*Slides for Students* Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

*EcoMind* Frances Moore Lappe,2013-04-23 In EcoMind, Frances Moore Lappe's Na giant of the environmental movement confronts accepted wisdom of environmentalism. Drawing on the latest research from anthropology to neuroscience and her own field experience, she argues that the biggest challenge to human survival isn't our fossil fuel dependency, melting glaciers, or other calamities. Rather, it's our faulty way of thinking about these environmental crises that robs us of power. Lappe dismantles seven common thought traps—from limits to growth to the failings of democracy—that belie what we now know about nature, including our own, and offers contrasting thought leaps that reveal our hidden power. Like her Diet for a Small Planet classic, EcoMind is challenging, controversial and empowering.

*African Samurai* Thomas Lockley,Geoffrey Girard,2019-04-30 This biography of the first foreign-born samurai and his journey from Africa to Japan is “a readable, compassionate account of an extraordinary life” (The Washington Post). When Yasuke arrived in Japan in the late 1500s, he had already traveled much of the known world. Kidnapped as a child, he had ended up a servant and bodyguard to the head of the Jesuits in Asia, with whom he traversed India and China learning multiple languages as he went. His arrival in Kyoto, however, literally caused a riot. Most Japanese people had never seen an African man before, and many of them saw him as the embodiment of the black-skinned Buddha. Among those who were drawn to his presence was Lord Nobunaga, head of the most powerful clan in Japan, who made Yasuke a samurai in his court. Soon, he was learning the traditions of Japan's martial arts and ascending the upper echelons of Japanese society. In the four hundred years since, Yasuke has been known in Japan largely as a legendary, perhaps mythical figure. Now African Samurai presents the never-before-told biography of this unique figure of the sixteenth century, one whose travels between countries and cultures offers a new perspective on race in world history and a vivid portrait of life in medieval Japan. “Fast-paced, action-packed writing. . . . A new and important biography and an incredibly moving study of medieval Japan and solid perspective on its unification. Highly recommended.” —Library Journal (starred review) “Eminently readable. . . . a worthwhile and entertaining work.” —Publishers Weekly “A unique story of a unique man, and yet someone with whom we can all identify.” —Jack Weatherford, New York Times–bestselling author of Genghis Khan

*Space at the Speed of Light* Dr. Becky Smethurst,2020-06-02 From the big bang to black holes, this fast-paced illustrated tour of time and space for the astro-curious unlocks the science of the stars to reveal fascinating theories, surprising discoveries, and ongoing mysteries in modern astronomy and astrophysics. Before the big bang, time, space, and matter didn't exist. In the 14 billion years since, scientists have pointed their telescopes upward, peering outward in space and backward in time, developing and refining theories to explain the weird and wonderful phenomena they observed. Through these observations, we now understand concepts like the size of the universe (still expanding), the distance to the next-nearest star from earth (Alpha Centauri, 26 trillion miles) and what drives the formation of elements (nuclear fusion), planets and galaxies (gravity), and black holes (gravitational collapse). But are these cosmological questions definitively answered or is there more to discover? Oxford University astrophysicist and popular YouTube

personality Dr. Becky Smethurst presents everything you need to know about the universe in ten accessible and engagingly illustrated lessons. In *Space at the Speed of Light: The History of 14 Billion Years for People Short on Time*, she guides you through fundamental questions, both answered and unanswered, posed by space scientists. Why does gravity matter? How do we know the big bang happened? What is dark matter? Do aliens exist? Why is the sky dark at night? If you have ever looked up at night and wondered how it all works, you will find answers--and many more questions--in this pocket-sized tour of the universe!

*Cultivating Qi* Jun Wang, Ph.D., C.M.D.,2011-01-25 While Chinese acupuncture and herbalism enjoy widespread popularity in the West, traditional Chinese exercise techniques—with the exception of qi gong—have rarely been taught outside China. This book is designed to change that. Written by Jun Wang, a doctor of Chinese medicine, *Cultivating Qi* draws on classic Chinese texts to introduce these body-mind healing exercises to Western readers. In simple, accessible language, Wang presents three specific qi exercises: the Yijin Jing, a popular form of calisthenics associated with both Chinese Buddhist and Daoist traditions; Taiji Neigong, a series of 34 movements adapted from the Wu-Hao style of Taiji Quan; and the “Six Healing Breaths,” which combines spoken sounds with movements associated with the six major vital organs of Chinese medicine. Written for beginning students of Chinese medicine as well as laypersons, healthcare practitioners, and martial artists, *Cultivating Qi* includes clear explanations of Chinese medical terminology—and provides the original Chinese characters for more advanced students—as well as step-by-step instruction in the three exercises. Accompanied by 100 photographs, these exercises are suitable for all ages and activity levels, and most of them take no more than 10 to 15 minutes to complete.

*Language Hacking Spanish* Benny Lewis,2017-03-28 It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only other people can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.
