Just a Thought Amy Johnson,2021-10-01 You are not your thoughts! Learn how to overcome negative thinking habits and self-doubt so you can experience more confidence, freedom, and peace of mind. When you understand how your mind works, unhelpful and noisy thoughts move to the background, and your awareness shifts to something quieter and deeper. This is true peace of mind. And it's not some unattainable goal reserved for the most enlightened among us. Anyone can experience it. This book will show you how! From life coach and psychologist Amy Johnson, this user-friendly guide offers a no-willpower approach informed by ancient wisdom and modern neuroscience to help you change your negative thinking habits, make peace with your inner critic, and experience more self-confidence and freedom than you ever thought possible. Our minds are hardwired to expect the worst. They love to replay the past and predict the future. They have strong opinions that feel solid and meaningful, but are always changing and contradicting themselves. When we think our thoughts define who we are, we suffer. But when we see the truth—and we glimpse the space that lies beyond those self-created stories—we suffer far less. This book will help you glimpse that truth, and use it to find lasting peace.

Electric-Shock Weapons, Tasers and Policing Abi Dymond, 2021-10-24 Building on five years of research, and drawing on criminology, science and technology studies (STS), socio-legal studies and social psychology, this book is the first non-medical book written on electric-shock weapons, of which the best well known is the TASER brand. The police's ability to use force is one of their most crucial powers, yet one that has been relatively neglected by criminology. This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike. Drawing on STS, it also considers the role and impact of electric-shock technologies, examines the extent to which technologies and non-human agency may also play a role in shaping officer decision making and discretion, and contributes to long standing debates about police accountability. This is essential reading for policing scholars around the world, particularly those engaged with use of force, culture and accountability, as well as those engaged with Science and Technology studies.

Asian Development Outlook 2020 Update Asian Development Bank, 2020-09-01 Developing Asia has suffered as the COVID-19 pandemic persists. Growth, trade, and tourism collapsed in 2020, leading to the region's first economic contraction in nearly 6 decades. Governments across Asia acted quickly to contain the virus and its economic effects, and signs of bottoming out have now appeared. Inflation remains benign, constrained by depressed demand and declining food prices. A prolonged pandemic is the primary downside risk to the outlook. Persistent or renewed outbreaks and a return to stringent containment could possibly derail the recovery and trigger financial turmoil. Recovery depends on measures to address the health crisis and on continued policy support. The pandemic has highlighted the importance of wellness, both physical and mental. Wellness—the pursuit of holistic health and well-being—is a component of the UN's Sustainable Development Goals. This report evaluates the state of wellness in Asia, documents how the wellness economy is a large and growing part of the region's economy, and discusses how policy makers can promote wellness by creating healthy living environments, encouraging physical activity and healthy diets, and enhancing workplace wellness.
