Netherspace Andrew Lane,Nigel Foster,2017-05-23 Aliens came to Earth forty years ago. Their anatomy proved unfathomable and all attempts at communication failed. But through trade, humanity gained technology that allowed them to colonise the stars. The price: live humans for every alien faster-than-light drive. Kara's sister was one of hundreds exchanged for this technology, and Kara has little love for aliens. So when she is drafted by GalDiv - the organisation that oversees alien trades - it is under duress. A group of colonists have been kidnapped by aliens and taken to an uncharted planet, and an unusual team is to be sent to negotiate. As an ex-army sniper, Kara's role is clear. But artist Marc has no combat experience, although the team's pre-cog Tse is adamant that he has a part to play. All three know that success is unlikely. For how will they negotiate with aliens when communication between the species is impossible?

The Fortune Men Nadifa Mohamed,2021-12-14 BOOKER PRIZE FINALIST • Based on a true event, this novel is “a blues song cut straight from the heart ... about the unjust death of an innocent Black man caught up in a corrupt system” (Walter Mosley, best-selling author of Devil in a Blue Dress). In Cardiff, Wales in 1952, Mahmood Mattan, a young Somali sailor, is accused of a crime he did not commit: the brutal killing of Violet Volacki, a shopkeeper from Tiger Bay. At first, Mahmood believes he can ignore the fingers pointing his way; he may be a gambler and a petty thief, but he is no murderer. He is a father of three, secure in his innocence and his belief in British justice. But as the trial draws closer, his prospect for freedom dwindles. Now, Mahmood must stage a terrifying fight for his life, with all the chips stacked against him: a shoddy investigation, an inhumane legal system, and, most evidently, pervasive and deep-rooted racism at every step. Under the shadow of the hangman's noose, Mahmood begins to realize that even the truth may not be enough to save him. A haunting tale of miscarried justice, this book offers a chilling look at the dark corners of our humanity.

Capitalism Arundhati Roy,2014-04-14 The “courageous and clarion” Booker Prize-winner “continues her analysis and documentation of the disastrous consequences of unchecked global capitalism” (Booklist). From the poisoned rivers, barren wells, and clear-cut forests, to the hundreds of thousands of farmers who have committed suicide to escape punishing debt, to the hundreds of millions of people who live on less than two dollars a day, there are ghosts nearly everywhere you look in India. India is a nation of 1.2 billion, but the country's one hundred richest people own assets equivalent to one-fourth of India's gross domestic product. Capitalism: A Ghost Story examines the dark side of democracy in contemporary India and shows how the demands of globalized capitalism have subjugated billions of people to the highest and most intense forms of racism and exploitation. “A highly readable and characteristically trenchant mapping of early-twenty-first-century India's impassioned love affair with money, technology, weaponry and the ‘privatization of everything,’ and-because these must not be impeded no matter what-generous doses of state violence.” –The Nation “A vehement broadside against capitalism in general and American cultural imperialism in particular . . . an impassioned manifesto.” –Kirkus Reviews “Roy's central concern is the effect on her own country, and she shows how Indian politics have taken on the same model, leading to the ghosts of her book's title: 250,000 farmers have committed suicide, 800 million impoverished and dispossessed Indians, environmental destruction, colonial-like rule in Kashmir, and brutal treatment of activists and journalists. In this dark tale, Roy gives rays of hope that illuminate cracks in the nightmare she evokes.” –Publishers Weekly

ColdFusion Presents: New Thinking Dagogo Altraide,2019-01-15 The creator of YouTube's ColdFusion explores the development of technology from Industrial Revolution to Artificial Intelligence to figure out what's next. As each new stage of technology builds on the last, advancements start to progress at an exponential rate. In order to know where we're headed, it's essential to know how we got here. What hidden stories lie behind the technology we use today? What drove the men and women who invented it? What were those special moments that changed the world forever? Dagogo Altraide explores these questions in a history of human innovation that reveals how new technologies influence each other, how our modern world came to be, and what future innovations might look like. From the electric world of Tesla and the steam engine revolution to the first computers, the invention of the internet, and the rise of artificial intelligence, New Thinking tells the stories of the men and women who changed our world with the power of new thought.

No Self, No Problem Chris Niebauer,2019-09-03 While in grad school in the early 1990s, Chris Niebauer began to notice striking parallels between the latest discoveries in psychology, neuroscience, and the teachings of Buddhism, Taoism, and other schools of Eastern thought. When he presented his findings to a professor, his ideas were quickly dismissed as "pure coincidence, nothing more." Fast-forward 20 years later and Niebauer is a PhD and a tenured professor, and the Buddhist-neuroscience connection he found as a student is practically its own genre in the bookstore. But according to Niebauer, we are just beginning to understand the link between Eastern philosophy and the latest findings in psychology and neuroscience and what these assimilated ideas mean for the human experience. In this groundbreaking book, Niebauer writes that the latest research in neuropsychology is now confirming a fundamental tenet of Buddhism, what is called Anatta, or the doctrine of "no self." Niebauer writes that our sense of self, or what we commonly refer to as the ego, is an illusion created entirely by the left side of the brain. Niebauer is quick to point out that this doesn't mean that the self doesn't exist but rather that it does so in the same way that a mirage in the middle of the desert exists, as a thought rather than a thing. His conclusions have significant ramifications for much of modern psychological modalities, which he says are spending much of their time trying to fix something that isn't there. What makes this book unique is that Niebauer offers a series of exercises to allow the reader to experience this truth for him- or herself, as well as additional tools and practices to use after reading the book, all of which are designed to change the way we experience the world—a way that is based on being rather than thinking.

The Art and Science of Real Wealth Bollachettira Dhyan Appachu,2020-07-03 I have been investing ever since I was a young teen during the mania of the early 1990s. I have had huge successes and even bigger failures. I made enough money before I was 30, that ordinary people would not have made in a lifetime. But my short-term emotional thinking, arrogance, and greed in investing, and ignoring and mocking the principles of capital allocation and risk management blew away all those earnings. The world's greatest investors were successful only because of logic, reason, patience, and discipline. I thought I should share my life's learning to help prevents others from making the mistakes I made until 2018 and go on to the success I am having since 2019. I have returned more than 50% on my investments from late 2018 to date when markets the world over have negative returns.
