Richard Porter

Special Deluxe Neil Young,2015-12 Quirky and wonderfully candid, Neil Young's second book of reminiscences is as compelling as his first book. He returns with more unforgettable stories about his six decades in the music business - but this is not your average rock biography. He centres this work on one of his life's passions, cars, using the framework of all the cars he's ever owned to construct a narrative of his life and career, exploring and demonstrating how memories are attached to objects. Young also expresses regret for the environmental impact of his past cars, and now passionately advocates the use of clean energy. 'Special Deluxe' is a mix of memoir and environmental politics by one of the most gifted and influential artists of our time.

The Yugo Jason Vuic,2011-03-01 Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it the worst car of the millennium. And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand good communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

Child Language Matthew Saxton,2010-03-03 Electronic Inspection Copy available for instructors here Presented with the latest thinking and research on how children acquire their first language, the reader is taken from a standing start to the point where they can engage with key debates and current research in the field of child language. No background knowledge of linguistic theory is assumed and all specialist terms are introduced in clear, non-technical language. A theme running through the book is the nature-nurture debate, rekindled in the modern era by Noam Chomsky, with his belief that the child is born with a rich knowledge of language. This book is rare in its balanced presentation of evidence from both sides of the nature-nurture divide. The reader is encouraged to adopt a critical stance throughout and weigh up the evidence for themselves. Key features for the student include: boxes and exercises to foster an understanding of key concepts in language and linguistics; a glossary of key terms; suggestions for further reading; a list of useful websites at the end of each chapter; discussion points for use in class; and separate author and subject indexes.

Banking on the resulting success of this option package, Chrysler went on to release a decade worth of low-priced, high-performance muscle cars based on the A-body Valiant, including the Dodge Dart GT and GTS, the Swinger 340, and the Demon, as well as the Plymouth Duster. Today, these cars' phenomenal sales figures translate to a thriving Dart and Duster enthusiast scene. Color photography of restored and factory-original vehicles, along with archival black-and-white images, are accompanied by an authoritative history examining the development of the cars. In addition to model histories for each, there are in-depth discussions of vehicle design and production, driving impressions, accessories and options, popular performance upgrades of the period, and the cars' successful histories at the drag strip.

American Cars, 1946-1959 J. "Kelly" Flory, Jr.,2008-11-24 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United

States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the Forward Look Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

The Complete Catalog of British Cars 1895-1975 David Culshaw, Peter Horrobin, 1997 A comprehensive account of British cars, this book presents a large amount of information - historical as well as technical - in a way which should serve the needs of the dedicated enthusiast and the general reader. Nearly over 700 manufacturers and some 3700 individual models are covered - including technical specification for most cars. A wide selection of photographs feature all the major marques and some minor ones.

Open Content Licensing Lucie Guibault, Christina Angelopoulos, 2011 Although open content licenses only account for a fraction of all copyright licenses currently enforced in the world, their introduction has had profound effects on the use and dissemination of information. This book explores the theoretical underpinnings of these licenses and offers insight on the practical advantages and inconveniences of their use. The essays collected here include an objective study of the principles of open content from the perspective of European intellectual property law as well as novel examinations of their possible implementation in different areas of the cultural or information industry.

Migration and Social Remittances in a Global Europe Magdalena Nowicka, Vojin Šerbedžija, 2017-02-01 This book explores migrant's global social remittances and their impacts on Europe. Exploring the topic from a range of disciplines including sociology, anthropology, geography and political science, the authors present empirical analyses covering a wide selection of international contexts across Europe, India, Iraq, Bolivia, Congo, Lebanon and Thailand. The book presents migrants not as Europe's 'cultural others' but as an integral part of Europe's global connection, and scrutinises the flows of knowledge, ideas, money, objects and values which result from the process of migration, rather than the migrants themselves. A valuable contribution to the literature on migrant transnationalism and globalisation, this book will appeal to scholars across the social sciences.
