Digital Storytelling in Higher Education Grete

Jamissen, Pip Hardy, Yngve Nordkvelle, Heather

Pleasants, 2017-06-10 This book broadens the scope and impact of digital storytelling in higher education. It outlines how to teach, research and build communities in tertiary institutions through the particular form of audio-visual communication known as digital storytelling by developing relationships across professions, workplaces and civil society. The book is framed within the context of 'The Four Scholarships' developed by the Carnegie Foundation for the advancement and redefining of teaching, including the scholarships of discovery, integration, application, and teaching and learning. Across four sections, this volume considers the potential of digital storytelling to improve, enhance and expand teaching, learning, research, and interactions with society. Written by an international range of academics, researchers and practitioners, from disciplines spanning medicine, anthropology, education, social work, film and media studies, rhetoric and the humanities, the book demonstrates the variety of ways in which digital storytelling offers solutions to key challenges within higher education for students, academics and citizens. It will be compelling reading for students and researchers working in education and sociology.

Multilingual Digital Storytelling Jim Anderson, Vicky Macleroy, 2016-03-02 Classrooms are increasingly

multicultural in their social composition, and students are increasingly connected, through digital media, to local and global networks. However, pedagogy has failed to take full advantage of the opportunities these resources represent. Multilingual Digital Storytelling draws attention to the interfaces between learner engagement, creativity and critical digital literacy, as well as addressing the multilingual within the multiliteracies framework. Addressing a significant gap in the field of multiliteracies by focusing on multilingualism, this book explores new digital spaces for language learning and methods of extending understandings of youth literacy in an increasingly interconnected world. Drawing on innovative and multi-site research projects based in mainstream and community schools in London and overseas, this book discusses how young people become engaged creatively and critically with literacy by demonstrating how digital storytelling can be used as a tool for language development. The book begins by considering linguistic, cultural, cognitive and social dimensions of language learning from a theoretical perspective, whilst the second part focuses on practical case studies that reflect and illustrate these theoretical principles. Offering a powerful new perspective on multiliteracies pedagogy, Multilingual Digital Storytelling will appeal to researchers and academics in the fields of education, applied linguistics, sociology and youth and community studies. It will also be an invaluable resource for teachers, teacher educators, curriculum planners and policymakers.

101 Life Skills Games for Children Bernie

Badegruber, 2011-01-01 How do you teach tolerance, self-awareness, and responsibility? How can you help children deal with fear, mistrust, or aggression? Play a game with them! Games are an ideal way to help children develop

social and emotional skills; they are exciting, relaxing, and fun. **101 LIFE SKILLS GAMES FOR CHILDREN: LEARNING, GROWING, GETTING ALONG (Ages 6-12)** is a resource that can help children understand and deal with problems that arise in daily interactions with other children and adults. These games help children develop social and emotional skills and enhance self-awareness. The games address the following issues: dependence, aggression, fear, resentment, disability, accusations, boasting, honesty, flexibility, patience, secrets, conscience, inhibitions, stereotypes, noise, lying, performance, closeness, weaknesses, self confidence, fun, reassurance, love, respect, integrating a new classmate, group conflict. Organized in three main chapters: (I-Games, You-Games and We-Games), the book is well structured and easily accessible. It specifies an objective for every game, gives step-by-step instructions, and offers questions for reflection. It provides possible variations for each game, examples, tips, and ideas for role plays. Each game contains references to appropriate follow-up games and is illustrated with charming drawings.

Hinduism for Our Times Arvind Sharma, 1996 This book examines the contours of this creative tension in the context of Hinduism in our own times. For Hinduism, a religion of unknown antiquity, is also, in several ways, surprisingly modern. *Hinduism for Our Times* is an attempt to raise this dimension of Hinduism to an unprecedented level of self-awareness.

Cultivating Compassion Pip Hardy, Tony Sumner, 2018-03-02 This book explores how digital

storytelling can catalyze change in healthcare. Edited by the co-founders of the award-winning Patient Voices Programme, the authors discuss various applications for this technique; from using digital storytelling as a reflective process, to the use of digital stories in augmenting quantitative data. Through six main sections this second edition covers areas including healthcare education, patient engagement, quality improvement and the use of digital storytelling research. The chapters illuminate how digital storytelling can lead to greater humanity, understanding and, ultimately, compassion. This collection will appeal to those involved in delivering, managing or receiving healthcare and healthcare education and research, as well as people interested in digital storytelling and participatory media.

Mentalissimo John Bannon,2016-08-10 In Mentalissimo, John brings his talents to bear on mentalism and mental magic with playing cards. I do card tricks, have a keen interest in mentalism and am a fanatic about the construction of magic tricks. For me, a book like this is just what I look for. All of the above; in one place.You can expect: Squeaky-clean revelations of truly thought-of cards. Demonstrations of psychic ability that can't be explained simply as coincidence. Clear, commercial prediction systems. Offbeat treatments of classic mental effects from Add-a-Number to Out of This World.Thirty items are described and explained in twenty-one chapters. Almost all use regular unprepared cards. Two require a common gaffed card. Most are impromptu. A couple require a more-than-minimal stack. A few rely on easily-made external props. One employs a pack of ESP symbol cards. All are intelligently explained and laced with commentary and discussion. Come for the thought-provoking card effects; stay for the conversation.
