Regulating Technologies Roger Brownsword, Karen Yeung, 2008-10-23 While it is a truism that emerging technologies present both opportunities for and challenges to their host communities, the legal community has only recently begun to consider their significance. On the one hand, emerging information, bio, nano, and neurotechnologies challenge policy-makers who aspire to put in place a regulatory environment that is legitimate, effective, and sustainable; on the other hand, these same technologies offer new opportunities as potentially powerful regulatory instruments. In this unique volume, a team of leading international scholars address many of the key difficulties surrounding the regulation of emerging technological targets as well as the implications of adopting technology as a regulatory tool. How should we rise to the challenge of regulating technologies? How are the regulatory lines to be drawn in the right places and how is the public to be properly engaged? How is precaution to be accommodated, and how can the law keep pace with technologies that develop ahead of the regulatory environment? How readily should we avail ourselves of the opportunity to use technology as a regulative strategy? How are we to understand these strategies and the challenges which they raise? To what extent do they give rise to

similar policy problems accompanying more 'traditional' regulatory instruments or generate distinctive challenges? While the criminal justice system increasingly relies on technological assistance and the development of a 'surveillance society', is a regulatory regime that rules by technology compatible with rule of law values?

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to

liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

The War on Learning Elizabeth Losh, 2024-02-06 An examination of technology-based education initiatives—from MOOCs to virtual worlds—that argues against treating education as a product rather than a process. Behind the lectern stands the professor, deploying course management systems, online quizzes, wireless clickers, PowerPoint slides, podcasts, and plagiarism-detection software. In the seats are the students, armed with smartphones, laptops, tablets, music players, and social networking. Although these

two forces seem poised to do battle with each other, they are really both taking part in a war on learning itself. In this book, Elizabeth Losh examines current efforts to “reform” higher education by applying technological solutions to problems in teaching and learning. She finds that many of these initiatives fail because they treat education as a product rather than a process. Highly touted schemes—video games for the classroom, for example, or the distribution of iPads—let students down because they promote consumption rather than intellectual development. Losh analyzes recent trends in postsecondary education and the rhetoric around them, often drawing on first-person accounts. In an effort to identify educational technologies that might actually work, she looks at strategies including MOOCs (massive open online courses), the gamification of subject matter, remix pedagogy, video lectures (from Randy Pausch to “the Baked Professor”), and educational virtual worlds. Finally, Losh outlines six basic principles of digital learning and describes several successful university-based initiatives. Her book will be essential reading for campus decision makers—and for anyone who cares about education and technology.

The Wonder-worker of Padua Charles Warren Stoddard, 1896

Copyfraud and Other Abuses of Intellectual Property Law Jason Mazzone, 2011-10-05 Intellectual property law in the United States does not work well and it needs to be reformed—but not for the reasons given by most critics. The issue is not that intellectual property rights are too easily obtained, too broad in

scope, and too long in duration. Rather, the primary problem is overreaching by publishers, producers, artists, and others who abuse intellectual property law by claiming stronger rights than the law actually gives them. From copyfraud—like phony copyright notices attached to the U.S. Constitution—to lawsuits designed to prevent people from poking fun at Barbie, from controversies over digital sampling in hip-hop to Major League Baseball's ubiquitous restriction on sharing any accounts and descriptions of this game, overreaching claims of intellectual property rights are everywhere. Overreaching interferes with legitimate uses and reproduction of a wide variety of works, imposes enormous social and economic costs, and ultimately undermines creative endeavors. As this book reveals, the solution is not to change the scope or content of intellectual property rights, but to create mechanisms to prevent people asserting rights beyond those they legitimately possess. While there are many other books on intellectual property, this is the first to examine overreaching as a distinct problem and to show how to solve it. Jason Mazzone makes a series of timely proposals by which government, organizations, and ordinary people can stand up to creators and content providers when they seek to grab more than the law gives them.
