*The Ocean and Cryosphere in a Changing Climate* Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

*Analyzing Qualitative Data with MAXQDA* Udo Kuckartz, Stefan Rädiker, 2019-05-31 This book presents strategies for analyzing qualitative and mixed methods data with MAXQDA software, and provides guidance on implementing a variety of research methods and approaches, e.g. grounded theory, discourse analysis and qualitative content analysis, using the software. In addition, it explains specific topics, such as transcription, building a coding frame, visualization, analysis of videos, concept maps, group comparisons and the creation of literature reviews. The book is intended for masters and PhD students as well as researchers and practitioners dealing with qualitative data in various disciplines, including the educational and social sciences, psychology, public health, business or economics.

**Interstellar Turbulence** José Franco, Alberto Carraminana, 1999-05-28 This timely volume presents a series of review articles covering every aspect of interstellar turbulence--from accretion disks, molecular clouds, atomic and ionized media, through to spiral galaxies - based on a major international conference held in Mexico City. With advances in observational techniques and the development of more efficient computer codes and faster computers, research in this area has made spectacular progress in recent years. This book provides a comprehensive overview of the most important developments in observing and modelling turbulent flows in the cosmos. It provides graduate student and researchers with a state-of-the-art summary of observational, theoretical and computational research in interstellar turbulence.

**Physical (A)Causality** Karl Svozil, 2020-10-08 This book addresses the physical phenomenon of events that seem to occur spontaneously and without any known cause. These are to be contrasted with events that happen in a (pre-)determined, predictable, lawful, and causal way. All our knowledge is based on self-reflexive theorizing, as well as on operational means of empirical perception. Some of the questions that arise are the following: are these limitations reflected by our models? Under what circumstances does chance kick in? Is chance in physics merely epistemic? In other words, do we simply not know enough, or use too crude levels of description for our predictions? Or are certain events truly, that is, irreducibly, random? The book tries to answer some of these questions by introducing intrinsic, embedded observers and provable unknowns; that is, observables and procedures which are certified (relative to the assumptions) to be unknowable or undoable. A (somewhat iconoclastic) review of quantum mechanics is presented which is inspired by quantum logic. Postulated quantum (un-)knowables are reviewed. More exotic unknowns originate in the assumption of classical continua, and in finite automata and generalized urn models, which mimic

complementarity and yet maintain value definiteness. Traditional conceptions of free will, miracles and dualistic interfaces are based on gaps in an otherwise deterministic universe. **Origin and Evolution of the Elements** Nikos Prantzos, Elisabeth Vangioni-Flam, Michel Cassé, 1993-05-06 The study of the formation of cosmic elements in various astrophysical sites attracts researchers from astrophysics, nuclear physics, meteoritics and many other disciplines. Articles from international specialists in all these fields are presented in this book; these are drawn together from a conference held in Paris in 1992 in honour of Hubert Reeves, a profound contributor to the study of the origin of the cosmic elements. Stellar and primordial nucleosynthesis, cosmic ray spallation and other processes involved in the formation of cosmic elements are reviewed. Recent observational data are presented on the abundances of elements in various astrophysical objects together with data on the nuclear reactions thought to be involved. The implications of all these developments for the evolution of stars and galaxies and the origin of our solar system and the universe are also discussed. Several review articles summarise the current knowledge and others address more topical issues making this text suitable for both graduate students and researchers.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **An Introduction to Active Galactic Nuclei** Bradley M. Peterson, 1997-02-13 How can we test if a supermassive black hole lies at the heart of every active galactic nucleus? What are LINERS, BL Lacs, N galaxies, broad-line radio galaxies and radio-quiet quasars and how do they compare? This timely textbook answers these questions in a clear, comprehensive and self-contained introduction to active galactic nuclei - for graduate students in astronomy and physics. The study of AGN is one of the most dynamic areas of contemporary astronomy, involving one fifth of all research astronomers. This textbook provides a systematic review of the observed properties of AGN across the entire electromagnetic spectrum, examines the underlying physics, and shows how the brightest AGN, quasars, can be used to probe the farthest reaches of the Universe. This book serves as both an entry point to the research literature and as a valuable reference for researchers in the field.

Cardiac Resynchronization Therapy Cheuk-Man Yu, David L. Hayes, Angelo Auricchio, 2009-01-26 Cardiac Resynchronization Therapy continues to evolve at a rapid pace. Growing clinical experience and additional clinical trials are resulting in changes in how patients are selected for CRT. This new edition of the successful Cardiac Resynchronization Therapy builds on the strengths of the first edition, providing basic knowledge as well as an up-to-date summary of new advances in CRT for heart failure. Fully updated to include information on technological advances, trouble shooting and recent key clinical trials, and with nine new chapters, this expanded text provides the latest information, keeping the reader up-to-date with this rapidly evolving field. The second edition of Cardiac Resynchronization Therapy is an essential addition to your collection.

**Evolutionary Computing and Mobile Sustainable Networks** V. Suma, Nouredine Bouhmala, Haoxiang Wang, 2020-07-31 This book features selected research papers presented at the International Conference on Evolutionary Computing and Mobile Sustainable Networks (ICECMSN 2020), held at the Sir M. Visvesvaraya Institute of Technology on 20-21 February 2020. Discussing advances in evolutionary computing technologies, including swarm intelligence algorithms and other evolutionary algorithm paradigms which are emerging as widely accepted descriptors for mobile sustainable networks virtualization, optimization and automation, this book is a valuable resource for researchers in the field of evolutionary computing and mobile sustainable networks.

**Flavor Perception** Andrew J. Taylor, Deborah D. Roberts, 2008-04-15 Unlike

other human senses, the exact mechanisms that lead to our perception of flavor have not yet been elucidated. It is recognised that the process involves a wide range of stimuli, which are thought likely to interact in a complex way, but, since the chemical compounds and physical structures that activate the flavor sensors change as the food is eaten, measurements of the changes in stimuli with time are essential to an understanding of the relationship between stimuli and perception. It is clear that we need to consider the whole process – the release of flavor chemicals in the mouth, the transport processes to the receptors, the specificity and characteristics of the receptors, the transduction mechanisms and the subsequent processing of signals locally and at higher centres in the brain. This book provides a state-of-the-art review of our current understanding of the key stages of flavor perception for those working in the flavor field, whether in the academic or industrial sector. In particular, it is directed at food scientists and technologists, ingredients suppliers and sensory scientists.

**Systematic Reviews**, 2009 For adults. There is a pressing need for methodologically sound RCTs to confirm whether such interventions are helpful and, if so, for whom.

*Physical Processes in Interstellar Clouds* G.E. Morfill, M. Scholer, 2012-12-06 This book is the result of a meeting held in August, 1986 in Irsee, West Germany. As the title suggests, the aim of the meeting was to discuss physical processes in interstellar clouds, determine the current status, aims and future direction of the research in this area. Interstellar clouds contain nearly all the mass of diffuse gas in our galaxy, some 10% of the total galactic mass. They represent the birth site for stars and the final dumping ground for matter ejected from stars (winds, explosive ejecta) and thus play an integral part in the galactic recycling of material. Not only are the clouds important for the structure and evolution of our galaxy, they are also interesting objects of study per se. Because of their vast scales (up to about 100 parsec), extreme temperatures (as low as about 100 K), and long life 8 times (estimated at about 10 years) a number of physical and chemical processes occur in these environments, which we are not able to study elsewhere, certainly not in laboratories. It is for this reason that the meeting, and hence this book, was organized in such a way that firstly the latest observational results were summarized, going from the global, large scales, to finer details and dynamics, then progressing onwards to the processes – dynamical, chemical, electromagnetic, etc.

Fold and Thrust Belts J.A. Hammerstein, R. Di Cuia, M.A. Cottam, G. Zamora, R.W.H. Butler, 2020-10-14 The outer parts of collision mountain belts are commonly represented by fold and thrust belts. Major advances in understanding these tectonic settings have arisen from regional studies that integrate diverse geological information in quests to find and produce hydrocarbons. Drilling has provided tests of subsurface forecasts, challenging interpretation strategies and structural models. This volume contains 19 papers that illustrate a diversity of methods and approaches together with case studies from Europe, the Middle East and the Asia-Pacific region. Collectively they show that appreciating diversity is key for developing better interpretations of complex geological structures in the subsurface – endeavours that span applications beyond the development of hydrocarbons.

*Academic Flying and the Means of Communication* Kristian Bjørkdahl, Adrian Santiago Franco Duharte, 2022-01-01 This open access book shines a light on how and why academic work became entwined with air travel, and what can be done to change academia's flying habit. The starting point of the book is that flying is only one means of scholarly communication among many, and that the state of the planet now obliges us to shift to other means. How can the academic-as-globetrotter become a thing of the past? The chapters in this book respond to this call in three steps. It documents the consequences of academic flying, it investigates the issue of why academics fly, and it

begins an effort to think through what can replace flying, and how. Finally, it confronts scholars and scientists, students, activists, research funders, university administrators, and others, with a call to translate this research into action.

*Advances in Tourism, Technology and Systems* António Abreu,Dália Liberato,Elisa Alén González,Juan Carlos Garcia Ojeda,2020-11-19 This book features a collection of high-quality research papers presented at the International Conference on Tourism, Technology & Systems (ICOTTS 2020), held at the University of Cartagena, in Cartagena de Indias, Colombia, from 29th to 31st October 2020. The book is divided into two volumes, and it covers the areas of technology in tourism and the tourist experience, generations and technology in tourism, digital marketing applied to tourism and travel, mobile technologies applied to sustainable tourism, information technologies in tourism, digital transformation of tourism business, e-tourism and tourism 2.0, big data and management for travel and tourism, geotagging and tourist mobility, smart destinations, robotics in tourism, and information systems and technologies.

**IBM Systems Director 6.3 Best Practices** Rufus Credle,Srikanth Aithal,Nicolas Bour,Stephane Bourdeaud,Tomi Mannikainen,Olaf Menke,Juan P Fernandez Sabate,IBM Redbooks,2013-11-08 This IBM® Redbooks® publication describes the positioning of the IBM Systems Director in the complete management range. It also compares the IBM Systems Director with the IBM Flex Systems Manager (FSM) and describes the environments for which each tool is best suited. This publication helps you plan, install, tailor, and configure the IBM Systems Director on different platforms. It contains information about required system resources and which network ports are used. It shows how to use the Workload Estimator to select the appropriate hardware for IBM Systems Director server and provides information about the IBM Systems Director Editions. Best practices are covered for the basic management tasks that are available in IBM Systems Director, including how to perform discovery; how to collect inventory on discovered resources; how to deploy agent, driver, and firmware updates; how to manage hardware events; and other miscellaneous tasks. An overview of best practices is provided for using IBM Systems Director VMControl™. Systems Director VMControl is a cross-platform product that assists you in rapidly deploying virtual appliances to create virtual servers that are configured with the operating system and software applications that you want. It also enables you to group resources into system pools, which enable you to centrally manage and control the different workloads in your environment. The following plug-in offerings are described: Energy monitoring and management features offered by IBM Systems Director Active Energy Manager™ along with the best practice, which needs to be followed in using the IBM Systems Director Active Energy Manager. The IBM AIX® Profile Manager is a tool that can help implement and monitor the security of all AIX servers in a production environment but also implement and monitor the system compliance of those AIX servers. Best practices and the most important questions to ask before creating Workload Partition Manager (WPAR) and WPAR Manager infrastructure. In addition, how you can manage and relocate WPARs using WPAR Manager graphical interface and the command-line interface. Network Control basic functionalities and how to plan for Network Control deployments and also a number of common scenarios with best practices. The IBM Systems Director Service and Support Manager describes how to set up and how to handle serviceable events. Best practices for the Storage Monitoring and Management capabilities offered by IBM Systems Director server. This book is for IBM IT specialists and IT architects, IBM Business Partners, and clients, who are utilizing or considering implementing IBM Systems Director.

**Planetary Nebulae (IAU S323)** Xiaowei Liu,Letizia Stanghellini,Amanda Karakas,2017-09-28 Planetary nebulae, glowing shells of ionized gas, are the spectacular products of the evolution of low- and intermediate-mass stars.

For astrophysicists, they are important laboratories for the understanding of atomic, molecular, dust, and plasma processes in different cosmic environments; they enable the exploration of the fundamental physics of single and binary star evolution including nucleosynthesis, rotation, mass transfer and loss, and magnetic fields; and they help trace stellar populations, the kinematics, and chemistry of galaxies including our own galaxy, the Milky Way. This volume reviews the current status of this vibrant research field in the form of invited reviews, contributed talks, and posters presented at the IAU Symposium 323. It should be of interest to researchers and advanced students interested in this field and in related fields, including stellar physics, the interstellar medium, and Galactic and extragalactic astronomy.

LGBTQ Cultures Michele J. Eliason,Peggy L. Chinn,2017-10-16 Drawn from real-world experience and current research, the fully updated LGBTQ Cultures, 3rd Edition paves the way for healthcare professionals to provide well-informed, culturally sensitive healthcare to lesbian, gay, bisexual, transgender, and queer (LGBTQ) patients. This vital guide fills the LGBTQ awareness gaps, including replacing myths and stereotypes with facts, and measuring the effects of social stigma on health. Vital for all nursing specialties, this is the seminal guide to actively providing appropriate, culturally sensitive care to persons of all sexual orientations and gender identities.

Smart & Good High Schools Thomas Lickona,Matthew Davidson,2005 Throughout history, and in cultures all over the world, education rightly conceived has had two great goals: to help students become smart and to help them become good. They need character for both. Smart & Good High Schools, a 227-page report to the nation by Thomas Lickona and Matthew Davidson based on two years of research on American high schools, describes nearly 100 promising practices for developing adolescent character. These practices are organized around a vision aimed at encouraging a paradigm shift in character education: from focusing only on moral character to focusing on both performance character (needed for best work) and moral character (needed for ethical behavior). The report's research included visits to 24 diverse high schools, a comprehensive research review, and the input of a National Experts Panel and a National Student Leaders Panel. --Publisher description.
