**Tomos Roberts (Tomfoolery)**

The Great Realization Tomos Roberts (Tomfoolery),2020-09-01 Selected by Today as a book to ease kids' anxiety about coronavirus." We all need hope. Humans have an extraordinary capacity to battle through adversity, but only if they have something to cling onto: a belief or hope that maybe, one day, things will be better. This idea sparked The Great Realization. Sharing the truths we may find hard to tell but also celebrating the things—from simple acts of kindness and finding joy in everyday activities, to the creativity within us all—that have brought us together during lockdown, it gives us hope in this time of global crisis. Written for his younger brother and sister in response to the Covid-19 pandemic, Tomos Roberts's heartfelt poem is as timely as it is timeless. Its message of hope and resilience, of rebirth and renewal, has captured the hearts of children and adults all over the globe—and the glimpse it offers of a fairer, kinder, more sustainable world continues to inspire thousands every day. With Tomos Roberts's heartfelt poem and beautiful illustrations by award-winning artist Nomoco, The Great Realization is a profound work, at once striking and reassuring, reminding readers young and old that in the face of adversity there are still dreams to be dreamt and kindnesses to be shared and hope. There is still hope. We now call it The Great Realization and, yes, since then there have been many. But that's the story of how it started . . . and why hindsight's 2020.

**The Unspoken Rules** Gorick Ng,2021-04-27 Named one of 10 Best New Management Books for 2022 by Thinkers50 A Wall Street Journal Bestseller ...this guide provides readers with much more than just early careers advice; it can help everyone from interns to CEOs. — a Financial Times top title You've landed a job. Now what? No one tells you how to navigate your first day in a new role. No one tells you how to take ownership, manage expectations, or handle workplace politics. No one tells you how to get promoted. The answers to these professional unknowns lie in the unspoken rules—the certain ways of doing things that managers expect but don't explain and that top performers do but don't realize. The problem is, these rules aren't taught in school. Instead, they get passed down over dinner or from mentor to mentee, making for an unlevel playing field, with the insiders getting ahead and the outsiders stumbling along through trial and error. Until now. In this practical guide, Gorick Ng, a first-generation college student and Harvard career adviser, demystifies the unspoken rules of work. Ng distills the wisdom he has gathered from over five hundred interviews with professionals across industries and job types about the biggest mistakes people make at work. Loaded with frameworks, checklists, and talking points, the book provides concrete strategies you can apply immediately to your own situation and will help you navigate inevitable

questions, such as: How do I manage my time in the face of conflicting priorities? How do I build relationships when I'm working remotely? How do I ask for help without looking incompetent or lazy? *The Unspoken Rules* is the only book you need to perform your best, stand out from your peers, and set yourself up for a fulfilling career.

*The Social Media Age* Zoetanya Sujon, 2021-04-07 Exploring power and participation in a connected world. Social media are all around us. For many, they are the first things to look at upon waking and the last thing to do before sleeping. Integrated seamlessly into our private and public lives, they entertain, inform, connect (and sometimes disconnect) us. They're more than just social though. In addition to our experiences as everyday users, understanding social media also means asking questions about our society, our culture and our economy. What we find is dense connections between platform infrastructures and our experience of the social, shaped by power, shifting patterns of participation, and a widening ideology of connection. This book introduces and examines the full scope of social media. From the social to the technological, from the everyday to platform industries, from the personal to the political. It brings together the key concepts, theories and research necessary for making sense of the meanings and consequences of social media, both hopefully and critically. Dr Zoetanya Sujon is a Senior Lecturer and Programme Director for Communications and Media at London College of Communication, University of the Arts London.

**Teaching and Learning Online** Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we, as science teachers, deliver high-quality experiences to secondary students in an online environment that leads to age/grade-level appropriate science content knowledge and literacy, but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al., 2014; Wong et al., 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al., 2021; Seaman et al., 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, & Mellado, 2013; Gunning & Mensah, 2011). *Teaching and Learning Online: Science for Secondary Grade Levels* comprises three distinct sections: Frameworks, Teacher's Journeys, and Lesson Plans. Each section explores the current trends and the unique challenges facing secondary teachers and students when teaching and learning science in online environments. All three sections include alignment with Next Generation Science Standards, tips and advice from the authors, online resources, and discussion questions to foster individual reflection as well as small group/classwide discussion. Teacher's Journeys and Lesson Plan sections use the 5E model (Bybee et al., 2006; Duran & Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

In this book, we dive into the Metaverse by discussing how blockchains connect various Metaverse components, digital currencies, and blockchain-empowered applications in the virtual world. On the other hand, Web3 has also attracted considerable attention due to its uniquely decentralized characteristics. The digital economy, currently undergoing a rapid development, is a critical driver to highly efficient societies. It is imperative that we investigate how to use Web3 technologies to address the critical concerns encountered during the development of the digital economy by fully exploring Web3. In this book, we also share insights into the Web3-based ecosystem in the Metaverse; topics of interest include decentralized finance, digital assets, the asset-trading market, etc. Unlike most works on the subject, this book mainly concentrates on insights and discussions regarding blockchain, the Metaverse and Web3. In other words, it focuses on using blockchain technologies to enable an ecosystem for both the Metaverse and Web3. Topics addressed include blockchain fundamentals, smart contracts, value circulation in the Metaverse, the connection between the Metaverse and Web3, the establishment of the Metaverse on the basis of blockchain technologies, decentralized autonomous organization, decentralized storage, digital economy, Web3-based economic systems for the Metaverse, etc. This book will be a valuable resource for students, researchers, engineers, and policymakers working in various areas related to blockchain, the Metaverse and Web3. **Handbook of Research on Special Economic Zones as Regional Development Enablers** Figueiredo, Paulo

Guilherme, Leandro, Francisco José, Li, Yichao, 2021-10-15 Special economic zones (SEZs) are important doorways for countries to attract foreign investment and promote trade. A strong correlation between the creation of SEZs and economic development indicators has also been identified in previous studies, at the municipal level, in China. Thus, the fundamental question that needs to be explored is to what extent SEZs can play the role of development enablers in different regions, development states, and institutional settings. The Handbook of Research on Special Economic Zones as Regional Development Enablers discusses the diverse and international track records in the implementation of SEZs, the interplay of SEZ models and local institutional infrastructure and stakeholders, and the SEZ models that can best fit certain development states and/or settings. Covering topics such as the Belt and Road Initiative, local and national economies, and regional integration, this book is essential for government officials, development officers, scholars, students, researchers, entrepreneurs, public decision makers, aid agencies, company executives, investors, and academicians.

**Motivation and Momentum in Adult Online Education** Lyn, Amy E., Broderick, Maggie, 2023-04-25

Online education has created an ever-expanding number of programs. Adult online learners are diverse and have varied talents, challenges, and motivations. They choose online learning for its convenience and accessibility, but the online learning environment can be flat and two-dimensional. Adult online learners can then become disengaged and disconnected—especially if the online learning experience does not support their social-emotional needs. More research on supporting the whole learner in adult online classrooms is required. Motivation and Momentum in Adult Online Education highlights unique and varied approaches to adult learners' motivation and momentum in online education. It provides examples of strategies, tools, and practices educators and educational institutions use to encourage and support adult learners' motivation and momentum across a variety of online educational programs. Covering topics such as academic coaching, faculty-student interaction, and student engagement, this premier reference source is an excellent resource for higher education leaders, professors, course instructors, advisors, curriculum developers, instructional designers, lifelong learning application developers, professionals in student support services, librarians, researchers, and academicians.

**Development as Peace** Wole Adegbile, 2023-08-04 The colonial definition of development has not served Africa well. While Western assessments have generally revolved around a nation's GDP, infrastructure, and the like, African cultures, and the Yoruba people in particular, have traditionally measured development in relation to the amount of peace experienced in a society and the wellbeing of its people. In this study, Dr. Wole Adegbile examines the political, theological, and cultural contexts of contemporary development activity in Africa, including the impact of modernization theory on African nation-states. He then draws on traditional Yoruba political thoughts and practices, including the similarities between the Yoruba conception of a thriving community and the biblical principle of shalom, to formulate a contextual political theology of development that would holistically address cultural identity and spiritual restoration. Rooted in the intersection of Scripture and traditional African values, this book suggests a way forward for African society, its political leaders, and the church.

**Social Studies Education in East Asian Contexts** Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it. This is particularly important in East Asia where strong economic growth, long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts. This book, with its team of regional authors, shows how different societies in the region are dealing with these challenges and what can be expected from future citizens. The book will appeal to policy makers, researchers and teachers interested in the current state of social studies education in East Asian societies.
