The Man who Lied to His Laptop Clifford Ivar Nass, Corina Yen, 2010 Explains what humans' interactions with computers teach us about how humans should interact with one another, including the fact that flattery works, mixing criticism with praise is an ineffective method of evaluation and much more.

The Big Data Agenda Annika Richterich, 2018-04-13 This book highlights that the capacity for gathering, analysing, and utilising vast amounts of digital (user) data raises significant ethical issues. Annika Richterich provides a systematic contemporary overview of the field of critical data studies that reflects on practices of digital data collection and analysis. The book assesses in detail one big data research area: biomedical studies, focused on epidemiological surveillance. Specific case studies explore how big data have been used in academic work. The Big Data Agenda concludes that the use of big data in research urgently needs to be considered from the vantage point of ethics and social justice. Drawing upon discourse ethics and critical data studies, Richterich argues that entanglements between big data research and technology/ internet corporations have emerged. In consequence, more opportunities for discussing and negotiating emerging research practices and their implications for societal values are needed.

Research Handbook on Big Data Law Roland Vogl, 2021-05-28 This state-of-the-art Research Handbook provides an overview of research into, and the scope of current thinking in, the field of big

data analytics and the law. It contains a wealth of information to survey the issues surrounding big data analytics in legal settings, as well as legal issues concerning the application of big data techniques in different domains.

Comparative Analysis of National Approaches of the Liability of the Internet

Intermediaries - Part I World Intellectual Property Organization, Seng, Daniel, 2016-11-28 In this study, Professor Seng seeks to identify the possible commonalities among different liability doctrines. The study is divided into two parts, the first consisting of a “Survey of National Legislation and Jurisprudence on the Liability of Internet Intermediaries in the Field of Copyright and Related Rights”, covering 30 jurisdictions.

Newton and the Counterfeiter Thomas Levenson, 2011-03-17 Already famous throughout Europe for his theories of planetary motion and gravity, Isaac Newton decided to take on the job of running the Royal Mint. And there, Newton became drawn into a battle with William Chaloner, the most skilful of counterfeiters, a man who not only got away with faking His Majesty's coins (a crime that the law equated with treason), but was trying to take over the Mint itself. But Chaloner had no idea who he was taking on. Newton pursued his enemy with the cold, implacable logic that he brought to his scientific research. Set against the backdrop of early eighteenth-century London with its sewers running down the middle of the streets, its fetid rivers, its packed houses, smoke and fog, its industries and its great port, this dark tale of obsession and revenge transforms our image of Britain's greatest scientist.

The Rhetoric of Intellectual Property Jessica Reyman, 2009-12-16 Through an analysis of the legal and public debate about copyright in a digital age, this book shows how the stories told by participants shape our cultural understanding of the role of the Internet in cultural production.

Intellectual Property Liability of Consumers, Facilitators and Intermediaries Christopher Heath, Anselm Kamperman Sanders, 2012-10-01 With reports from all major jurisdictions where the responsibility of facilitators and intermediaries for copyright and trade mark infringement have been litigated, this very useful book is the first comprehensive global survey of the liability regime that intermediaries may face when assisting others to directly infringe copyright and trade mark rights, or when providing others with the means to do so. It addresses such issues as the following: ISP liability; contributory and secondary liability for trade mark, copyright, and patent infringement; time- and geo-shifting devices and services; consumer identification through dynamic IP addresses; infringements committed on a “commercial scale”; liability of hosting providers; requirements for a breach of duty of care; notice to users to refrain from infringements; filters and other due diligence measures; “actual knowledge”; privacy and infringers’ personal data; file sharing services; online storage services; and liability of transporters and freighters. After a general introduction analysing relevant aspects of trade mark and copyright law, local experts provide detailed reports on positions in the EU (at the Community level), Germany, France, Italy, The United States, Japan, Korea, Australia, and New Zealand. As well as dealing with the issues, each report pays close attention to case law, legislative developments, and procedural issues of injunctive relief and damages. A final chapter covers comparative contributory patent infringement. Along with the very practical value the book offers corporate counsel charged with IP rights litigation, the authors shed light on the fundamental issue of whether attempts to broaden liability in this area are compatible with established IP principles such as territoriality, freedom to operate, and freedom of competition. As a result, the book will be welcomed by a wide spectrum of lawyers and others working in this rapidly growing field, including practitioners, policymakers, academics, and jurists.

Compromised Data Greg Elmer, Ganaele Langlois, Joanna Redden, 2015-07-30 Explores the ethical and political issues surrounding big data, specifically obtained from social media.

Conflict of Laws and the Internet Pedro de Miguel Asensio, 2020-04-24 The ubiquity of the Internet contrasts with the territorial nature of national legal orders. This book offers a comprehensive analysis of jurisdiction, choice of law and enforcement of judgments issues concerning online activities in the areas in which private legal relationships are most affected by the Internet. It provides an in-depth study of EU Law in this particularly dynamic field, with references to major developments in other jurisdictions. Topics comprise information society services, data protection, defamation, copyright, trademarks, unfair competition and contracts, including consumer protection and alternative dispute resolution.

Blockchain and the Law Primavera De Filippi De Filippi, 2018-04-09 Since Bitcoin appeared in 2009, the digital currency has been hailed as an Internet marvel and decried as the preferred transaction vehicle for all manner of criminals. It has left nearly everyone without a computer science degree confused: Just how do you “mine” money from ones and zeros? The answer lies in a technology called blockchain, which can be used for much more than Bitcoin. A general-purpose tool for creating secure, decentralized, peer-to-peer applications, blockchain technology has been compared to the Internet itself in both form and impact. Some have said this tool may change society as we know it. Blockchains are being used to create autonomous computer programs known as “smart contracts,” to expedite payments, to create financial instruments, to organize the exchange of data and information, and to facilitate interactions between humans and machines. The technology could affect governance itself, by supporting new organizational structures that promote more democratic and participatory decision making. Primavera De Filippi and Aaron Wright acknowledge

this potential and urge the law to catch up. That is because disintermediation—a blockchain’s greatest asset—subverts critical regulation. By cutting out middlemen, such as large online operators and multinational corporations, blockchains run the risk of undermining the capacity of governmental authorities to supervise activities in banking, commerce, law, and other vital areas. De Filippi and Wright welcome the new possibilities inherent in blockchains. But as *Blockchain and the Law* makes clear, the technology cannot be harnessed productively without new rules and new approaches to legal thinking.

The Global Challenge of Intellectual Property Rights R. Bird, Robert Bird, Subhash C. Jain, 2009-01-01 . . . a gratifying collection of informed and engaging contributions. John A. Tessensohn, *European Intellectual Property Review* The importance of intellectual property rights is now well established as a vital component in the success of firms and nations. The diverse contributors to this volume, drawn from the fields of law, business and economics, clarify and analyze the problems and promise of IP policy from a global perspective. They discuss both developed and emerging nations and advance the understanding of this increasingly important topic. The articles address issues from an interdisciplinary focus with an emphasis on current topical issues. Topics addressed include intellectual rights protection in emerging nations such as China, an exploration of a specific cross-national intellectual property perspective, strategies for protecting intellectual property rights, and a guide to understanding emerging and non-western legal systems. A mix of theoretical and practical observations helps the reader navigate the increasingly international topic of intellectual property as well as offers strategies for optimal utilization of intellectual property assets. The volume serves well both as a solution-oriented book and as a tool for facilitating further discussion and analysis in the classroom. Scholars and students in law, business and economics, as well as business

practitioners interested in a global perspective on IP policy, will enjoy this book.

Transvenous Lead Extraction Maria Grazia Bongiorno, 2011-09-06 In the last years, indications for defibrillators and cardiac resynchronization therapy have expanded enormously; for this reason, and also due to the extension of human life length, the number of patients with implanted cardiac devices have steadily increased. The leads implanted for the functioning of these devices, however, have a limited duration in time and more and more their extraction will be a frequent issue in clinical practice, in order to treat short- and long-term complications, such as infections and failures. Aim of this book is to provide readers with a state-of-the-art on lead extraction techniques. The chapters deal with leads characteristics, indications to lead removal, patient preparation, tools and techniques for

extraction, and prevention and management of complications. In addition, a series of tips and tricks on how to treat some particular conditions (tight cost-clavicular space, fractured leads, ICD leads, endangered leads...etc.), are given. A new extracting technique, according to which the extraction is performed through the internal jugular vein is described; several examples are included and many figures provide a thorough depiction of this innovative procedure. The volume will be an excellent resource for all those involved in the management of cardiac patients: cardiologists, arrhythmologists, cardiac surgeons, GPs, pediatricians, and post-graduate students in these disciplines.

The Leprechauns of Software Engineering Laurent Bossavit, 2015-06-28 The software profession has a problem, widely recognized but which nobody seems willing to do anything about; a variant of the well known telephone game, where some trivial rumor is repeated from one person to the next until it has become distorted beyond recognition and blown up out of all proportion. Unfortunately, the objects of this telephone game are generally considered cornerstone truths of the discipline, to the point that their acceptance now seems to hinder further progress. This book takes a look at some of those ground truths the claimed 10x variation in productivity between developers; the software crisis; the cost-of-change curve; the cone of uncertainty; and more. It assesses the real weight of the evidence behind these ideas - and confronts the scary prospect of moving the state of the art forward in a discipline that has had the ground kicked from under it.
