Minoan Realities Diamantis Panagiotopoulos,2012 What is the social role of images and architecture in a pre-modern society? How were they used to create adequate environments for specific profane and ritual activities? In which ways did they interact with each other? These and other crucial issues on the social significance of imagery and built structures in Neopalatial Crete were the subject of a workshop which took place on November 16th, 2009 at the University of Heidelberg. The papers presented in the workshop are collected in the present volume. They provide different approaches to this complex topic and are aimed at a better understanding of the formation, role, and perception of images and architecture in a very dynamic social landscape. The Cretan Neopalatial period saw a rapid increase in the number of palaces and 'villas', characterized by elaborate designs and idiosyncratic architectural patterns which were themselves in turn generated by a pressing desire for a distinctive social and performative environment.

The Dream is Real Bob Davis,2020-10-29 The Dream is Real You've heard and watched the games, now go behind the scenes to get the skinny on the humor, drama and strategy behind them. The Dream is Real is a look back at the award-winning career of broadcaster Bob Davis. From the days of his childhood watching 17-year-old and future New York Yankee Hall-of-Famer Mickey Mantle play shortstop for the Class D Independence (Kan.) Yankees; to calling an NAIA national basketball championship; broadcasting eight NCAA Final Fours; doing an Orange Bowl champion; and being in the booth for major league baseball; sports has been his passion. Davis uses his folksy style, quick wit and engaging humor -- just as he did on the air -- as he looks back at the games and people he met along the way. His story is complemented by the memories of coaches, athletes, broadcasting peers, family and friends for this trip back down memory lane which included Davis broadcasting nearly 5,000 games over 48 years. Those contributors include Bill Self, Kevin Harlan, Roy Williams, Mitch Holthus, Tony Muser, Denny Matthews, Mark Mangino, Jim Nantz, Larry Brown, Dick Vitale, Glen Mason, Ryan Lefebvre, Danny Manning, Holly Rowe, Mike Sweeney and a host of other sports personalities. And you'll also hear from people whose names weren't in lights, but nevertheless played an integral role in the story of Bob's life -- a Sunday school student, a high school football coach, his son Steven, co-workers, broadcasting partners and more. The journey began when Davis had to tell his dad he was quitting law school after one year to pursue a career in broadcasting. From there we learn of his receiving 50 rejection letters before landing a DJ position at KAYS in Hays, Kan. He parlayed that into a 16-year stint where he became one of the most popular people in Hays, serving as the conduit between the fans and their beloved Hays High Indians, Thomas More Prep Monarchs and Fort Hays State Tigers. His talents were well-known and in demand and his next calling was a 32-year run as the Voice of the Kansas Jayhawks. He also managed to find time to spend 20 years working at KMBZ radio during that time. Davis capped his career by broadcasting the sport which attracted him to the profession as he spent 16 years in radio and television with the Kansas City Royals. Bob Davis is a people person and readers will enjoy the meeting and reading about the characters he introduces throughout the story of his life. You'll learn about the size 20 EEEE shoe that sat upon the register at Goodwin's Sportings Goods. There are the numerous stories and touching memories involving long-time broadcast partners Max Falkenstien and Paul Splittorff. Of course, there are the many humorous on-air and off-air interactions that are certain to leave readers in stitches. Then there are the road trips -- the hijinks experienced on planes, trains and automobiles will leave you in stitches. Lastly, you will get to relive the outstanding performances and competitions that captured our attention and imagination for almost half a century. Bob Davis is in more halls of fame than one can count. After reading The Dream is Real, you'll come to learn why he was so highly regarded as a broadcaster. But you'll also understand why he is considered a hall-of-fame person. All he ever wanted to do is tell stories about sports on the radio. And we as fans are fortunate to have had the opportunity to listen in.

Twitter Jean Burgess,Nancy K. Baym,2020-04-28 The sometimes surprising, often humorous story of the forces that came together to shape the central role Twitter now

plays in contemporary politics and culture Is Twitter a place for sociability and conversation, a platform for public broadcasting, or a network for discussion? Digital platforms have become influential in every sphere of communication, from the intimate and everyday to the public, professional, and political. Since the scrappy startup days of social media in the mid-2000s, not only has the worldwide importance of platforms grown exponentially, but also their cultures have shifted dramatically, in a variety of directions. These changes have brought new opportunities for progressive communities to thrive online, as well as widespread problems with commercial exploitation, disinformation, and hate speech. Twitter's growth over the past decade, like that of much social media, has far surpassed its creators' vision. Twitter charts this trajectory in the format of a platform biography: a new, streamlined approach to understanding how platforms change over time. Through the often surprising, fast-moving story of Twitter, it illuminates the multiple forces—from politics and business to digital ideologies—that came together to shape the evolution of this revolutionary platform. Jean Burgess and Nancy K. Baym build a rich narrative of how Twitter has evolved as a technology, a company, and a culture, from its origins as a personal messaging service to its transformation into one of the most globally influential social media platforms, where history and culture is not only recorded but written in real time.

Haunted Baraboo Shelley Mordini and Gwen Herrewi,2021-08 For decades, ghosts have been known to inhabit some of Baraboo's most prized historic locations. Buildings and mansions built by the Ringling brothers at the height of their circus empire now harbor apparitions of unidentified children, horse trainers and other circus workers. Residents throughout the Downtown Baraboo Historic District describe disembodied voices, footsteps and items moving on their own. Even historic homes, new homes and roadways have ghosts--a family awakened to find their dining room table set for a party of ten, a little girl realized that her friend wasn't getting any older and a Highway 12 hitchhiker materialized despite the highway being rerouted. Founder of Baraboo Tours Shelley Mordini and tour guide Gwen Herrewig share tales of Baraboo's more mysterious side.

Pheromone Communication in Moths Jeremy D. Allison,Ring T. Carde,2016-10-25 Common among moths is a mate-finding system in which females emit a pheromone that induces males to fly upwind along the pheromone plume. Since the chemical pheromone of the domesticated silk moth was identified in 1959, a steady increase in the number of moth species whose pheromone attractants have been identified now results in a rich base for review and synthesis. Pheromone Communication in Moths summarizes moth pheromone biology, covering the chemical structures used by the various lineages, signal production and perception, the genetic control of moth pheromone traits, interactions of pheromones with host-plant volatiles, pheromone dispersal and orientation, male pheromones and courtship, and the evolutionary forces that have likely shaped pheromone signals and their role in sexual selection. Also included are chapters on practical applications in the control and monitoring of pest species as well as case studies that address pheromone systems in a number of species and groups of closely allied species. Pheromone Communication in Moths is an invaluable resource for entomologists, chemical ecologists, pest-management scientists, and professionals who study pheromone communication and pest management.

Configuring the Networked Self Julie E. Cohen,2012-01-24 The legal and technical rules governing flows of information are out of balance, argues Julie E. Cohen in

this original analysis of information law and policy. Flows of cultural and technical information are overly restricted, while flows of personal information often are not restricted at all. The author investigates the institutional forces shaping the emerging information society and the contradictions between those forces and the ways that people use information and information technologies in their everyday lives. She then proposes legal principles to ensure that people have ample room for cultural and material participation as well as greater control over the boundary conditions that govern flows of information to, from, and about them.
