Soft Computing Applications Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-10 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications, or SOFA 2014, held on 24-26 July 2014 in Timisoara, Romania. This edition was organized by the University of Belgrade, Serbia in conjunction with Romanian Society of Control Engineering and Technical Informatics (SRAIT) - Arad Section, The General Association of Engineers in Romania - Arad Section, Institute of Computer Science, Iasi Branch of the Romanian Academy and IEEE Romanian Section. The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness and low solution cost. Soft computing facilitates the use of fuzzy logic,

neurocomputing, evolutionary computing and probabilistic computing in combination, leading to the concept of hybrid intelligent systems. The combination of such intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains. The conference papers included in these proceedings, published post conference, were grouped into the following area of research: · Image, Text and Signal Processing “li>Intelligent Transportation Modeling and Applications Biomedical Applications Neural Network and Applications Knowledge-Based Technologies for Web Applications, Cloud Computing, Security, Algorithms and Computer Networks Knowledge-Based Technologies Soft Computing Techniques for Time Series Analysis Soft Computing and Fuzzy Logic in Biometrics Fuzzy Applications Theory and Fuzzy Control Bussiness Process Management Methods and Applications in Electrical Engineering The volumes provide useful information to professors, researchers and graduated students in area of soft computing techniques and applications, as they report new research work on challenging issues.

Pirates of Pensacola Keith Thomson,2005-04 The

Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

Local Government Actions to Prevent Childhood Obesity National Research Council, Institute of Medicine, Transportation Research Board, Board on Population Health and Public Health Practice, Board on Children, Youth, and Families, Food and Nutrition Board, Committee on Childhood Obesity Prevention Actions

for Local Governments,2010-01-10 The prevalence of childhood obesity is so high in the United States that it may reduce the life expectancy of today's generation of children. While parents and other adult caregivers play a fundamental role in teaching children about healthy behaviors, even the most positive efforts can be undermined by local environments that are poorly suited to supporting healthy behaviors. For example, many communities lack ready sources of healthy food choices, such as supermarkets and grocery stores. Or they may not provide safe places for children to walk or play. In such communities, even the most motivated child or adolescent may find it difficult to act in healthy ways. Local governments-with jurisdiction over many aspects of land use, food marketing, community planning, transportation, health and nutrition programs, and other community issues-are ideally positioned to promote behaviors that will help children and adolescents reach and maintain healthy weights. Local Government Actions to Prevent Childhood Obesity presents a number of recommendations that touch on the vital role of government actions on all levels-federal, state, and local-in childhood obesity prevention. The book offers healthy eating and physical activity strategies for local governments to consider, making it an excellent resource for mayors, managers, commissioners, council members, county board members, and administrators.

The Interface Effect Alexander R. Galloway, 2013-05-20

Interfaces are back, or perhaps they never left. The familiar Socratic conceit from the Phaedrus, of

communication as the process of writing directly on the soul of the other, has returned to center stage in today's discussions of culture and media. Indeed Western thought has long construed media as a grand choice between two kinds of interfaces. Following the optimistic path, media seamlessly interface self and other in a transparent and immediate connection. But, following the pessimistic path, media are the obstacles to direct communion, disintegrating self and other into misunderstanding and contradiction. In other words, media interfaces are either clear or complicated, either beautiful or deceptive, either already known or endlessly interpretable. Recognizing the limits of either path, Galloway charts an alternative course by considering the interface as an autonomous zone of aesthetic activity, guided by its own logic and its own ends: the interface effect. Rather than praising user-friendly interfaces that work well, or castigating those that work poorly, this book considers the unworkable nature of all interfaces, from windows and doors to screens and keyboards. Considered allegorically, such thresholds do not so much tell the story of their own operations but beckon outward into the realm of social and political life, and in so doing ask a question to which the political interpretation of interfaces is the only coherent answer. Grounded in philosophy and cultural theory and driven by close readings of video games, software, television, painting, and other images, Galloway seeks to explain the logic of digital culture through an analysis of its most emblematic and ubiquitous manifestation – the interface.

Finding Fernanda Erin Siegal, 2012-05-15 A compelling, dramatic narrative of how an American housewife discovered that the Guatemalan child she was about to adopt had been stolen from her birth mother, shedding light on the alarming and growing problem of

international adoption fraud. Over the past five years, over 100,000 children were adopted into the United States, 20,000 of whom came from Guatemala. *Finding Fernanda*, a dramatic true story paired with investigative reporting, tells the side-by-side tales of an American housewife who adopts a two-year-old girl from Guatemala and the birth mother whose two children were stolen from her. Each woman gradually comes to realize her role in what was one of Guatemala's most profitable black-market industries: the buying and selling of children for international adoption. *Finding Fernanda* is an overdue, unprecedented look at adoption corruption--and a poignant, riveting human story about the power of hope, faith, and determination.

Shook, 2006 This book raises many moral, legal, social, and political, questions related to possible development, in the near future, of an artificial womb for human use. These are some of the difficult and crucial questions this anthology addresses and attempts to answer.

Review of VA Clinical Guidance for the Health Conditions Identified by the Camp Lejeune

Legislation Institute of Medicine, Committee on the Review of Clinical Guidance for the Care of Health Conditions Identified by the Camp Lejeune Legislation, Board on the Health of Select Populations, Committee On The Review Of Clinical Guid, 2015 U.S. Marine Corps Base Camp Lejeune, located in eastern North Carolina, is a large installation that covers 156,000 acres and is home at any given time to a population of about 170,000 active-duty personnel, family members, retirees, and civilian employees living on base or in the surrounding community. Between 1957 and 1987, the ground water at Camp Lejeune was inadvertently contaminated with chemicals, primarily industrial solvents that are now known to cause cancer and other health problems. In 1980, drinking water contaminants, primarily trichloroethylene (TCE) and perchloroethylene (PCE), as well as other solvents, were first detected at Camp Lejeune in treated drinking water. The contaminated wells were closed in 1987. In 1989, the U.S. Environmental Protection Agency placed Camp Lejeune on the National Priorities List, also known as Superfund. It is estimated that between 500,000 and 1,000,000 people may have used the contaminated water and many of them continue to have concerns about the long-term effects that might result from that exposure. In 2012 Congress passed the Honoring America's Veterans and Caring for Camp Lejeune Families Act. The law provides health benefits to veterans and family members who have any of 15 health outcomes associated with exposure to TCE, PCE, or solvent mixtures. At the request of the Veteran's Administration, Review of the VA Guidance for the Health Conditions Identified by the Camp Lejeune Legislation reviews the latest scientific

literature to ensure that the clinical guidance provided for the 15 covered medical conditions is scientifically sound. This report also describes the medical conditions that result from renal toxicity due to solvent exposures and characterizes neurobehavioral effects as mandated for coverage in the law.
