Virtual and Augmented Reality: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-03-02 Virtual and augmented reality is the next frontier of technological innovation. As technology exponentially evolves, so do the ways in which humans interact and depend upon it. *Virtual and Augmented Reality: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on the trends, techniques, and uses of virtual and augmented reality in various fields, and examines the benefits and challenges of these developments. Highlighting a range of pertinent topics, such as human-computer interaction, digital self-identity, and virtual reconstruction, this multi-volume book is ideally designed for researchers, academics, professionals, theorists, students, and practitioners interested in emerging technology applications across the digital plane.

Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics—the multidimensionality, immateriality, and non-locality of the unified field of energy and information—as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. *Exploring the Collective Unconscious in a Digital Age* investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media-sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.

Learning to Live Together Harmoniously Jwalin Patel, 2023-04-13 This book calls for an expanded vision of holistic education that emphasizes togetherness and harmony through the discovery of oneself, others, and the larger society. It brings together teachers' voices, experiences, and practices for such an education with Southern Knowledge, philosophy and ideologies proposed by Indian philosophers and spiritual leaders like Aurobindo, the Dalai Lama, Gandhi, Krishnamurti, and Tagore. The book reconceptualizes and extends UNESCO's Learning To Live Together to emphasize Learning to Live Together Harmoniously (LTLTH) and develops a novel conceptual framework for it. The book also explores how LTLTH can be translated into practice; calling for a continuum of harmonious lived experiences created through experiential and project based pedagogy, systems and processes for autonomy and autonomous behaviour regulation, empathetic teacher student relations, schoolwide ethos of harmonious living, and teachers' ways of living and being.

Encyclopedia of Infant and Early Childhood Development , 2020-03-13 *Encyclopedia of Infant and Early Childhood Development*, Second Edition, provides a comprehensive entry point into the existing literature on child development in the fields of psychology, genetics, neuroscience and sociology. Featuring 171 chapters, across 3

volumes, this work helps readers understand these developmental changes, when they occur, why they occur, how they occur, and the factors that influence development. Although some medical information is included, the emphasis lies mainly in normal growth, primarily from a psychological perspective. Comprehensive and in-depth scholarly articles cover theoretical, applied and basic science topics, providing an interdisciplinary approach. All articles have been completely updated, making this resource ideal for a wide range of readers, including advanced undergraduate and graduate students, researchers and clinicians in developmental psychology, medicine, nursing, social science and early childhood education. Cutting-edge content that cover the period of neonates to age three Organized alphabetically by topic for ease of reference Provides in-depth scholarly articles, covering theoretical, applied and basic science Includes suggested readings at the end of each article

Handbook of Research on Children's Consumption of Digital Media Sar?, Gül?ah,2018-07-06 One of the consequences of the digital revolution is the availability and pervasiveness of media and technology. They became an integral part of many people's lives, including children, who are often exposed to media and technology at an early age. Due to this early exposure, children have become targeted consumers for businesses and other organizations that seek to utilize the data they generate. The Handbook of Research on Children's Consumption of Digital Media is a scholarly research publication that examines how children have become consumers as well as how their consumption habits have changed in the age of digital and media technologies. Featuring current research on cyber bullying, social media, and digital advertising, this book is geared toward marketing and advertising professionals, consumer researchers, international business strategists, academicians, and upper-level graduate students seeking current research on the transformation of child to consumer.

The Telomere Effect Dr. Elizabeth Blackburn,Dr. Elissa Epel,2017-01-03 The New York Times bestselling book coauthored by the Nobel Prize winner who discovered telomerase and telomeres' role in the aging process and the health psychologist who has done original research into how specific lifestyle and psychological habits can protect telomeres, slowing disease and improving life. Have you wondered why some sixty-year-olds look and feel like forty-year-olds and why some forty-year-olds look and feel like sixty-year-olds? While many factors contribute to aging and illness, Dr. Elizabeth Blackburn discovered a biological indicator called telomerase, the enzyme that replenishes telomeres, which protect our genetic heritage. Dr. Blackburn and Dr. Elissa Epel's research shows that the length and health of one's telomeres are a biological underpinning of the long-hypothesized mind-body connection. They and other scientists have found that changes we can make to our daily habits can protect our telomeres and increase our health spans (the number of years we remain healthy, active, and disease-free). The Telomere Effect reveals how Blackburn and Epel's findings, together with research from colleagues around the world, cumulatively show that sleep quality, exercise, aspects of diet, and even certain chemicals profoundly affect our telomeres, and that chronic stress, negative thoughts, strained relationships, and even the wrong neighborhoods can eat away at them. Drawing from this scientific body of knowledge, they share lists of foods and suggest amounts and types of exercise that are healthy for our telomeres, mind tricks you can

use to protect yourself from stress, and information about how to protect your children against developing shorter telomeres, from pregnancy through adolescence. And they describe how we can improve our health spans at the community level, with neighborhoods characterized by trust, green spaces, and safe streets. The Telomere Effect will make you reassess how you live your life on a day-to-day basis. It is the first book to explain how we age at a cellular level and how we can make simple changes to keep our chromosomes and cells healthy, allowing us to stay disease-free longer and live more vital and meaningful lives.

Critical Biopolitics of the Post-Soviet Andrey Makarychev,Alexandra Yatsyk,2019-12-15 This book is a critical attempt to cast a biopolitical gaze at the process of subjectification of Russia, Ukraine, Georgia, and Estonia in terms of multiple and overlapping regimes of belonging, performativity, and (de)bordering. The authors strive to go beyond the traditional understandings of biopolitics as a set of policies corresponding to the management and regulation of (pre)existing populations. In their opinion, biopolitics might be part of nation building, a force that produces collective political identities grounded in the acceptance of sets of corporeal practices of control over human bodies and their physical existence. For the authors, to look critically at this biopolitical gaze on the realm of the post-Soviet means also to rethink the correlation between the biopolitical vision of the post-Soviet and the biopolitical epistemology on the post-Soviet, which would demand a new vocabulary. The critical biopolitics might be one of these vocabularies, which would fulfill this request.

Handbook of Research on User Experience in Web 2.0 Technologies and Its Impact on Universities and Businesses Pelet, Jean-Éric,2020-09-18 As various areas of discipline continue to progress into the digital age, diverse modes of technology are being experimented with and ultimately implemented into common practices. Mobile products and interactive devices, specifically, are being tested within educational environments as well as corporate business in support of online learning and e-commerce initiatives. There is a boundless stock of factors that play a role in successfully implementing web technologies and user-driven learning strategies, which require substantial research for executives and administrators in these fields. The Handbook of Research on User Experience in Web 2.0 Technologies and Its Impact on Universities and Businesses is an essential reference source that presents research on the strategic role of user experience in e-learning and e-commerce at the level of the global economy, networks and organizations, teams and work groups, and information systems. The book assesses the impact of e-learning and e-commerce technologies on different organizations, including higher education institutions, multinational corporations, health providers, and business companies. Featuring research on topics such as ubiquitous interfaces, computer graphics, and image processing, this book is ideally designed for program developers and designers, researchers, practitioners, IT professionals, executives, academicians, and students.

Growing up in a Digital World - Social and Cognitive Implications Mikael Heimann,Adriana Bus,Rachel Barr,2021-11-30

Understanding Media Psychology Gayle S. Stever,David C. Giles,J. David Cohen,Mary E. Myers,2021-09-28 Understanding Media Psychology is the perfect introductory textbook to the growing field of media psychology and

its importance in society, summarizing key concepts and theories to provide an overview of topics in the field. Media is present in almost every area of life today, and is an area of study that will only increase in importance as the world becomes ever more interconnected. Written by a team of expert authors, this book will help readers to understand the structures, influences, and theories around media psychology. Covering core areas such as positive media psychology, the effects of gaming, violence, advertising, and pornography, the authors critically engage with contemporary discussions around propaganda, fake news, deepfakes, and the ways media have informed the COVID-19 pandemic. Particular care is also given to addressing the interaction between issues of social justice and the media, as well as the effects media has on both the members of marginalized groups and the way those groups are perceived. A final chapter addresses the nature of the field moving forward, and how it will continue to interact with closely related areas of study. Containing a range of pedagogical features throughout to aid teaching and student learning, including vocabulary and key terms, discussion questions, and boxed examples, this is an essential resource for media psychology courses at the undergraduate and introductory master's level globally.

Routledge Handbook on the Philosophy of Meditation Rick Repetti, 2022-05-16 This Handbook provides a comprehensive overview and analysis of the state of the field of the philosophy of meditation and engages primarily in the philosophical assessment of the merits of meditation practices. This Handbook unites novel and original scholarship from 28 leading Asian and Western philosophers, scientists, theologians, and other scholars on the philosophical assessment of meditation. It critically assesses the conceptual and empirical validity of meditation, its philosophical implications, its legitimacy as a phenomenological research tool, its potential value as an aid to neuroscience research, its many practical benefits, and, among other considerations, its possibly misleading interpretations, applications, and consequences. Following the introduction by the editor, the Handbook's chapters are organized in six parts: • Meditation and philosophy • Meditation and epistemology • Meditation and metaphysics • Meditation and values • Meditation and phenomenology • Meditation in Greco-Roman and Judeo-Christian traditions A distinctive, timely, and invaluable reference work, it marks the emergence of a new discipline therein, the philosophy of meditation. The book will be of interest to an interdisciplinary audience in the fields of philosophy, meditation, Buddhism, Hinduism, Taoism, theology, and Asian and Western philosophy. It will serve as the textbook in any philosophy course on meditation, and as secondary reading in courses in philosophy of mind, consciousness, selfhood/personhood, metaphysics, or phenomenology, thereby helping to restore philosophy as a way of life.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of

the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Examining Applied Multicultural Industrial and Organizational Psychology Christiansen, Bryan, Even, Angela M., 2023-05-22 Industrial and organizational psychology (I-O psychology) contributes to an organization's success by improving the job performance, wellbeing, motivation, job satisfaction, and the health and safety of employees. Given the extent to which organizations today are increasingly comprised of employees from different cultural and language backgrounds, studying the cultural aspect of I-O psychology has become a necessity. The post-pandemic world in which the remote or hybrid workplace is becoming increasingly common adds importance to the multicultural perspective in the discipline due to the distances involved between employees and management. Examining Applied Multicultural Industrial and Organizational Psychology provides updated research on applied I-O psychology within a culturally conscious context that can be used for future research directions in the field by academicians and practitioners alike. Covering topics such as employability, motivation theories, and workplace culture, this major reference work is a comprehensive resource for I-O psychologists, business leaders and managers, entrepreneurs, human resource managers, government officials, students and educators of higher education, librarians, researchers, and academicians.

Essentials of Money, Banking and Financial Institutions Samuel K. Andoh, 2014-10-15 Essentials of Money, Banking and Financial Institutions builds on the essential concepts of money and banking and applies them in the context of developing countries. Frequent comparisons between developed and developing countries are made to enable students to make proper inferences about the efficacy of certain concepts.

A Companion to the Anthropology of Reproductive Medicine and Technology Cecilia Coale Van Hollen, Nayantara Appleton, 2025-04-01 Provides fresh perspectives on the past, present and future-facing contributions of the anthropology of reproduction. A Companion to the Anthropology of Reproductive Medicine and Technology provides a timely and comprehensive overview of the anthropological study of reproductive practices, technologies, and interventions in a global context. Exploring the medical and technological management of human reproduction through a sociocultural lens, this groundbreaking volume reviews past and current research, discusses contemporary debates and recent theoretical developments, introduces key themes and trends, examines ongoing issues of equity, inclusivity, and reproductive justice around the world, and more. The Companion brings together essays by multidisciplinary scholars in fields including sociocultural anthropology, medical anthropology, reproductive health, global public health, Science and Technology Studies (STS), gender and sexuality studies, critical race studies, and environmental studies, to list but a few. Five thematically organized sections address reproductive

practitioners and paradigms, global reproductive health and interventions, reproductive justice, the life-course approach to the study of reproductive health, and the future of reproductive technology and medicine. Using clear, jargon-free language, the authors investigate pregnancy and childbirth; fertility treatments; birth control, contraception and abortion; COVID-19 and reproduction; reproductive cancers; epigenetics; social discrimination; gender and sexualities and reproduction for LGBTQIA+ communities; race and reproduction; migration and reproduction; reproduction and war; reproductive health financing; reproduction and disabilities, reproduction and the environment; and other important contemporary topics. A cutting-edge guide to the modern study of reproduction, this groundbreaking volume: Provides an overview of the links between anthropological study and progressive work in medicine, healthcare, and technology Addresses both the challenges and opportunities facing researchers in the field Identifies gaps in current scholarship and offers recommendations for future research topics and methodologies Highlights the importance of ethnographic research combined with critical engagements with other disciplines for the anthropology of reproduction Explores the impact of socioeconomic conditions, environmental challenges, public policy, and legislation on reproductive health outcomes Traces the history of the field and demonstrates how anthropologists have engaged with issues of reproductive justice Part of the acclaimed Wiley Blackwell Companions to Anthropology series, A Companion to the Anthropology of Reproductive Medicine and Technology is an essential resource for undergraduate and graduate students, researchers, and scholars in medical anthropology, science technology and society, cultural anthropology, ethnology, and gender studies, as well as medical practitioners, policymakers, and activists involved in global and public health and reproductive justice.

A Graduate Introduction to Numerical Methods Robert M. Corless, Nicolas Fillion, 2013-12-12 This book provides an extensive introduction to numerical computing from the viewpoint of backward error analysis. The intended audience includes students and researchers in science, engineering and mathematics. The approach taken is somewhat informal owing to the wide variety of backgrounds of the readers, but the central ideas of backward error and sensitivity (conditioning) are systematically emphasized. The book is divided into four parts: Part I provides the background preliminaries including floating-point arithmetic, polynomials and computer evaluation of functions; Part II covers numerical linear algebra; Part III covers interpolation, the FFT and quadrature; and Part IV covers numerical solutions of differential equations including initial-value problems, boundary-value problems, delay differential equations and a brief chapter on partial differential equations. The book contains detailed illustrations, chapter summaries and a variety of exercises as well some Matlab codes provided online as supplementary material. "I really like the focus on backward error analysis and condition. This is novel in a textbook and a practical approach that will bring welcome attention. Lawrence F. Shampine A Graduate Introduction to Numerical Methods and Backward Error Analysis" has been selected by Computing Reviews as a notable book in computing in 2013. Computing Reviews Best of 2013 list consists of book and article nominations from reviewers, CR category editors, the editors-in-chief of journals, and others in the computing community.

Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method Chowdhury, Jahid

Siraz,Wahab, Haris Abd,Saad, Rashid Mohd,Roy, Parimal Kumar,Wronka, Joseph,2022-05-27 Ethnography in the digital age presents new methods for research. It encourages scientists to think about how we live and study in a digital, material, and sensory world. Digital ethnography considers the impact of digital media on the methods and processes by which we perform ethnography and how the digital, methodological, practical, and theoretical aspects of ethnographic research are becoming increasingly interwoven. This planet does not exist in a static state; as technology grows and shifts, we must learn how to appropriately analyze these changes. Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method examines the pervasiveness of digital media in digital ethnography's setting and practice. It investigates how digital settings, techniques, and procedures are reshaping ethnographic practice and explores the ethnographic-theoretical interactions through which "old" opinions are influenced by digital ethnography practice, going beyond merely transferring conventional concepts and techniques into digital research settings. Covering topics such as data triangulation, indigenous living systems, and digital technology, this premier reference source is an essential resource for libraries, students, teachers, sociologists, anthropologists, social workers, historians, political scientists, geographers, public health officials, archivists, government officials, researchers, and academicians.

Solutions to Water Crises (Related to Actual Interventions) Jenia Mukherjee,Saket Pande,Melissa Haeffner,Sara Marks,Pieter van Oel,Matthew R. Sanderson,Adriana Allen,2024-01-26 This Research Topic is a part of the Delft 2021: 1st Sociohydrology Conference series. To view the other sessions please follow the links below: Innovating a New Knowledge Base for Water Justice Studies: Hydrosocial, Sociohydrology, and Beyond Scale Issues in Human-Water Systems Water Resources and Human Behavior: Analysis and Modeling of Coupled Water-Human Systems Feedbacks and Coevolution Innovative Sensing, Observing, Measuring and Analysing Human-Water Data "Pluralistic water research" integrates the hydrological and the social to provide sustainable solutions to water crises. While relying upon robust quantitative modelling, sociohydrology captures crises across many waters (surface, ground and interstitial) along quantity and quality dimensions, hydrosocial unfurls power hierarchies in access to safe and required quota of water, be it for drinking or irrigation purposes. The success of engineering solutions laying out "hard" interventions such as solar powered irrigation, dams, high yielding crop varieties, water treatment plants and water distributions and purifications depend on "soft" socio-political, cultural and psychological variables like the political landscape, community behaviours and governance arrangements. How these soft parameters limit or advance the effect of hard interventions await more enhanced modelling and place-based qualitative analyses to disentangle various cause-effect pathways. While historical and process-based sociohydrology accommodates detailed temporal datasets and causal relationships across human-water systems, the hydrosocial paradigm reconciles "non-modern", anti-hegemonic, water techniques and knowledge systems, animating local agencies within specific hydrosapes. This issue is dedicated to capture real time innovations through which water challenges have been confronted. It intends to unravel "storylines" along actionable water projects, reflecting on mediations across multiple actors and networks in specific spatio-temporal and cultural contexts,

finally drawing our attention to the correlation between projected promises and actual realities. Situated at the crossroads of “boundary work”, we invite articles that will deploy a range of interdisciplinary frameworks like RANAS (Risk, Attitude, Norms, Ability, and Self-regulation), APIE (Awareness, Participation, Involvement and Engagement), HUPE (Historical Urban Political Ecology), etc. to demonstrate coupled sociohydrological and hydrosocial realities and in turn getting informed by empirical insights emanating from these actual water interventions. The final aim of the special issue is not to showcase water just actual interventions but to elicit a rigorous mapping of sustainable processes facilitating collective co-production of resilient water trajectories.

What is Cognitive Science Ernest Lepore, Zenon Pylyshyn, 1999-10-18 Written by an assembly of leading researchers in the field, this volume provides an innovative and non-technical introduction to cognitive science, and the key issues that animate the field.

Digital Ageism Andrea Rosales, Mireia Fernández-Ardèvol, Jakob Svensson, 2023-06-05 This anthology contributes to creating awareness on how digital ageism operates in relation to the widely spread symbolic representations of old and young age around digital technologies, the (lack of) representation of diverse older individuals in the design, development, and marketing of digital technologies and in the actual algorithms and datasets that constitute them. It also shows how individuals and institutions deal with digital ageism in everyday life. In the past decades, digital technologies permeated most aspects of everyday life. With a focus on how age is represented and experienced in relation to digital technologies leading to digital ageism, digitalisation’s reinforcement of spirals of exclusion and loss of autonomy of some collectives is explored, when it could be natural for a great part of society and represent a sort of improvement. The book addresses social science students and scholars interested in everyday digital technologies, society and the power struggles about it, providing insights from different parts of the globe. By using different methods and touching upon different aspects of digital ageism and how it plays out in contemporary connected data societies, this volume will raise awareness, challenge power, initiate discussions and spur further research into this field. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution 4.0 license.
