Afrikan Alphabets Saki Mafundikwa, 2007 Due to popular demand for the first edition, Mark Batty Publisher proudly announces a reissue of this title in paperback. Blueprint to cyanotypes - Exploring a historical alternative photographic process Malin Fabbri, Gary Fabbri, 2016-01-01 An excellent beginners' guide to cyanotypes - all you need to get started, and some goodies for more advanced cyanotypers too. About the book The cyanotype is often the first alternative process that people try. It is relatively easy and safe enough to nurture a child's interest in photography. It can also be seen as a gateway to further exploration of historic photographic methods. In addition, it gives experienced photographers and artists a great excuse to take their eyes off the computer screen and get their hands dirty. *Blueprint to cyanotypes* is all you will need to get started with cyanotypes. It offers the beginner a step-by-step guide, from choosing material to making the final print. It is full of information and tips. Even the experienced cyanotyper may learn a thing or two. *Blueprint to cyanotypes* is published by AlternativePhotography.com -

a website and information center dedicated to alternative photographic processes. From Malin Fabbri, the author: Why a book on cyanotypes? Of all the alternative processes the cyanotype is the one closest to my heart. I made my first cyanotype in 1999. I was intrigued by the blue images and wanted to test the cyanotype process to see what it had to offer. I bought chemicals and spent an evening coating paper and cloth. The results of the next day's printing surprised me. Although the alchemy of the darkroom had always captivated me, developing a print in the sun was like a liberation. One of the things I found most refreshing about the process was the unpredictability of the results. Some of my best prints were the product of 'happy accidents'. The developing process is straightforward. The chemicals are cheap, and most of the other items used can be found around the house. Pre-coated paper is available, but one of the benefits of working with cyanotypes is the great flexibility of material and paper available to you. Cyanotypes print on anything made of natural fibre. Cotton, linen, silk, handmade paper, watercolor paper and rags are just number of alternatives. Some artists even print on wood. So, if you want to explore a fun alternative photographic process or seriously want to experiment with producing unique fine art, make a cyanotype.
