The Integrity of Criminal Process Jill Hunter, Paul Roberts, Simon N M Young, David Dixon, 2016-08-11 Criminal proceedings, it is often now said, ought to be conducted with integrity. But what, exactly, does it mean for criminal process to have, or to lack, 'integrity'? Is integrity in this sense merely an aspirational normative ideal, with possibly diffuse influence on conceptions of professional responsibility? Or is it also a juridical concept with robust institutional purchase and enforceable practical consequences in criminal litigation? The 16 new essays contained in this collection, written by prominent legal scholars and criminologists from Australia, Hong Kong, the UK and the USA, engage systematically with - and seek to generate further debate about - the theoretical and practical significance of 'integrity' at all stages of the criminal process. Reflecting the flexibility and scope of a putative 'integrity principle', the essays range widely over many of the most hotly contested issues in contemporary criminal justice theory, policy and practice, including: the ethics of police investigations, charging practice and discretionary enforcement; prosecutorial independence, policy and operational decision-making; plea bargaining; the perils of witness coaching and accomplice testimony; expert evidence; doctrines of admissibility and abuse of process; lay participation in criminal adjudication; the role of remorse in criminal trials; the ethics of appellate judgment writing; innocence projects; and state compensation for miscarriages of justice.

**Darwin's Pharmacy** Richard M. Doyle, 2011-10-01 Are humans unwitting partners in evolution with psychedelic plants? Darwin's Pharmacy shows they are by weaving the evolutionary theory of sexual selection and the study of rhetoric together with the science and literature of psychedelic drugs. Long suppressed as components of the human tool kit, psychedelic plants can be usefully modeled as "eloquence adjuncts" that intensify a crucial component of sexual selection in humans: discourse. Psychedelic plants seduce us to interact with them, building an ongoing interdependence: rhetoric as evolutionary mechanism. In doing so, they engage our awareness of the noosphere, or thinking stratum of the earth. The realization that the human organism is part of an interconnected ecosystem is an apprehension of immanence that could ultimately benefit the planet and its inhabitants. To explore the rhetoric of the psychedelic experience and its significance to evolution, Doyle takes his readers on an epic journey through the writings of William Burroughs and Kary Mullis, the work of ethnobotanists and anthropologists, and anonymous trip reports. The results offer surprising insights into evolutionary theory, the war on drugs, the internet, and the nature of human consciousness itself. **After Prison** Rose Ricciardelli, Adrienne M.F. Peters, 2017-12-13 Employment for former prisoners is a critical pathway toward reintegration into society and is central to the processes of desistance from crime. Nevertheless, the economic climate in Western countries has aggravated the ability of former prisoners and people with criminal records to find gainful employment. After Prison opens with a former prisoner's story of reintegration employment experiences. Next, relying on a combination of research interviews, quantitative data, and literature, contributors present an international comparative review of Canada's evolving criminal record legislation; the promotive features of employment; the complex constraints and stigma former prisoners encounter as they seek employment; and the individual and societal benefits of assisting former prisoners attain "gainful" employment. A main theme throughout is the interrelationship between employment and other central conditions necessary for safety and sustenance. This book offers suggestions for criminal record policy amendments and new reintegration practices that would assist individuals in the search for employment. Using the evidence and research findings of practitioners and scholars in social work, criminology and law, psychology, and other related fields, the contributors concentrate on strategies that will reduce the stigma of having been in prison; foster supportive relationships between social and legal agencies and prisons and parole systems; and encourage individually tailored resources and training following release of individuals.

*How Students (mis-) Understand Science and Mathematics* Ruth Stavy, Dina Tirosh, 2000-01-01 In this long-awaited book, Timothy J. Lensmire examines the problems and promise of progressive literacy education. He does this by developing a series of striking metaphors in which, for example, he imagines the writing workshop as a carnival or popular festival and the teacher as a novelist who writes her student-characters into more and less desirable classroom stories. Grounded in Lensmire's own and others' work in schools, *Powerful Writing, Responsible Teaching* makes powerful use of Bakhtin's theories of language and writing and Dewey's vision of schooling and democracy. Lensmire's book is, at once, a defense, a criticism, and a reconstruction of progressive and critical literacy approaches.

**The Obamas** Jodi Kantor, 2012-01-10 When Barack Obama won the 2008 presidential election, he also won a long-running debate with his wife Michelle. Contrary to her fears, politics now seemed like a worthwhile, even noble pursuit. Together they planned a White House life that would be as normal and sane as possible. Then they moved in. In *The Obamas*, Jodi Kantor takes us deep inside the White House as they try to grapple with their new roles, change the country, raise children, maintain friendships, and figure out what it means to be the first black President and First Lady. Filled with riveting detail and insight into their partnership, emotions and personalities, and written with a keen eye for the ironies of public life, *The Obamas* is an intimate portrait that will surprise even readers who thought they knew the President and First Lady.

**Block-oriented Nonlinear System Identification** Fouad Giri, Er-Wei Bai, 2010-08-18 Block-oriented Nonlinear System Identification deals with an area of research that has been very active since the turn of the millennium. The book makes a pedagogical and cohesive presentation of the methods developed in that time. These include: iterative and over-parameterization techniques; stochastic and frequency approaches; support-vector-machine, subspace, and separable-least-squares methods; blind identification method; bounded-error method; and decoupling inputs approach. The identification methods are presented by authors who have either invented them or contributed significantly to their development. All the important issues e.g., input design, persistent excitation, and consistency analysis, are discussed. The practical relevance of block-oriented models is illustrated through biomedical/physiological system modelling. The book will be of major interest to all those who are concerned with nonlinear system identification whatever their activity areas. This is particularly the case for educators in electrical, mechanical, chemical and biomedical engineering and for practising engineers in process, aeronautic, aerospace, robotics and vehicles control. Block-oriented Nonlinear System Identification serves as a reference for active researchers, new comers, industrial and education practitioners and graduate students alike.

Each example is typeset verbatim in a style which is easy to read and experiment with. **Surviving Incarceration** Rose Ricciardelli, 2014-05-30 Is prison a humane form of punishment and an effective means of rehabilitation? Are current prison policies, such as shifting resources away from rehabilitation toward housing more offenders, improving the safety and lives of incarcerated populations? Considering that many Canadians have served time, are currently incarcerated, or may one day be incarcerated—and will be released back into society—it is essential for the functioning and betterment of communities that we understand the realities that shape the prison experience for adult male offenders. *Surviving Incarceration* reveals the unnecessary and omnipresent violence in prisons, the heterogeneity of the prisoner population, and the realities that different prisoners navigate in order to survive. Ricciardelli draws on interviews with almost sixty former federal prisoners to show how their criminal convictions, masculinity, and sexuality determined their social status in prison and, in consequence, their potential for victimization. The book outlines the modern inmate code that governs prisoner behaviours, the formal controls put forth by the administration, the dynamics that shape sex-offender experiences of incarceration, and the personal growth experiences of many prisoners as they cope with incarceration.
