Reyner Banham and the Paradoxes of High Tech Todd Gannon,2017-09-05 Reyner Banham and the Paradoxes of High Tech reassesses one of the most influential voices in twentieth-century architectural history through a detailed examination of Banham's writing on High Tech architecture and its immediate antecedents. Taking as a guide Banham's habit of structuring his writings around dialectical tensions, Todd Gannon sheds new light on Banham's early engagement with the New Brutalism of Alison and Peter Smithson, his measured enthusiasm for the "clip-on" approach developed by Cedric Price and the Archigram group, his advocacy of "well-tempered environments" fostered by integrated mechanical and electrical systems, and his late-career assessments of High Tech practitioners such as Norman Foster, Richard Rogers, and Renzo Piano. Gannon devotes significant attention to Banham's late work, including fresh archival materials related to *Making Architecture: The Paradoxes of High Tech*, the manuscript he left unfinished at his death in 1988. For the first time, readers will have access to Banham's previously unpublished draft introduction to that book.

[Big Sid's Vincati](#) Matthew Biberman,2009-04-30 Read Matthew Biberman's posts on the Penguin Blog. If you believe it is possible to

fall in love with a motorcycle, you will love this book. -Jay Leno When Big Sid had a heart attack and gave up the will to live, his son Matthew Biberman panicked. Impulsively, Matthew promised his father that they would build a Vincati together. This fusion of two legendary motorcycles, the Vincent Black Shadow and the Ducati GT, a Vincati was considered near-impossible to build. But if anyone could do it, Matthew knew his father could. Big Sid was the mechanic to see about repairing Vincents for nearly sixty years. But now, Sid was old, busted up and broke. Matthew, despite sharing his dad's passion, had become a Shakespearean scholar. The two men hadn't spoken in years-but called a truce to attempt a shared dream. *Zen and the Art of Motorcycle Maintenance* meets *Shop Class as Soulcraft*, in this heartfelt memoir that shows how two very different men built a legendary motorcycle, and along the way, discovered what it means to be father and son.

Museo Ducati Chris Jonnum,2012 'Museo Ducati' profiles 25 historic motorcycles from Ducati's official museum in Bologna.

Muncie 4-Speed Transmissions Paul Cangialosi,2014-10-15 The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual

transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

The Mars Project Wernher Von Braun, 1953 This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in *The Mars Project*.

À la rencontre du cinéma français Robert J. Berg, 2010-07-27 *À la rencontre du cinéma français: analyse, genre, histoire* is intended to serve as the core textbook in a wide variety of upper-level undergraduate and graduate French cinema courses. In contrast to content-, theme-, or issue-based approaches to film, Professor Berg stresses “the cinematically specific, the warp and fabric of the film itself, the stuff of which it is made.’ Sufficient proficiency in French is the sole prerequisite: “No previous background in film studies is assumed, nor is any prior acquaintance with French cinema. It will help, of course, to like movies, and to have seen quite a few...” (from the preface).

First Class Alison Stewart, Melissa Harris-Perry, 2013-08-01 Combining a fascinating history of the first U.S. high school for African Americans with an unflinching analysis of urban public-school education today, *First Class* explores an underrepresented and largely unknown aspect of black history while opening a discussion on what it takes to make a public school successful. In 1870, in the wake of the Civil War, citizens of Washington, DC, opened the Preparatory High School for Colored Youth, the first black public high school in the United States; it would later be renamed Dunbar High and would flourish despite Jim Crow laws and segregation. Dunbar attracted an extraordinary faculty: its early principal was the first black graduate of Harvard, and at a time it had seven teachers with PhDs, a medical doctor, and a lawyer. During the school's first 80 years, these teachers would develop generations of highly educated, successful African Americans, and at its height in the 1940s and '50s, Dunbar High School sent 80 percent of its students to college. Today, as in too many failing urban public schools, the majority of Dunbar students are barely proficient in reading and math. Journalist and author Alison Stewart—whose parents were both Dunbar graduates—tells the story of the school's rise, fall, and possible resurgence as it looks to reopen its new, state-of-the-art campus in the fall of 2013.
