The Data Compression Book Mark Nelson,2008 Described by Jeff Prosise of PC Magazine as one of my favorite books on applied computer technology, this updated second edition brings you fully up-to-date on the latest developments in the data compression field. It thoroughly covers the various data compression techniques including compression of binary programs, data, sound, and graphics. Each technique is illustrated with a completely functional C program that demonstrates how data compression works and how it can be readily incorporated into your own compression programs. The accompanying disk contains the code files that demonstrate the various techniques of data compression found in the book.

Advances in Digital Forensics XII Gilbert Peterson,Sujeet Sheno,2016-09-19 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics XII* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. *Advances in Digital Forensics XII* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert

Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

Climate Change, Photosynthesis and Advanced Biofuels Ashwani Kumar, Yuan-Yeu Yau, Shinjiro Ogita, Renate Scheibe, 2020-08-31 The use of fossil fuels results in rising CO₂ and other greenhouse gas (GHG) emissions, causing global temperature rise and climate change that will negatively impact human health, the food supply, and eventually worsen hunger and misery. Presently, fossil fuels meet 88% of the energy demand, resulting in rising CO₂/GHG emissions at alarming rates. The increased use of biofuels would help to mitigate climate change. Efficiently designing methods for the production of biofuels and plant-derived high-value products requires a deeper understanding of photosynthetic processes as a prerequisite for applying novel biotechnologies. Accordingly, this book provides ample information and a wealth of illustrative examples. The book's eighteen richly illustrated chapters are divided into three thematic parts. I: Photosynthesis and Biomass Production under Changing Conditions, II: Microalgae and Engineered Crops for Production of Biofuels and High-value Products, and III: Genetic Resources and Engineering Methods to Improve Crop Plants. Readers will find the latest information on the molecular basis of photosynthetic processes in plants (including the regulatory principles that allow plants to maintain homeostasis under changing conditions), stress resistance and synthetic pathways. In addition, the basic principles of important biotechnologies, as well as examples of specially designed crops capable of growing under stress conditions with improved productivity, are presented. The book sets the course for future research in the field of biofuel development and production and provides both general and specific information for students, teachers, academic researchers, industrial teams, and general readers who are interested in new developments concerning the production of biofuels with value-added properties.

The Emigrant Communities of Latvia Rita Kaša, Inta Mieriņa, 2019-05-08 This open access volume examines experiences of contemporary Latvian migrants, thereby focusing on reasons for emigration, processes of integration in their host countries, and – in the case of return migration - re-integration in their home country. In the context of European migration, the book describes the case of Latvia, which is interesting due to the multiple waves of excessive emigration, continuously high migration potential among European Union member states, and diverse migrant characteristics. It provides a fascinating insight into the social and psychological aspects linked to migration in a comparative context. The data

in this volume is rich in providing individual level perspectives of contemporary Latvian migrants by addressing issues such as emigrants' economic, social and cultural inclusion in the host country, ties with the home country and culture, interaction with public authorities both in the host and home country, political views, and perspectives on the permanent settlement in migration or return. Through topics such as assimilation of children, relationships between emigrants representing different emigration waves, the complex identities and attachments of minority emigrants, and the role of culture and media in identity formation and presentation, this book addresses topics that any contemporary emigrant community is faced with.

Computers Helping People with Special Needs Klaus Miesenberger,Arthur Karshmer,Petr Penaz,Wolfgang Zagler,2012-07-21 The two-volume set LNCS 7382 and 7383 constiutes the refereed proceedings of the 13th International Conference on Computers Helping People with Special Needs, ICCHP 2012, held in Linz, Austria, in July 2012. The 147 revised full papers and 42 short papers were carefully reviewed and selected from 364 submissions. The papers included in the first volume are organized in the following topical sections: universal learning design; putting the disabled student in charge: user focused technology in education; access to mathematics and science; policy and service provision; creative design for inclusion, virtual user models for designing and using inclusive products; web accessibility in advanced technologies, website accessibility metrics; entertainment software accessibility; document and media accessibility; inclusion by accessible social media; a new era for document accessibility: understanding, managing and implementing the ISO standard PDF/UA; and human-computer interaction and usability for elderly.

Designing Technology Training for Older Adults in Continuing Care Retirement Communities Shelia R. Cotten,Elizabeth A. Yost,Ronald W. Berkowsky,Vicki Winstead,William A. Anderson,2016-12-08 This book provides the latest research and design-based recommendations for how to design and implement a technology training program for older adults in Continuing Care Retirement Communities (CCRCs). The approach in the book concentrates on providing useful best practices for CCRC owners,

CEOs, activity directors, as well as practitioners and system designers working with older adults to enhance their quality of life. Educators studying older adults will also find this book useful. Although the guidelines are couched in the context of CCRCs, the book will have broader-based implications for training older adults on how to use computers, tablets, and other technologies.

Practice Guideline for the Treatment of Patients with Borderline Personality Disorder American Psychiatric Association, 2001 The most common personality disorder here and abroad, borderline personality disorder is often misdiagnosed or underdiagnosed. Left untreated, it causes marked distress and impairment in social, occupational, and role functioning, with high rates of self-destructive behavior (attempted and completed suicide). Its pervasive pattern of impulsivity and instability of interpersonal relationships, affects, and self-image begins in early adulthood and presents in a variety of contexts. Developed primarily by psychiatrists in active clinical practice, the revised edition of this popular work offers an updated synthesis of current scientific knowledge and rational clinical practice for patients with borderline personality disorder -- with the important caveat that clinicians should consider, but not limit themselves to, the treatments recommended here. The summary of treatment recommendations is keyed according to the level of confidence with which each recommendation is made and coded to show the nature of its supporting evidence. Highly informative and easy to use, this eminently practical volume is organized into three major parts: Part A contains treatment recommendations (Section I, treatment summaries; Section II, treatment plans; Section III, special clinical considerations; and Section IV, risk management issues during treatment), Part B presents the evidence underlying these treatment recommendations (Section V, an overview of DSM-IV-TR criteria, prevalence rates, and natural history and course; and Section VI, a review of existing treatment literature), and Part C summarizes those areas in which better research data are needed. Remarkably concise and comprehensive, this practice guideline continues to be an indispensable reference for every clinician who treats patients with this heterogeneous and complex disorder.

Statistics for Finance Erik Lindström,Henrik Madsen,Jan Nygaard Nielsen,2018-09-03 Statistics for Finance develops students' professional skills in statistics with applications in finance. Developed from the authors' courses at the Technical University of Denmark and Lund University, the text bridges the gap between classical, rigorous treatments of financial mathematics that rarely connect concepts to data and books on econometrics and time series analysis that do not cover specific problems related to option valuation. The book discusses applications of financial derivatives pertaining to risk assessment and elimination. The authors cover various statistical and mathematical techniques, including linear and nonlinear time series analysis, stochastic calculus models, stochastic differential equations, Itô's formula, the Black-Scholes model, the generalized method-of-moments, and the Kalman filter. They explain how these tools are used to price financial derivatives, identify interest rate models, value bonds, estimate parameters, and much more. This textbook will help students understand and manage empirical research in financial engineering. It includes examples of how the statistical tools can be used to improve value-at-risk calculations and other issues. In addition, end-of-chapter exercises develop students' financial reasoning skills.
