Hold Fast the Faith Matthew Everhard,2012-12-06 Furthermore, confessions and creeds serve to help assure that the doctrinal faith that we articulate today has not subtly changed over time, subject to the warping influence of secular society. Creeds stand as ancient landmarks denoting the location of believers' hearts in history. Noting where one deviates from an ancient creed gives a person a distinct idea about where his or her own theological convictions stand in relation to other believers throughout history. Perhaps this also helps us to discover what direction we are moving. Are we moving closer to Christ? To God's Word? To the heart of God Himself? Or are we moving further away? The confession that I will be recommending to you in this volume is the standard-bearing creed in the Presbyterian or Reformed branch of Christianity. Influenced heavily by the thinking of Reformation theologian John Calvin (1509-1564), the Westminster Confession (1647) is a confessional exemplar of Reformed theology.² The Westminster Confession of Faith is the premiere example of theological intellectualism absorbed in the beauty of the sovereignty of God. The Westminster Confession, and Calvin before it for that matter, were both completely committed to the theological concept that God is sovereign over the entire universe. Therefore, as you study this Confession you will undoubtedly encounter the Living God as ruler of the cosmos, the world, the events of your life, and hopefully your heart.

Deception Kenneth R. Timmerman,2016-07-19 Finally the truth about the YouTube video Hillary blamed for Benghazi. The last thing Hillary Clinton wants you to read is the truth about the infamous YouTube video she claimed sparked the Benghazi attacks. That's why Cindy Lee Garcia—the deceived actress from the video—is Hillary's worst nightmare. She woke up the day after the Benghazi attacks to see her face all over national television, with Hillary blaming her for the deaths of four Americans. New York Times best-selling author Kenneth R. Timmerman digs deep into the web of deception surrounding the “hateful” video, with stunning new documents, emails, and interviews with many of the participants. This is the story of a deception that went way beyond a YouTube video to encompass Hillary Clinton’s diabolical vision for America under Islamic law.

Solarversia MR Toby Downton,2015-08-18 It's the 29th February 2020 and Nova Negrahnu cannot wait to start playing Solarversia, a year-long game based in a virtual world that's modelled on the real world solar system. Given three lives, three vehicles, and told to master the Science of Solarversia to stand a chance of winning, players compete

against 100 million people for the 10m grand prize, and a place in the history books. Solarversia starts three months before Nova's A-levels, the life-changing exams that could see her win a place at Nottingham, the university that Charlie attends, the second-year student she falls for on an open-day visit. As she strains to balance her addiction to the game with her mounting schoolwork, Nova's world is unexpectedly turned upside down when the Holy Order, a mysterious cult-like organisation sets its sights on the game and Spiralwerks, its creator. Told from three different perspectives - Nova the gamer, Artica Kronkite, the CEO of Spiralwerks, and Casey Brown, a newly-initiated member of the Holy Order - Solarversia is a game that author Toby Downton hopes to make for real, to launch in 2020, so that people can actually play it. From the initial press release: The world of virtual reality is about to fundamentally reshape the way in which we live, work and play. The Oculus Rift - the much-lauded and potentially transformational VR headset, which broke crowdfunding records in 2012, and was recently acquired by Facebook for \$2 billion - is scheduled to launch in early 2016. While its most obvious impact will hit the world's 700 million plus gamers, Facebook CEO Mark Zuckerberg believes the potential VR impact to be far more profound: Imagine enjoying a court side seat at a game, studying in a classroom of students and teachers all over the world or consulting with a doctor face-to-face - just by putting on goggles in your home. The relatively new genre of litRPG, or virtual reality inspired science fiction centred around the gaming industry, is booming, with Ernest Cline's bestseller Ready Player One already in production for a major movie adaptation with Spielberg directing. Downton is emerging as a driving force in the VR revolution. His novel Solaversia is just the first step in his thrillingly ambitious multi-platform story-telling experience that will explore the relationships between artificial intelligence, technology and the human spirit. Downton has incorporated his tech-company - Spiralwerks - in the real world, developing Solarversia as a commercially available game, ready to storm the games market in 2020. Accompanying the publication of Solarversia is the Golden Ticket promotion, which will enable readers to win one of a hundred specially reserved places within the Player's Grid, through a series of innovative competitions.

The Public Domain James Boyle, 2016-09-06 Please read the legal notice included in this

e-book and/or check the copyright status in your country. In this enlightening book James Boyle describes what he calls the range wars of the information age-today's heated battles over intellectual property. Boyle argues that just as every informed citizen needs to know at least something about the environment or civil rights, every citizen should also understand intellectual property law. Why? Because intellectual property rights mark out the ground rules of the information society, and today's policies are unbalanced, unsupported by evidence, and often detrimental to cultural access, free speech, digital creativity, and scientific innovation. Boyle identifies as a major problem the widespread failure to understand the importance of the public domain-the realm of material that everyone is free to use and share without permission or fee. The public domain is as vital to innovation and culture as the realm of material protected by intellectual property rights, he asserts, and he calls for a movement akin to the environmental movement to preserve it. With a clear analysis of issues ranging from Jefferson's philosophy of innovation to musical sampling, synthetic biology and Internet file sharing, this timely book brings a positive new perspective to important cultural and legal debates. If we continue to enclose the commons of the mind, Boyle argues, we will all be the poorer.
