*Media Today* Joseph Turow,2011-09-22 Media Today puts students at the center of the profound changes in the twenty-first century media world - from digital convergence to media ownership - and gives them the skills to think critically about what these changes mean for the role of media in their lives. Media Today, Fourth Edition is built around four key concepts: A media systems approach allows students to understand the interconnected cultural, political, and economic forces that shape media they encounter every day. Unique insights into media trends give students an insider's perspective on how media industries are responding to changes from globalization to social networking. Focus on digital convergence shows in each chapter how digital media is transforming traditional mass media such as newspapers, magazines, and television. A media literacy goal encourages and builds critical skills to make students more informed and engaged citizens in our media-driven society. Completely revised with updated examples, new case studies, and new online video resources, the 4th edition of Media Today connects the latest trends, debates, and technologies to the history of media, highlighting the impact and meaning of today's changes to the media landscape, especially how traditional industries have blurred together with digital convergence. Additional learning resources including a new set of online video resources, interactive quizzes, study resources, and instructor guides are available on the free companion website at: [www.routledge.com/textbooks/mediatoday4e](http://www.routledge.com/textbooks/mediatoday4e).

*The Korean Wave* Youna Kim,2013-11-12 Since the late 1990s South Korea has emerged as a new center for the production of transnational popular culture - the first instance of a major global circulation of Korean popular culture in history. Why popular (or not)? Why now? What does it mean socially, culturally and politically in a global context? This edited collection considers the Korean Wave in a global digital age and addresses the social, cultural and political implications in their complexity and paradox within the contexts of global inequalities and uneven power structures. The emerging consequences at multiple levels - both macro structures and micro processes that influence media production, distribution, representation and consumption - deserve to be analyzed and explored fully in an increasingly global media environment. This book argues for the Korean Wave's double capacity in the creation of new and complex spaces of identity that are both enabling and disabling cultural diversity in a digital cosmopolitan world. The Korean Wave combines theoretical perspectives with grounded case studies in an up-to-date and accessible volume ideal for both undergraduate and postgraduate students of Media and Communications, Cultural Studies, Korean Studies and Asian Studies.

In Defense of Ska Aaron Carnes,2024-07-12 In a mix of interviews, essays, personal stories, historical snapshots, obscure anecdotes, and think pieces, this second expanded edition dissects, analyzes and celebrates ska in exactly the way fans have been craving for decades. With the addition of 4 new sections, Aaron adds to the already extensive compendium that was the first edition: The Importance of Christian Ska; After ska died in the '90s, the music went underground and returned to its roots; The ska roots of Fall Out Boy lead singer Patrick Stump; How Katrina created a vibrant ska scene in New Orleans. Aaron expands on the original edition with exciting interviews with Patrick Stump from Fall Out Boy who he interviewed on his podcast of the same name. Now the time to take to the streets and fight music snobbery, or at least crank up the ska without being teased ruthlessly, has come. **Musical Listening in the Age of Technological Reproduction** Gianmario Borio,2016-04-29 It is undeniable that technology has made a tangible impact on the nature of musical listening. The new media have changed our relationship with music in a myriad of ways, not least because the experience of listening can now be prolonged at will and repeated at any time and in any space. Moreover, among the more striking social phenomena ushered in by the technological revolution, one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach. In response to these new social and perceptual conditions, the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification. Concentrated listening, the form of musical reception fostered by Western art music, now appears to be but one of the many ways in which audiences respond to organized sound. Cinema, for example, has developed specific ways of combining images and sounds; and, more recently, digital technology has redefined the standard forms of mass communication. Information is aestheticized, and music in turn is incorporated into pre-existing symbolic fields. This volume - the first in the series Musical Cultures of the Twentieth Century - offers a wide-ranging exploration of the relations between sound, technology and listening practices, considered from the complementary perspectives of art music and popular music, music theatre and multimedia, composition and performance, ethnographic and anthropological research.
