**Life as We Made It** Beth Shapiro, 2021-10-19 From the first dog to the first beefalo, from farming to CRISPR, the human history of remaking nature When the 2020 Nobel Prize was awarded to the inventors of CRISPR, the revolutionary gene-editing tool, it underlined our amazing and apparently novel powers to alter nature. But as biologist Beth Shapiro argues in *Life as We Made It*, this phenomenon isn't new. Humans have been reshaping the world around us for ages, from early dogs to modern bacteria modified to pump out insulin. Indeed, she claims, reshaping nature—resetting the course of evolution, ours and others'—is the essence of what our species does. In exploring our evolutionary and cultural history, Shapiro finds a course for the future. If we have always been changing nature to help us survive and thrive, then we need to avoid naive arguments about how we might destroy it with our meddling, and instead ask how we can meddle better. Brilliant and insightful, *Life as We Made It* is an essential book for the decades to come.

It was a place of mercurial cliques and mysterious rules where teachers were constantly reminding their charges of how special they were. Now, years later, Kathy is a young woman. Ruth and Tommy have reentered her life. And for the first time she is beginning to look back at their shared past and understand just what it is that makes them special—and how that gift will shape the rest of their time together.

She knows that other humans exist because of a very special item she treasures ~ a scrap of cardboard on which is depicted a young girl, an adult, and a robot along with the strange word WondLa. Tony DiTerlizzi honours traditional children's literature in this totally original space age adventure: one that is as complex as an alien planet, but as simple as a child's wish for a place to belong.

**The Book of Adam** Robert M. Hopper, 2010-02-22 2010 Literary Award Finalist - Santa Fe Writers Project: Adam's intimate memoir draws us into a world in which it becomes common to have your genetic twin born after your death. We see this world through the first clone's unique perspective - the bigotry he faces as a youth, haunting dreams of the man from whom he was cloned, and Adam's inner search for his soul. It's a search that's shadowed by his

fear of death, and by an inter-generational family drama in which, like the House of Atreus, the players seem fated to struggle with the sins of the father.

**Google and the Law** Aurelio Lopez-Tarruella, 2012-02-22 Google's has proved to be one of the most successful business models in today's knowledge economy. Its services and applications have become part of our day-to-day life. However, Google has repeatedly been accused of acting outside the law in the development of services such as Adwords, Googlebooks or YouTube. One of the main purposes of this book is to assess whether those accusations are well-founded. But more important than that, this book provides a deeper reflection: are current legal systems adapted to business models such as that of Google or are they conceived for an industrial economy? Do the various lawsuits involving Google show an evolution of the existing legal framework that might favour the flourishing of other knowledge-economy businesses? Or do they simply reflect that Google has gone too far? What lessons can other knowledge-based businesses learn from all the disputes in which Google has been or is involved? This book is valuable reading for legal practitioners and academics in the field of information technologies and intellectual property law, economists interested in knowledge-economy business models and sociologists interested in internet and social networks. Dr. Aurelio Lopez-Tarruella is Senior Lecturer in Private International Law at the University of Alicante, Spain.

**Star Wars in the Public Square** Derek R. Sweet, 2015-12-01 Speculative science fiction, with its underlying socio-political dialogue, represents an important intersection of popular culture and public discourse. As a pop culture text, the animated series Star Wars: The Clone Wars offers critical commentary on contemporary issues, marking a moment of interplay whereby author and audience come together in what Russian philosopher Mikhail Bakhtin called collaborative meaning making. This book critically examines the series as a voice in the political dialogues concerning human cloning, torture, just war theory, peace and drone warfare.

Fortunately, through a wild chance of birth, he was born with powerful wizard magic, the first in his family in generations. If he can obtain a familiar to amplify his magic, a highborn daughter he can marry, to be mother to his children, he'll be that much closer to saving his family. With her by his side, he can ascend to such a position of power in the Convocation that he can destroy it forever. Lady Veronica Elal, captive in her tower, has only one way out. To her bitter disappointment, she will never be a wizard. Instead, through a twist of fate, and despite her expensive Convocation Academy education, Nic is doomed to be a familiar like her mother. Forced to participate in the Betrothal Trials, she receives a wizard suitor for one night each month. Whichever man impregnates her will bond her to them forever. With no choice but to serve the one who wins her, Nic has one hope for control over her life: a wizard she can manipulate. **Double Identity** Margaret Peterson Haddix, 2008-06-20 So my only protection is a kindergarten teacher and a ninety-eight-pound female minister....And they don't even believe I'm in danger. As Bethany approaches her thirteenth birthday, her parents begin acting more oddly than usual: Her mother cries constantly, and her father barely lets Bethany out of his sight. Then one morning he hustles the entire family into the car, drives across several state lines -- and leaves Bethany with an aunt she never knew existed. Bethany has no idea what's going on. She's worried that her mom and dad are running from some kind of trouble, but she can't find out because they won't tell her where they are going. Bethany's only clue is a few words she overheard her father tell her aunt Myrlie: She doesn't know anything about Elizabeth. But Aunt Myrlie won't tell Bethany who Elizabeth is, and she won't explain why people in her small town react to Bethany as if they've seen a ghost. The mystery intensifies when Bethany gets a package from her father containing four different birth certificates from four states, with four different last names -- and thousands of dollars in cash. And when a strange man shows up asking questions, Bethany realizes she's not the only one who's desperate to unravel the secrets of her past. In this exhilarating thriller, Margaret Peterson Haddix crafts a taut story so full of twists and turns, readers will be gripped until the startling conclusion.

Jason 3:3—known as Martyr—always believed his life had purpose. The problem is no such pandemic exists. Unaware of the truth, Martyr wishes for one glimpse of the sky before his expiration date arrives. His escape leads him to the home of one of the scientists, and to Abby Goyer. As she helps Martyr, she can't help but notice his uncanny resemblance to the high school quarterback. Abby soon uncovers the dark truth behind Jason Farms and her dad's work, and decides to show Martyr his true value and worth. As Martyr learns the truth behind his existence, he must decide if his God-given purpose is connected to the farm, or if it rests in a life with Abby.

**Data-Intensive Text Processing with MapReduce** Jimmy Lin, Chris Dyer, 2022-05-31 Our world is being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an

execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-to-understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader think in MapReduce, but also discusses limitations of the programming model as well. Table of Contents: Introduction / MapReduce Basics / MapReduce Algorithm Design / Inverted Indexing for Text Retrieval / Graph Algorithms / EM Algorithms for Text Processing / Closing Remarks
