Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Three-dimensional Echocardiography Navin Chandar Nanda, Roberto M. Lang, 2007

Contrast Echocardiography Harald Becher, Andreas Helfen, 2019-07-03 This book provides a comprehensive overview of the practical aspects of contrast echocardiography. It also covers all the material in the guidelines published by the American Society of Echocardiography (ASE) in 2018 and the recommendations set out by the European Association of Cardiovascular Imaging (EACVI) in 2017. Contrast echocardiography at present is only used in 5-10% of cases, but this is expected to grow rapidly following the recommendations of the ASE and EACVI. The chapters cover the approved indications and provide practical advice on how to administer the contrast agents and how to optimize the recordings as well as how to deal with the pitfalls. The reader will find all the information on how to use contrast agents for assessment of shunts, LV volumes and function as well as myocardial diseases and masses. Detailed protocols are included for stress echocardiography and myocardial perfusion imaging. Other topics covered include the use of contrast agents for coronary sonography and transesophageal echocardiography. Contrast Echocardiography: Compendium for Clinical Practice comprehensively covers all aspects of the clinical use of contrast echocardiography and has been written by two cardiologists who share their experience from their high volume echo laboratories. One of the authors has been a member of both the ASE guidelines and EACVI recommendation writing groups. It is therefore, a critical text for echocardiographers and sonographers who perform echocardiography.

Springer Handbook of Automation Shimon Y. Nof, 2009-07-16 This handbook incorporates new developments in automation. It also presents a widespread and well-structured conglomeration of new emerging application areas, such as medical systems and health, transportation, security and

maintenance, service, construction and retail as well as production or logistics. The handbook is not only an ideal resource for automation experts but also for people new to this expanding field.

Incarnations Sunil Khilnani,2017-01-12 For all of India's myths, stories and moral epics, Indian history remains a curiously unpeopled place. In *Incarnations*, Sunil Khilnani fills that space, recapturing the human dimension of how the world's largest democracy came to be. His trenchant portraits of emperors, warriors, philosophers, film stars and corporate titans—some famous, some unjustly forgotten—bring feeling, wry humour and uncommon insight to dilemmas that extend from ancient times to our own.

Full Seismic Waveform Modelling and Inversion Andreas Fichtner,2010-11-16 Recent progress in numerical methods and computer science allows us today to simulate the propagation of seismic waves through realistically heterogeneous Earth models with unprecedented accuracy. Full waveform tomography is a tomographic technique that takes advantage of numerical solutions of the elastic wave equation. The accuracy of the numerical solutions and the exploitation of complete waveform information result in tomographic images that are both more realistic and better resolved. This book develops and describes state of the art methodologies covering all aspects of full waveform tomography including methods for the numerical solution of the elastic wave equation, the adjoint method, the design of objective functionals and optimisation schemes. It provides a variety of case studies on all scales from local to global based on a large number of examples involving real data. It is a comprehensive reference on full waveform tomography for advanced students, researchers and professionals.

The War of a Million Cuts Manfred Gerstenfeld,2015-05-06 For the first time ever, a book unravels the complex process of the tremendous delegitimization efforts directed toward Israel. *The War of a Million Cuts* explains how these attempts at the delegitimization of Israel, as well as anti-Semitism can be fought. The book describes the hateful messages of those who defame Israel and the Jews, details why anti-Semitism and anti-Israelism have the same core motifs, and discusses the main groups of inciters, including Muslim states, Muslims in the Western world, politicians, media, NGOs, church leaders, those on the extreme left and the extreme right, Jewish self-haters, academics, social democrats and many others. It explains how the hate messages are effectively transmitted to the public at large, and discusses what impact the delegitimization has already made on Israel and the Jews.

What Makes Civilization? David Wengrow,2018-01-25 In 'What Makes Civilization?', archaeologist David Wengrow provides a vivid account of the 'birth of civilization' in ancient Egypt and Mesopotamia (today's Iraq). These two regions, where many foundations of modern life were laid, are usually treated in isolation. Now, they are brought together within a unified history.

Virtual Competition Ariel Ezrachi,Maurice E. Stucke,2016-11-30 Ariel Ezrachi and Maurice Stucke take a hard look at today's app-assisted paradise of digital shopping. The algorithms and data-crunching that make online purchasing so convenient are also changing the nature of the market by shifting power into the hands of the few, with risks to competition, our democratic ideals, and our overall well-being.

Diet and Health National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Committee on Diet and Health,1989-01-01 *Diet and Health* examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular

diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

Flow Cytometry and Cell Sorting Andreas Radbruch,2013-03-14 The analysis and sorting of large numbers of cells with a fluorescence-activated cell sorter (FACS) was first achieved some 30 years ago. Since then, this technology has been rapidly developed and is used today in many laboratories. A Springer Lab Manual Review of the First Edition: This is a most useful volume which will be a welcome addition for personal use and also for laboratories in a wide range of disciplines. Highly recommended. CYTOBIOS
