . . He looks out of place in Dela Reese's Beijing hotel room—exotic and poignant, some mythic, tragic hero of an epic tale. With his feline yellow eyes, he's like nothing from her world. Yet Dela has danced through the echo of his soul and knows this warrior will obey her every command. Hari has been used and abused for millennia. But he sees, upon his release from the riddle box, that this new mistress is different. There is a hidden power in Dela's eyes—and with her, he may regain all that was lost to him. Where once he savaged, now he must protect; where before he knew only hatred, now he must embrace love. Dela is the key. For Dela, he will risk all. Praise for *Tiger Eye* “[A] first-rate debut. . . . The romance between Delilah and Hari tantalizingly builds until it culminates in a sensual love scene. . . . [A] striking paranormal romance.” —Publishers Weekly “Liu's debut novel, not unlike the puzzle box, holds a shiny new joy for readers of adventure and paranormal romance. Deeply sensual, a marriage of modern fantasy and ancient mysticism highlighted with a touch of humor, this is the next book fans of Sherrilyn Kenyon or Christine Feehan should read.” —Booklist

Water Pollution and Water Quality Control of Selected Chinese Reservoir Basins Tinglin Huang, 2015-10-02 This volume provides a detailed overview of water pollution and control of several selected Chinese reservoirs. It explores sediment contamination as well as algal blooms and their impact on water quality. Several chapters also discuss various methods of quality control, such as mixing-oxygenation combined with microbial remediation technologies. Due to their broad geographical distribution and different nutrition levels, the investigated reservoirs, the Jinpen, Shibiyan, Fenhe, Zhelin and Zhoucun reservoirs, can be regarded as representative for China. This comprehensive work will appeal to researchers, advanced students and reservoir managers.
