Term Limits in State Legislatures John M. Carey,Richard G. Niemi,Lynda W. Powell,2009-11-12 It has been predicted that term limits in state legislatures--soon to be in effect in eighteen states--will first affect the composition of the legislatures, next the behavior of legislators, and finally legislatures as institutions. The studies in Term Limits in State Legislatures demonstrate that term limits have had considerably less effect on state legislatures than proponents predicted. The term-limit movement--designed to limit the maximum time a legislator can serve in office--swept through the states like wildfire in the first half of the 1990s. By November 2000, state legislators will have been term limited out in eleven states. This book is based on a survey of nearly 3,000 legislators from all fifty states along with intensive interviews with twenty-two legislative leaders in four term-limited states. The data were collected as term limits were just beginning to take effect in order to capture anticipatory effects of the reform, which set in as soon as term limit laws were passed. In order to understand the effects of term limits on the broader electoral arena, the authors also examine data on advancement of legislators between houses of state legislatures and from the state legislatures to Congress. The results show that there are no systematic differences between term limit and non-term limit states in the composition of the legislature (e.g., professional backgrounds, demographics, ideology). Yet with respect to legislative behavior, term limits decrease the time legislators devote to securing pork and heighten the priority they place on the needs of the state and on the demands of conscience relative to district interests. At the same time, with respect to the legislature as an institution, term limits appear to be redistributing power away from majority party leaders and toward governors and possibly legislative staffers. This book will be of interest both to political scientists, policymakers, and activists involved in state politics. John M. Carey is Assistant Professor of Political Science, Washington University in St. Louis. Richard G. Niemi is Professor of Political Science, University of Rochester. Lynda W. Powell is Professor of Political Science, University of Rochester.

Complex, Intelligent and Software Intensive Systems Leonard Barolli,Kangbin Yim,Tomoya Enokido,2021-06-29 This book includes the proceedings of the 15th International Conference on Complex, Intelligent, and Software Intensive Systems, which took place in Asan, Korea, on July 1–3, 2021. Software intensive systems are systems, which heavily interact with other systems, sensors, actuators, devices, and other software systems and users. More and more domains are involved with software intensive systems, e.g., automotive, telecommunication systems, embedded systems in general, industrial automation systems, and business applications. Moreover, the outcome of web services delivers a new platform for enabling software intensive systems. Complex systems research is focused on the overall understanding of systems rather than its components. Complex systems are very much characterized by the changing environments in which they act by their multiple internal and external interactions. They evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents, which is each time more characterized by the use of ontologies and their logical foundations build a fruitful impulse for both software intensive systems and complex systems. Recent research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is very important factor for the future development and innovation of software intensive and complex systems. The aim of the book is to deliver a platform of scientific interaction between the three interwoven challenging areas of research and development of future ICT-enabled applications: Software intensive systems, complex systems, and intelligent systems.

Brand Admiration C. Whan Park, Deborah J. MacInnis, Andreas B. Eisingerich, 2016-09-16 Brand Admiration uses deep research on consumer psychology, marketing, consumer engagement and communication to develop a powerful, integrated perspective and innovative approach to brand management. Using numerous real-world examples and backed by research from top notch academics, this book describes how companies can turn a product, service, corporate, person or place brand into one that customers love, trust and respect; in short, how to make a brand admired. The result? Greater brand loyalty, stronger brand advocacy, and higher brand equity. Admired brands grow more revenue in a more efficient way over a longer period of time and with more opportunities for growth. The real power of Brand Admiration is that it provides concrete, actionable guidance on how brand managers can make customers (and employees) admire a brand. Admired brands don't just do the job; they offer exactly what customers need (enabling benefits), in way that's pleasing, fun, interesting, and emotionally involving (enticing benefits), while making people feel good about themselves (enriching benefits). Providing these benefits, called 3 Es, is foundational to building , strengthening and leveraging brand admiration. In addition, the authors articulate a common-sense and action based measure of brand equity, and they develop dashboard metrics to diagnose if there are any 'canaries in the coal mine', and if so, what to do next. In short, Brand Admiration provides a coherent, cohesive approach to helping the brand stand the test of time. A well-designed, well-managed brand becomes a part of the public consciousness, and ultimately, a part of the culture. This trajectory is the fruit of decisions made from an integrated strategic standpoint. This book shows you how to shift the process for your brand, with practical guidance and an analytical approach.

For twenty years my company M-CAM has been monitoring possible violations of the 1925 Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or other Gases and of Bacteriological Methods of Warfare (the Geneva Protocol) 1972 Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological and Toxin Weapons and Their Destruction (the BTWC). In our 2003-2004 Global Technology Assessment: Vector Weaponization M-CAM highlighted China's growing involvement in Polymerase Chain Reaction (PCR) technology with respect to joining the world stage in chimeric construction of viral vectors. Since that time, on a weekly basis, we have monitored the development of research and commercial efforts in this field, including, but not limited to, the research synergies forming between the United States Centers for Disease Control and Prevention (CDC), the National Institutes for Allergies and Infectious Diseases (NIAID), the University of North Carolina at Chapel Hill (UNC), Harvard University, Emory University, Vanderbilt University, Tsinghua University, University of Pennsylvania, many other research institutions, and their commercial affiliations. The National Institute of Health's grant AI23946-08 issued to Dr. Ralph Baric at the University of North Carolina at Chapel Hill (officially classified as affiliated with Dr. Anthony Fauci's NIAID by at least 2003) began the work on synthetically altering the Coronaviridae (the coronavirus family) for the express purpose of general research, pathogenic enhancement, detection, manipulation, and potential therapeutic interventions targeting the same. As early as May 21, 2000, Dr. Baric and UNC sought to patent critical sections of the coronavirus family for their commercial benefit. In one of the several papers derived from work sponsored by this grant, Dr. Baric published what he reported to be the full length cDNA of SARS

CoV in which it was clearly stated that SAR CoV was based on a composite of DNA segments. Using a panel of contiguous cDNAs that span the entire genome, we have assembled a full-length cDNA of the SARS-CoV Urbani strain, and have rescued molecularly cloned SARS viruses (infectious clone SARS-CoV) that contained the expected marker mutations inserted into the component clones. On April 19, 2002 - the Spring before the first SARS outbreak in Asia - Christopher M. Curtis, Boyd Yount, and Ralph Baric filed an application for U.S. Patent 7,279,372 for a method of producing recombinant coronavirus. In the first public record of the claims, they sought to patent a means of producing, an infectious, replication defective, coronavirus. This work was supported by the NIH grant referenced above and GM63228. In short, the U.S. Department of Health and Human Services was involved in the funding of amplifying the infectious nature of coronavirus between 1999 and 2002 before SARS was ever detected in humans. Against this backdrop, we noted the unusual patent prosecution efforts of the CDC, when on April 25, 2003 they sought to patent the SARS coronavirus isolated from humans that had reportedly transferred to humans during 2002-2003 SARS outbreak in Asia. 35 U.S.C. §101 prohibits patenting nature. This legality did not deter CDC in their efforts. Their application, updated in 2007, ultimately issued as U.S. Patent 7,220,852 and constrained anyone not licensed by their patent from manipulating SARS CoV, developing tests or kits to measure SARS coronavirus in humans or working with their patented virus for therapeutic use. International Human Resource Management Michael Dickmann, Paul Sparrow, 2008-04-18 Conducting business across national borders is nothing new; the Knights Templar were banking internationally as long ago as 1135. But modern globalization processes raise different challenges, and as the world becomes smaller and labour movements more common, an international understanding of human resource management is essential. The second edition of International HRM provides a fully updated and revised analysis of this important area. Its innovative, multi-disciplinary approach allows a holistic picture to emerge in which key issues are assessed from organizational, individual and societal perspectives. The collection is divided into three parts: the contemporary internationalization context the management of international employees strategic issues facing international HR managers. Supported by new research, and including work from eminent writers in the field, this book discusses issues as diverse as the relative absence of women in international work, the ethical merits of localization, and the context faced by organizations like the United Nations. It is a valuable tool for all students, researchers and practitioners working in international business and human resource management.

Older Tourist Behavior and Marketing Tools Vania Vigolo,2017-04-07 This book provides an in-depth analysis of the older-tourist market, and of the challenges and opportunities created by population ageing from a tourism marketing perspective, by combining a demand-side and a supply-side approach to older tourists. The book is divided into three parts, the first of which defines older tourists and presents a critical review of segmentation approaches. The second part then focuses on the behavior of older tourists in terms of the travel planning process, the use of information and communication technologies for travel purposes, and accommodation choices. The final part analyzes the marketing strategies and operative practices of three tourism companies that focus on the older-adult market. Practical implications for tourism suppliers willing to target older tourists are derived. The book is intended primarily for academics, researchers, and professionals in the tourism and hospitality industry. In addition, it will be useful for students attending advanced tourism and hospitality courses.

The City of Tomorrow Carlo Ratti,Matthew Claudel,2016-06-28 Since cities emerged ten thousand years ago, they have become one of the most impressive artifacts of humanity. But their evolution has been anything but linear—cities have gone through moments of radical change, turning points that redefine their very essence. In this book, a renowned architect and urban planner who studies the intersection of cities and technology argues that we are in such a moment. The authors explain some of the forces behind urban change and offer new visions of the many possibilities for tomorrow’s city. Pervasive digital systems that layer our cities are transforming urban life. The authors provide a front-row seat to this change. Their work at the MIT Senseable City Laboratory allows experimentation and implementation of a variety of urban initiatives and concepts, from assistive condition-monitoring bicycles to trash with embedded tracking sensors, from mobility to energy, from participation to production. They call for a new approach to envisioning cities: futurecraft, a symbiotic development of urban ideas by designers and the public. With such participation, we can collectively imagine, examine, choose, and shape the most desirable future of our cities.

The Concise APA Handbook Paul Chamness Iida,Rachael Ruegg,Naoko Araki,Mary Frances Agnello,Mark de Boer,2017-02-01 Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all teach at the same university, where their current off-the-shelf reference book, while helpful, is filled with a lot of extra information that they do not use and contains missing or incorrect information. The cost of this book also continues to rise. In a search for something else to meet their needs, they discovered that there are no concise guides that deal with APA only that are cost effective or user-friendly for students who are not familiar with using references and formatting an essay in the APA format. In order to offer student writers a source of information that is concise and cost-effective, the authors have written this handbook to provide students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials present the nitpicky details of APA in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that will make sense to both undergraduate and graduate student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this information in a concise and easy-to-understand format.

Responsible Consumption and Production Walter Leal Filho,Anabela Marisa Azul,Luciana Brandli,Pinar Gökcin Özuyar,Tony Wall,2020-03-04 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. The United Nations has acknowledged the problem and approved the “2030 Agenda for Sustainable Development”. On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of

the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 12, namely Ensure sustainable consumption and production patterns and contains the description of a range of terms, which allows a better understanding and fosters knowledge. Concretely, the defined targets are: Implement the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries Achieve the sustainable management and efficient use of natural resources Halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses Achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment Substantially reduce waste generation through prevention, reduction, recycling and reuse Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle Promote public procurement practices that are sustainable, in accordance with national policies and priorities Ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production Develop and implement tools to monitor sustainable development impacts for sustainable tourism that creates jobs and promotes local culture and products Rationalize inefficient fossil-fuel subsidies that encourage wasteful consumption by removing market distortions, in accordance with national circumstances, including by restructuring taxation and phasing out those harmful subsidies, where they exist, to reflect their environmental impacts, taking fully into account the specific needs and conditions of developing countries and minimizing the possible adverse impacts on their development in a manner that protects the poor and the affected communities Editorial Board Medani P.
